**STANDARDS FOR APPROVAL:**

The applicant shall demonstrate that the proposed request is consistent with the Master Plan and is in compliance with Title 30.

## **Analysis**

### **Comprehensive Planning**

A special use permit is considered on a case by case basis in consideration of the standards for approval. Additionally, the use shall not result in a substantial or undue adverse effect on adjacent properties, character of the neighborhood, traffic conditions, parking, public improvements, public sites or right-of-way, or other matters affecting the public health, safety, and general welfare; and will be adequately served by public improvements, facilities, and services, and will not impose an undue burden.

Staff is concerned with the scope of the request. Having 10 customers and their dogs on-site is not compatible with a residential neighborhood and is more appropriate in commercial and industrial districts. The noise and traffic associated with up to 10 customers and their dogs at the same time will be a detriment to the area. Therefore, staff cannot support this request.

### **Staff Recommendation**

Denial.

If this request is approved, the Board and/or Commission finds that the application is consistent with the standards and purpose enumerated in the Master Plan, Title 30, and/or the Nevada Revised Statutes.

## **PRELIMINARY STAFF CONDITIONS:**

### **Comprehensive Planning**

If approved:

- 1 year to review;
- 1 year to complete the building permit and inspection process or the application will expire unless extended with approval of an extension of time.
- Applicant is advised that approval of this application does not constitute or imply approval of any other County issued permit, license, or approval; a substantial change in circumstances or regulations may warrant denial or added conditions to an extension of time and application for review; the extension of time may be denied if the project has not commenced or there has been no substantial work towards completion within the time specified; changes to the approved project will require a new land use application; and the applicant is solely responsible for ensuring compliance with all conditions and deadlines.
