

UMC

UNIVERSITY MEDICAL CENTER

UMC'S HISTORY

- UMC has been part of the fabric of our community since 1931, when it was a simple one-room clinic run by one physician and one nurse.
- In 1940, Clark County Indigent Hospital changed its name to Clark County General Hospital, later becoming Southern Nevada Memorial Hospital in the 1950s.
- In 1986, the hospital's name changed again to University Medical Center of Southern Nevada, reflecting its role as a teaching institution and a medical center offering complete care.

NEVADA'S HIGHEST LEVEL OF CARE

- Nevada's **ONLY** Level I Trauma Center
- Nevada's **ONLY** Verified Burn Center
- Nevada's **ONLY** Transplant Center
- The Heart Hospital of Nevada
- Home to the Largest Military-Civilian Partnership of its Kind in the U.S.
- Nevada's Largest Public Hospital
- Nevada's Premier Academic Medical Center

14. Sunset Quick & Primary Care – **District G**
15. Southern Highlands Primary Care – **District F**
16. Blue Diamond Quick Care – **District F**

QUICK CARE VS ER

- As others continue to push stand-alone emergency rooms that charge ER prices for even the most routine care, UMC prioritizes the needs of our community by introducing new Quick Care locations.
- UMC offers 10 convenient Quick Care locations across the valley.
- These clinics significantly improve access to care and prevent unnecessary and costly ER visits.
- A 2022 study found that about 13 to 27 percent of ER visits can be addressed in ambulatory settings.
- UMC is exploring the possibility of 24-hour access through our Quick Care model for adult and pediatric patients.

LIONS BURN CARE CENTER
UMC
UNIVERSITY MEDICAL CENTER

- The ONLY Verified Burn Center in Nevada.
- Provides inpatient and outpatient care for more than 8,300 patients each year.
- One of only a handful of hospitals across the nation to receive verification as a Burn Center.
- Recently performed the state's first laser therapy procedures to treat burn scars.
- Treats many burn patients with revolutionary spray-on skin cells generated from a small sample of the patient's skin.

- The UMC Center for Transplantation has grown to become one of the nation's top-ranked transplant programs.
- In early 2023, UMC ranked first in the nation for its one-year kidney survival rate and for offering the shortest amount of time spent waiting for a kidney transplant.
- Recently launched a pancreas transplant program and working toward a liver program.

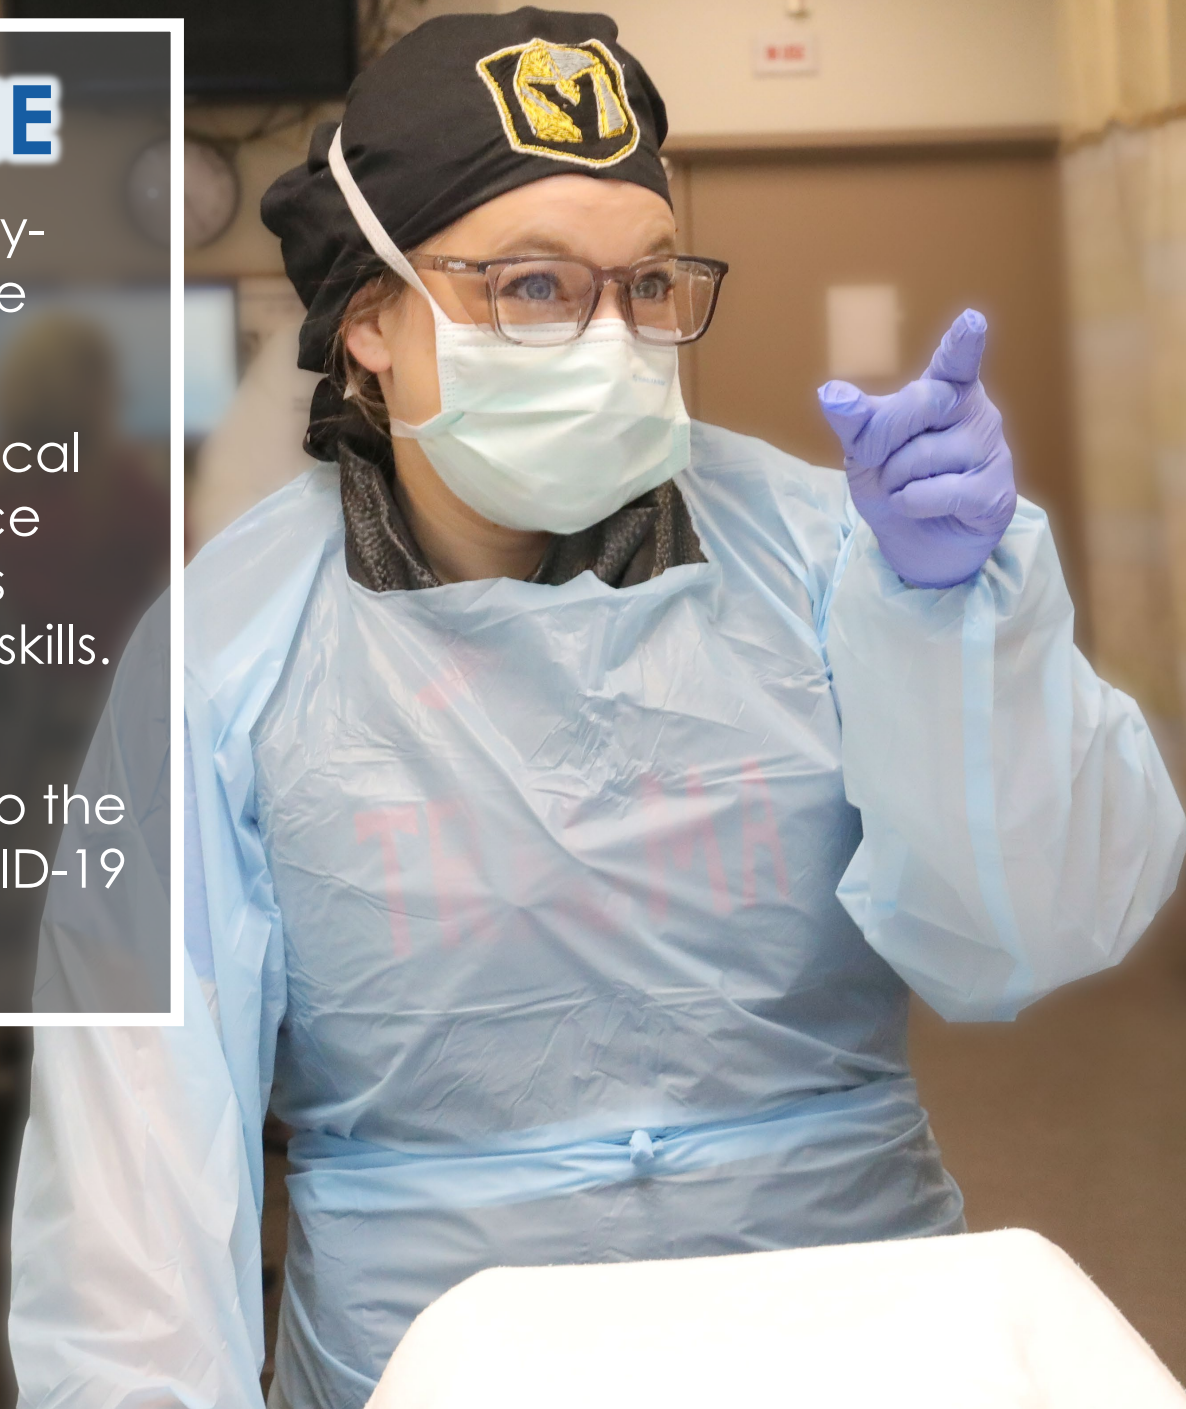

- The ONLY Designated Pediatric Trauma Center in Southern Nevada.
- Offers a Pediatric Emergency Department, Pediatric and Neonatal Intensive Care, and a Pediatric Sedation Unit, in addition to other key services.
- Staffed around the clock with in-hospital, Board-Certified Pediatric Critical Care and Emergency Medicine Physicians.
- The ONLY hospital in Nevada to offer a Verified Pediatric Burn Center.

MILITARY MEDICINE

- UMC is home to the largest military-civilian partnership of its kind in the United States.
- Physicians, nurses and other medical professionals from the U.S. Air Force work alongside UMC's world-class team to maintain and hone their skills.
- These Air Force medics played a valuable role in UMC's response to the October 1 shooting and the COVID-19 pandemic.

ACADEMIC MEDICINE

- UMC is Nevada's premier academic medical center and has participated in medical education for more than 30 years.
- UMC is the anchor hospital for the Kirk Kerkorian School of Medicine at UNLV, allowing the hospital to train 66 medical students per class and about 340 residents/fellows in 20 accredited training programs at UMC.
- UMC remains committed to addressing the local shortage of physicians while training the next generation of medical professionals to care for our community.

- The **UMC Trauma Center** offers the highest level of care available in Nevada, serving patients in a 10,000-square-mile area.
- The **ONLY** free-standing trauma center west of the Mississippi.
- Cares for 14,000 patients annually, with capacity for significantly higher volumes.
- Purpose-built for high volume and acuity.

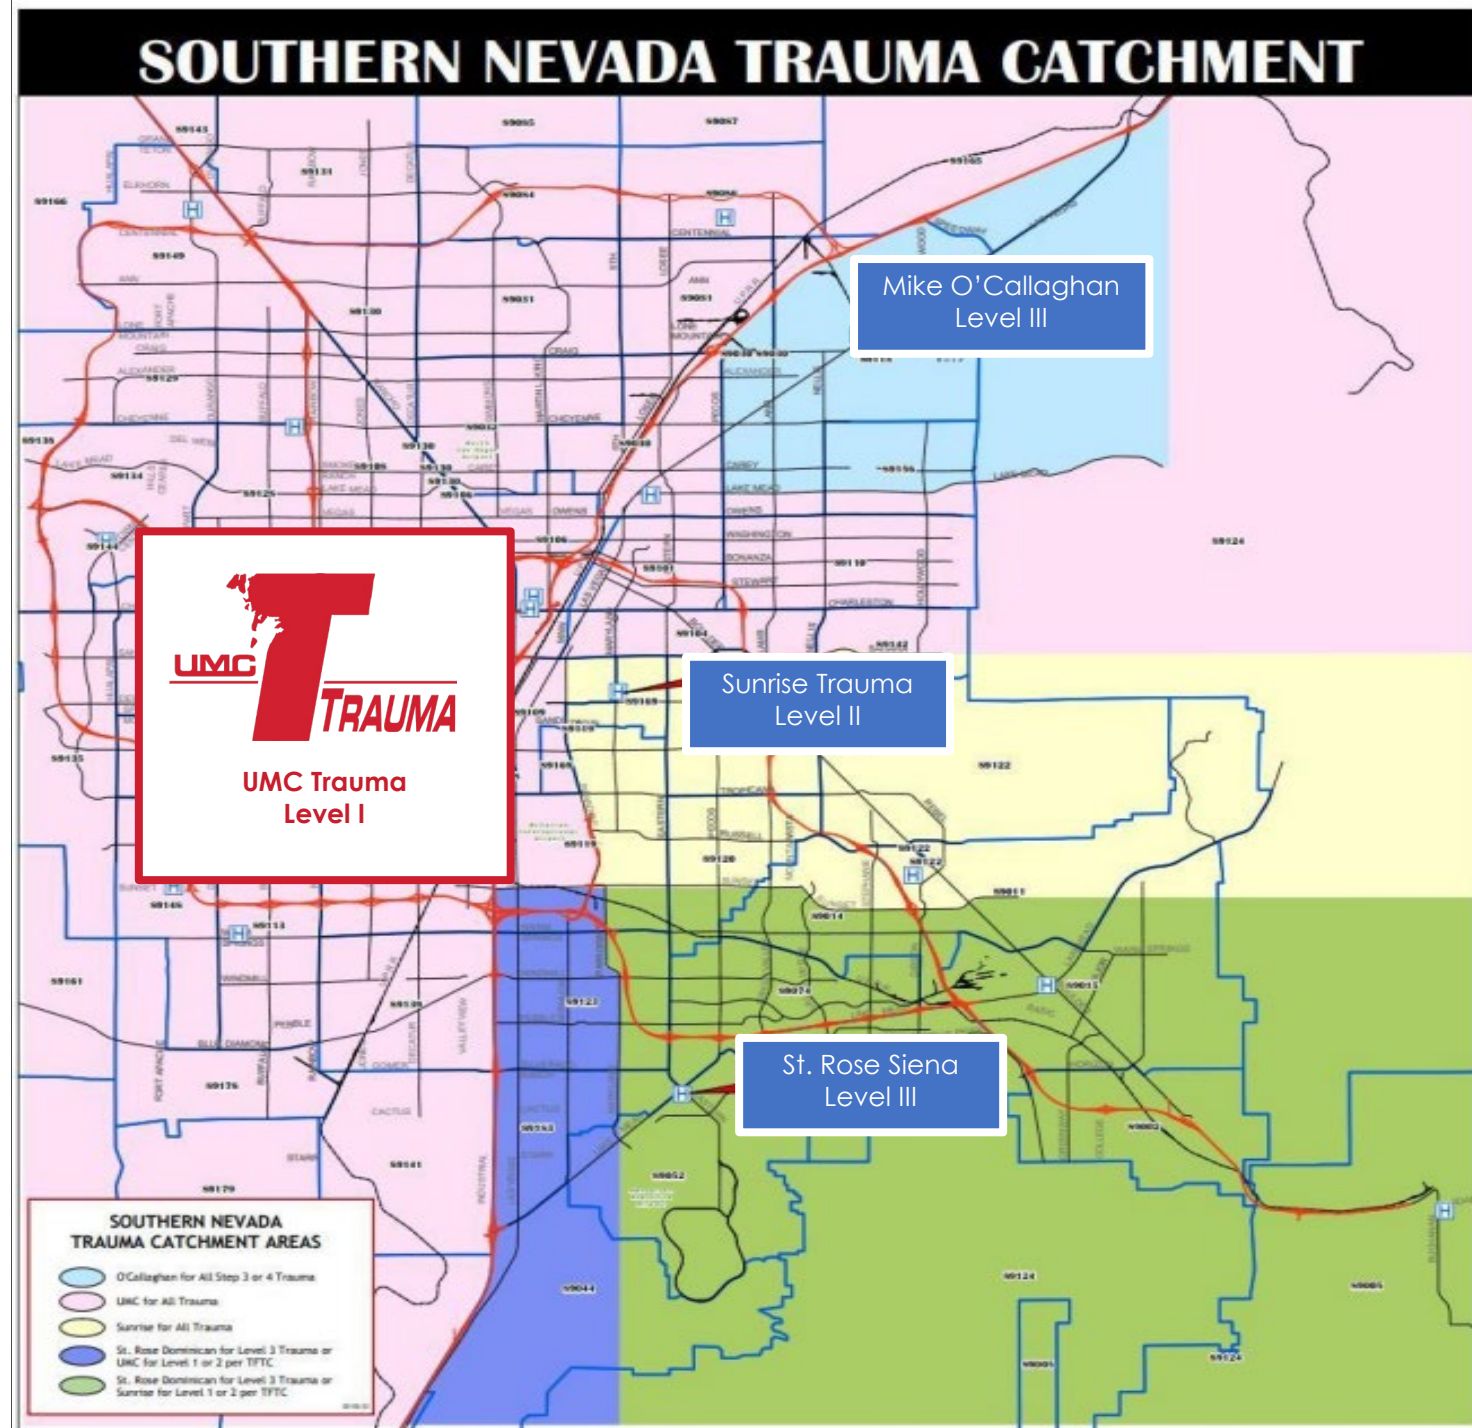

PRESERVE THIS TREASURED RESOURCE

- No need has been identified for an additional Level I Trauma Center.
- Quality care requires repetition and volume.
- Dilution of trauma volume diminishes quality and reduces opportunities to train military and civilian medical professionals.
- Unnecessarily expanding our trauma system would create waste, increase costs and erode expertise.

TRAUMA SYSTEM

- The Southern Nevada Trauma System is functioning well, with capacity to care for even more patients within the four existing trauma centers.
- Median transport time of 16 minutes and 36 seconds.
- There have been NO INCIDENTS in which patients or EMS could not access a trauma center in a timely manner.
- The decision to expand our trauma system must be based on needs assessments and population studies.
- The Regional Trauma Advisory Board voted overwhelmingly in opposition to the application for another Level I Trauma Center.
