RESULTS OF CANVASS
2026 PRIMARY ELECTION
JUNE 9, 2026

The results of the June 9, 2026, Primary Election were canvassed comparing the computer printout of ballots counted and the results thereof, with the official ballot statement for each of the 1,021 precincts utilized in this election.

There were 82 discrepancies in the 276,494 ballots cast in the 1,021 precincts. Fifteen (15) voters fled the ballot marking device prior to casting their vote, twelve (12) reactivation errors; fifty-five (55) voted in the wrong precinct. However, there were no tabulation errors in the 1,021 precincts, and the foregoing irreconcilable discrepancies would not alter the outcome of any contests in the Primary Election.

Five hundred twenty-two (522) provisional ballots were cast during the election, four hundred seventy-nine (479) were verified and counted. Forty-three (43) were not accepted.

Audits were performed according to NRS 293B on the hash code of our tabulator machines and the voter verified paper audit trail. No discrepancies were identified. The accuracy certification board also certified the functionality of our tabulation system, including our mail ballot readers, BMD voting machines, and Agilis mail ballot processing machine. All systems were found to be 100% accurate in the tabulation of votes and processing of mail ballots. The tests were performed before the start of early voting, the day before Election Day, and a post-election test the day after the election.

There were no tabulation errors in the 1,021 precincts. Therefore, as the duly appointed Registrar of Voters of Clark County, Nevada, I do hereby certify to the Clark County Board of Commissioners that the results of the canvass of this election are deemed certifiable.

Official Ballot Statement Justification

Empty City Name Explanation:

1. Precinct 6728 is missing the municipality of County. This needs to be corrected. Fortunately, because the municipality should be County, this did not affect the ballot.
2. Precinct 2938 is not set up correctly. In the past, we used precincts with a 9 as the second digit to indicate a precinct that could not have voters. However, we have been instructed by the state to ensure that all precincts have districts assigned. This precinct needs to be corrected. Fortunately, this precinct currently has no voters.
3. Precinct 9995 is a challenge precinct, used when a voter has been challenged regarding residency. I believe this precinct should also have the municipality of County. I also believe this ballot should contain only contests that can be voted at large.

The reports are split by municipal district, which is why these precincts appear at the top of the report for "All" and also in their own file when split by municipal district.

Absolute Difference Justification:

1. The voter returned a ballot that no longer matched their updated registration because their address was automatically changed through Automatic Voter Registration (AVR) after the initial mail ballot was issued. The DMV-initiated update triggered an automatic revision in the voter registration system, canceling the original ballot and requiring a new one to be issued, which led to the discrepancy.
2. Because the State permitted ongoing online voter registration updates and directed counties to continue processing them, many voters' party affiliations or addresses changed after the initial mail ballot was issued. This required counties to reissue updated ballots; however, some voters returned the new ballot in the original envelope or the original ballot in the new envelope, resulting in discrepancies.

Confidential Address Program Voters:

1. 18 CAP voters account for the discrepancies highlighted in dark green.

Audit of Voter Verified Paper Audit Trail

In accordance with Chapter 293B of the Nevada Administrative Code, an audit was conducted of 20 (2% of 354 is less than 20) ICP2 Tabulators used in the election. The randomly selected tabulators, and the paper trail that was used with each machine, were used in this audit. The audit was conducted as follows:

- a. For each machine selected, the printed record produced by the machine during voting was tabulated by a panel of Clark County Election Department staff members.
- b. The electronically recorded results for each machine were independently tabulated using the election tabulation software.
- c. The results were compared.

The results of the audit showed that 100% of the time, the electronically recorded results exactly matched the selections printed on the paper ballots.

The numbers of the randomly selected machines were:
