PREVENTION SERVICES

Applicability

**STATE OF NEVADA
DEPARTMENT OF HEALTH AND HUMAN SERVICES
DIVISION OF PUBLIC & BEHAVIORAL HEALTH
NOTICE OF SUBAWARD**

This section is only applicable to primary prevention coalitions and programs.

1. The subrecipient will implement the Center for Substance Abuse Prevention's (CSAP) Strategic Prevention Framework Planning Process. 2. If the subrecipient is a certified prevention coalition, it will solicit representatives from local substance abuse prevention programs and treatment providers to become coalition members and assist with efforts to implement the CSAP's Strategic Prevention Framework Planning Process. 3. The subrecipient representatives are required to attend prevention training listed below as applicable to provide prevention services:
 - a. All full-time staff must annually complete a minimum of twenty (20) hours of prevention training.
 - b. All part-time staff must annually complete a minimum for ten (10) hours of prevention training.
 - c. Participate in the implementation of evidence-based prevention programs, strategies, policies, and practices, and use the Prevention Program Operating and Access Standards as the basis for program, workforce, and agency development.
4. The subrecipient must use funding on the primary prevention priorities per funding source;

Substance Abuse Block Grant (SABG)/COVID Relief Funds

- A. The Coronavirus Response and Relief Supplement Appropriations Act, 2021 [P.L. 116-260] appropriated Federal Funds to states through the Substance Abuse Prevention and Treatment Block Grant (SABG) program to assist in response to the COVID-19 pandemic. This funding source represents the 20% set-aside from SABG which is required by statute (45 CFR 96.125) to be used exclusively for primary prevention.
- B. SABG grantees should direct this funding to prioritize and address the unique SUD prevention, intervention, treatment, and recovery support needs and gaps in their state's service systems. For example, SABG grantees with significant increases in overdoses might focus their efforts on reducing overdose rates. Specific infrastructure investments might also be directed toward expanding the SUD services workforce and on data infrastructure for tracking and monitoring system needs and performance. Other recommended priority activities for grantees to consider are as follows:
Prevention: 1. Screening with evidence-based tools. 2. Risk messaging with evidence-informed strategies and accompanying evaluation to establish most effective strategies. This includes: a. Text and mHealth messaging strategies targeted at adolescents and young adults substance misuse; b. Scenario based messaging programs for parents about opioid risks; and c. Web-based interventions targeted at the criminal justice system.3.
Operation
of an "access line" "crisis phone line" or "warm lines" by prevention providers. 4. Purchase of technical assistance. 5. COVID-19 expenditures related to substance misuse prevention including: COVID-19 awareness and education for persons with SUD, transportation related to accessing SUD prevention and COVID-19 vaccines.
- C. BBHWP asks that subrecipients enter program data into the Web Infrastructure for Treatment Services (WITS) database under Prevention Services to facilitate Federal tracking requirements.

Substance Abuse Block Grant (SABG)

- A. This funding source represents the 20% set-aside from SABG which is required by statute (45 CFR 96.125) to be used exclusively for primary prevention. By law, it may only be directed at individuals not identified to need substance use treatment and must be used to fund evidence-based strategies that have a positive impact on the prevention of substance use. Activities that cross over into the 'intervention' realm are not allowed in this funding. While many evidence-based prevention strategies for substance abuse also have a positive impact on other health and social outcomes, the primary purpose and focus of activities must be on substance misuse prevention.
- B. The SABG statute (45 CFR 96.125) requires a comprehensive primary prevention program that includes activities and services provided in a variety of settings. The program must target both the general population and sub-groups that are at high risk for substance misuse. The program must include some or all of the following six strategies: Community-based Process, Environmental, Information Dissemination, Education, Alternatives, and Problem Identification and Referral.
- C. The state is required to ensure that all strategies and IOM Classifications are implemented in Nevada. This may have an impact during the selection process.
- D. Monthly data collection and entry into the WITS database is required.

State General Fund Substance Abuse Primary Prevention (SAPP)

- A. ~~SAPP funds are used as a maintenance of effort (MOE) for the SABG; to increase services and to support infrastructure and the implementation of evidence based/evidence informed direct service substance abuse prevention programs, practices, and strategies at the community level.~~
- B. ~~All activities associated with this funding must be for the implementation of those activities that meet an identified need within the community and are prioritized in the coalition's Comprehensive Community Prevention Plan (CCPP). The CCPP must be provided to the state no later than 90 days after initial project date of notice of award.~~
- C. ~~It is expected that 85% of this funding will support programs or strategies delivered by direct service providers.~~
- D. ~~The 15% balance can be used to support administrative costs associated with the management of these pass-through funds. Of the strategies funded with State General Funds, all must either be evidence based or reviewed and approved through the Bureau.~~

Strategic Prevention Framework Partnership of Success (PFS)

- A. ~~PFS funding on reducing underage drinking among persons aged 9 to 20 in communities of high need. At their discretion, subrecipients may also use~~
PFS funds to target up to two additional priorities identified by the State as prevention or reduction of underage use of marijuana and/or methamphetamines. And reducing the number of marijuana and/or methamphetamines related emergency room visits.
- B. ~~The subrecipient must use a SPF based, comprehensive prevention approach including a mix of evidence based programs (EBP) and practices. The~~

subrecipient must further utilize a data-driven approach to justify practices implemented, and to identify communities/populations of high need or affected by health disparities.

C. The subrecipient must implement practices that have been approved by the State's Evidence Based Workgroup (EBW) and prioritized through the Statewide Epidemiological Workgroup (SEW). To implement practices or programs that have not been approved by the EBW, the subrecipient must document their identified needs and priorities and present data to the SEW for evaluation as a promising practice. Promising practices should be used only if an evidence based practice does not exist to meet the identified community need.

D. The subrecipient will collect and report quarterly and annually community level data to determine progress toward addressing individual grant prevention priority(ies). Recipients must include in their data collection and reporting activities that supporting evidence to preserve or change activities, strategies and continuously evaluate data and systems for effectiveness.

E. The PFS grant program seeks to address behavioral health disparities among racial and ethnic minorities and other populations by encouraging the implementation of strategies to decrease the differences in access, service use, and outcomes among the populations served.

REQUESTS FOR REIMBURSEMENTS (All non-fee-for-service subawards):

1. A Request for Reimbursement is due, at a minimum, on a monthly basis, based on the terms of the sub-grant agreement, no later than the 10th of the month. If there has been no fiscal activity in a given month, **a Request for Reimbursement claiming zero dollars is required to be submitted for the month.**
2. Reimbursement is based on actual expenditures incurred during the period being reported. All request for reimbursements must be to the exact penny and not rounded up to the nearest dollar.
3. Requests for advance of payment will not be considered or allowed by PACT.
4. Reimbursement must be submitted with all PACT required supporting back up documentation. PACT has the authority to ask for additional supporting documentation at any time and the information must be provided to PACT staff within 10 business days of the request.
5. Payment will not be processed without all programmatic reporting being current.
6. Reimbursement may only be claimed for allowable expenditures approved within the sub-grant award.
7. The subrecipient is required to submit a complete financial accounting of all expenditures to PACT within 30 days of the **CLOSE OF THE SUBAWARD PERIOD**. All remaining balances of a federally funded sub-grant revert back to PACT 30 days after the close of the subaward period.
8. The Request for Reimbursement to close the State Fiscal Year (SFY) is due at a minimum of 25 days after the close of the SFY which occurs on June 30. All remaining balances of the State funded subawards revert back to the State after the close of the SFY.
9. The subrecipient must retain copies of approved travel requests and claims, consultant invoices, payroll register indicating title, receipts for goods purchased, and any other relevant source documentation in support of reimbursement requests for a period of three years from the date of submission of the State's final financial expenditure report submitted to the governing federal agency.

The subrecipient agrees that any failure to meet any of the conditions listed within the above Program Requirements may result in the withholding of reimbursement for payment, termination of current contract and/or the disqualification of future funding.
