

The Clark County School District is required by law and District regulation to provide quarterly reports to the governing body of each city and county and to any Community Education Advisory Board created pursuant to Nevada Revised Statutes (NRS) 388G.760. NRS 388G.630 requires that the reports take place quarterly, and CCSD Regulation 2130 defines the content of the quarterly reports. Information shall include:

1. *A status update related to the compliance with NRS 388G.500-820, aligned administrative regulations codified in the Nevada Administrative Code, and this regulation.*
2. *Student information data aligned with the District's strategic plan, disaggregated by municipality. Student information must be provided to municipality governing boards as reference material for the next practicable scheduled presentation that follows the date the information was reported to the Board of School Trustees in alignment with Board Governance Policies.*
3. *Highlights and celebrations related to specific schools, students, or events within the applicable municipality.*
4. *Available information related to the alignment of current or potential investments made by the municipality in support of District achievement goals.*

Student success is our primary focus.

The Clark County School District has set targets that all Clark County School District schools will be rated three stars or higher on the Nevada School Performance Framework and at least 90% of CCSD students graduate from high school college and career ready.

The District's five-year strategic plan, Focus: 2024, outlines the strategies the District is undertaking in order to meet those student success targets, and defines the measures by which the District will measure progress.

The Clark County School District (CCSD) is divided into three regions designed to provide geographic and feeder alignment while reflecting comparable demographics and supporting equitable representation of student groups and a balance of student, school, and community needs and opportunities. Superintendents from each region provide the quarterly reports in alignment with statutes and District policies.

This document provides the student information data aligned to the strategic plan required in CCSD policy. *Focus: 2024*, the Clark County School District's Five-Year Strategic Plan, outlines specific measures related to student achievement, attendance, behavior, and safety that will be included in these reports.

Information is disaggregated to reflect information for students who attend schools in the City of Boulder City, City of Henderson, City of Las Vegas, City of North Las Vegas, City of Mesquite, and Unincorporated Clark County. Data attributed to a city or county reflects students who attend a school that is located in the city or county; student residential addresses are not considered. Data is suppressed in order to protect student data privacy for values of 10 or fewer results in any data category.

Topic Schedule

Specific topics will be included in a report developed at the end of each quarter that the information is presented to the CCSD Board of Trustees.

Quarter	CCSD Board of Trustees Presentation Dates	Anticipated Topics to be Included	Anticipated Release Date
Quarter 1	January - March	<ul style="list-style-type: none"> • Graduation rate • Gaps in graduation rate • Advanced coursework diversity and achievement (middle school) • Chronic absenteeism • Student behavior 	April 1
Quarter 2	April - June	<ul style="list-style-type: none"> • Student safety • Chronic absenteeism • Student behavior 	July 1
Quarter 3	July - September	<ul style="list-style-type: none"> • Chronic absenteeism • Student behavior 	October 1
Quarter 4	October - December	<ul style="list-style-type: none"> • Proficiency and proficiency gaps in English language arts, grade 3 reading, mathematics, and science • Nevada School Performance Framework • Advanced coursework diversity and achievement (high school) • CTE enrollment and diversity • High-skill and high-demand programs of study • International Baccalaureate • Magnet school enrollment • Chronic absenteeism • Student behavior 	January 1

Spotlight on School and Community Violence

We know from multiple sources and a robust body of research that student exposure to violence in the home or community can impact student attendance¹, behavior², and academic performance³. Youth who are victims of violence are at a greater risk to become a perpetrator of violence themselves⁴, and are more likely to have poorer attendance, increased physical and mental health risks, and increased risky behaviors (including bringing a weapon to school) compared to peers without such exposure⁵. Black or African American children and young adults are at higher risk for the “most physically harmful forms of violence⁶,” which contributes to their disproportionate identification as the perpetrators of behaviors resulting in suspensions or expulsions from school.

The U.S. Department of Justice calls for a shared responsibility for the prevention of school violence between schools, students, families, the community, and law enforcement⁷. The Clark County School District is investing in comprehensive preventive, restorative, and responsive measures related to behaviors and school violence. Communities are called upon to reduce community violence and engage in community-facing preventive, restorative, and responsive activities for our youth and families. Research-based prevention strategies for communities to consider are recommended by the CDC⁸:

- Increasing economic opportunities, reducing poverty and transiency, supporting family connection, increasing community participation, and developing social organized neighborhoods.⁹
- Connecting youth to caring adults and activities (mentoring and after-school programs)
- Creating Protective Community Environments
 - Modifying the physical and social environment (Repairing abandoned building and vacant lots, cleaning and maintaining neighborhood green spaces, upkeep of neighborhood housing)
 - Reducing exposure to community-level risks (reducing crime, alcohol policies)
 - Increasing street outreach Changing and community norms (Safe streets programs)
- Intervening to Lessen Harms and Prevent Future Risk (Mental health resources and treatment opportunities)

Clark County School District

Student Safety - Grades 4-5

Student safety is measured by positive responses on four Districtwide Survey items:

I sometimes stay home because I don't feel safe at this school.

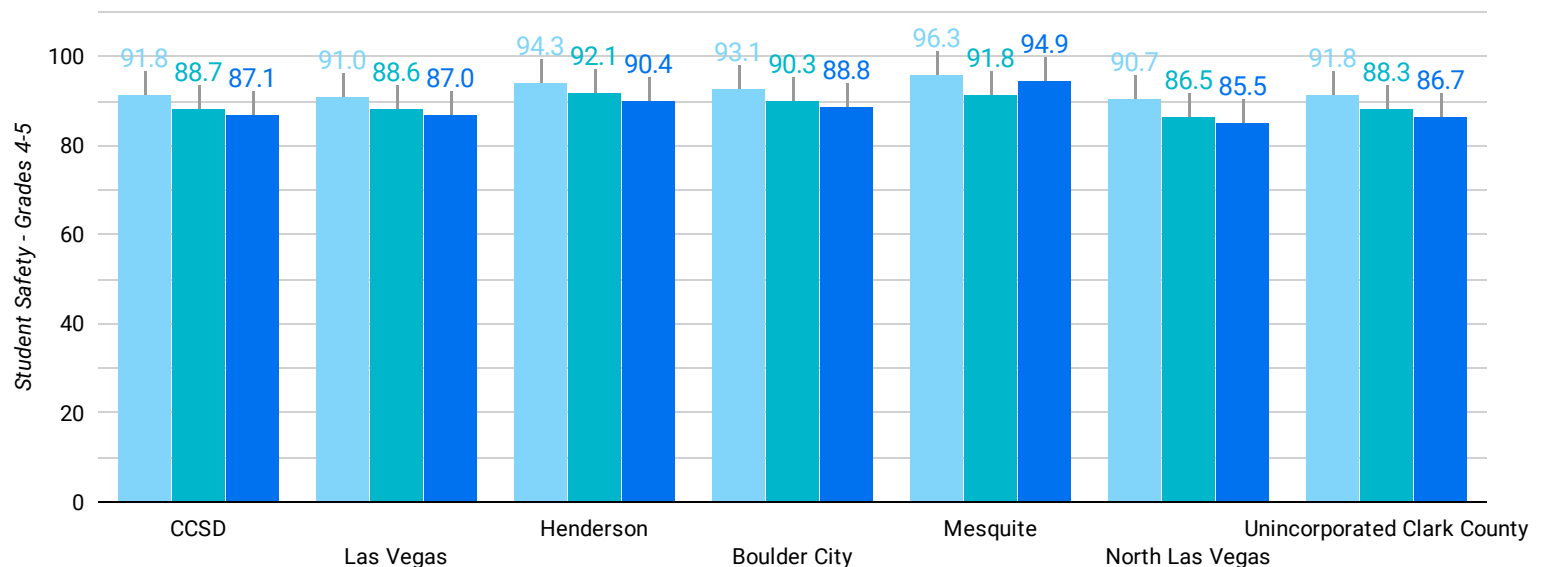

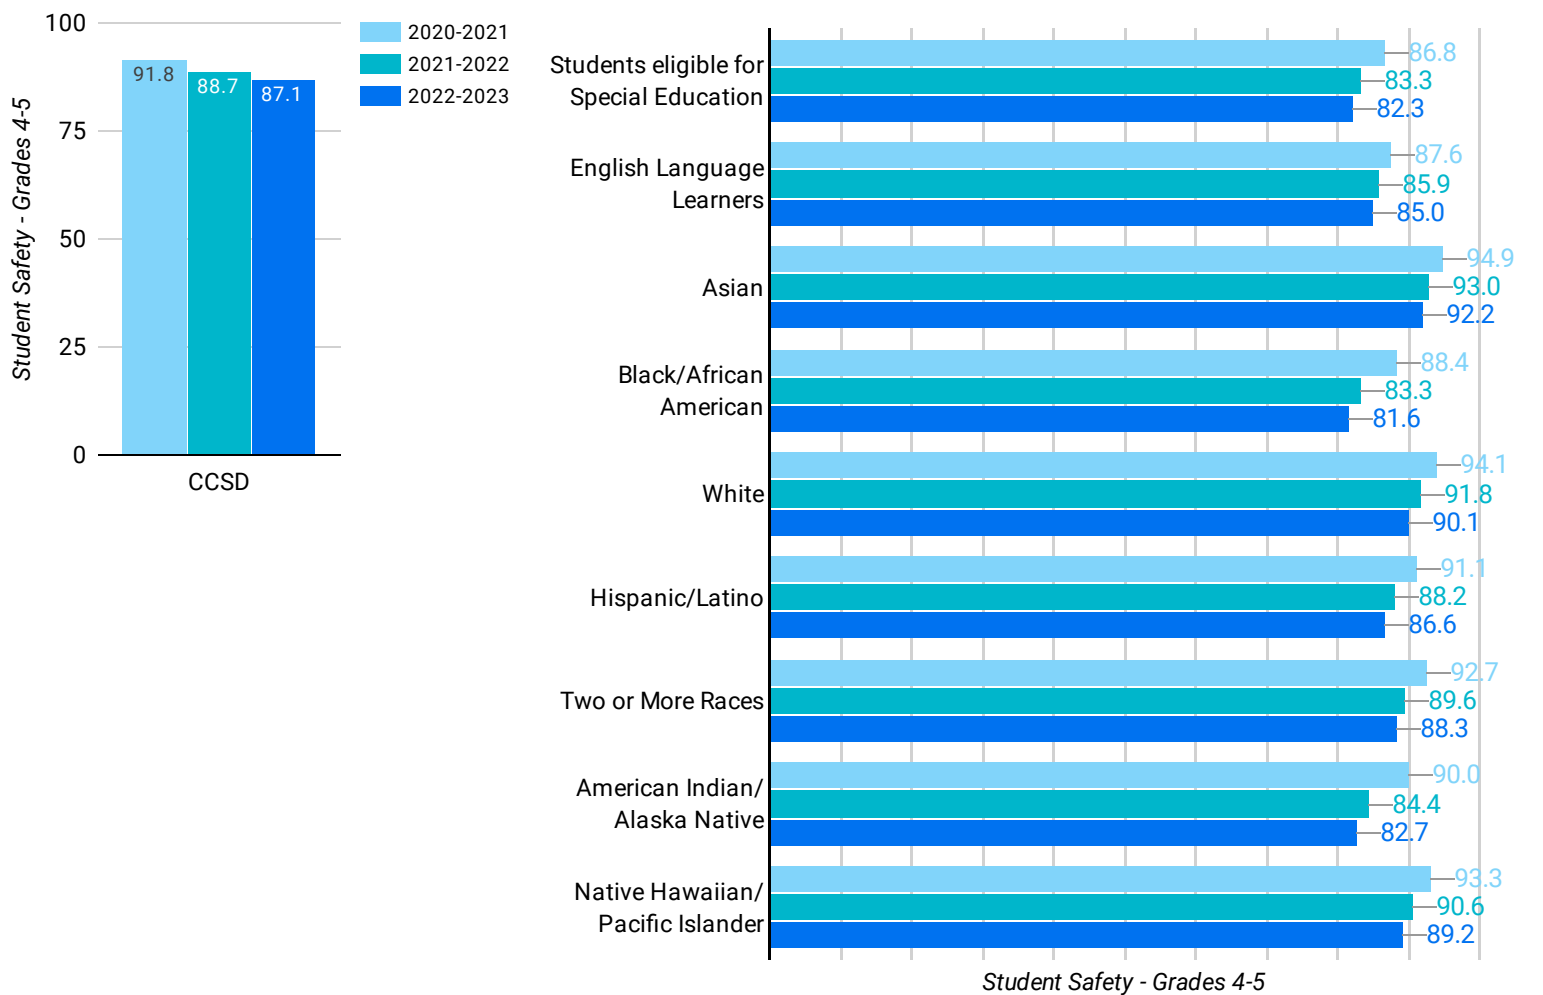

Students feel safe in this school.

This school has safety procedures that work.

This school is safe.

The District reports the percentage of a combination of negative responses to the first and positive responses to the remaining items annually.

Note: 2020-2021 survey was completed during full-time distance education.

Clark County School District

Student Safety - Grades 6-8

Student safety is measured by positive responses on four Districtwide Survey items:

I sometimes stay home because I don't feel safe at this school.

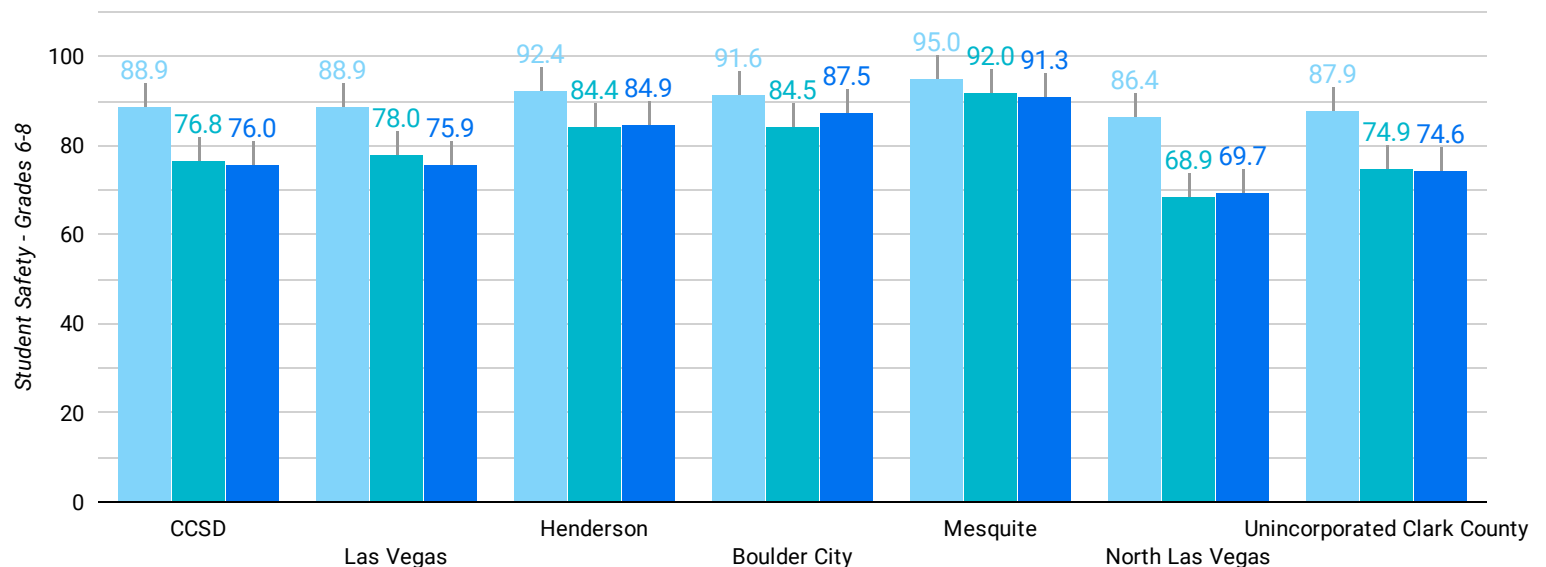

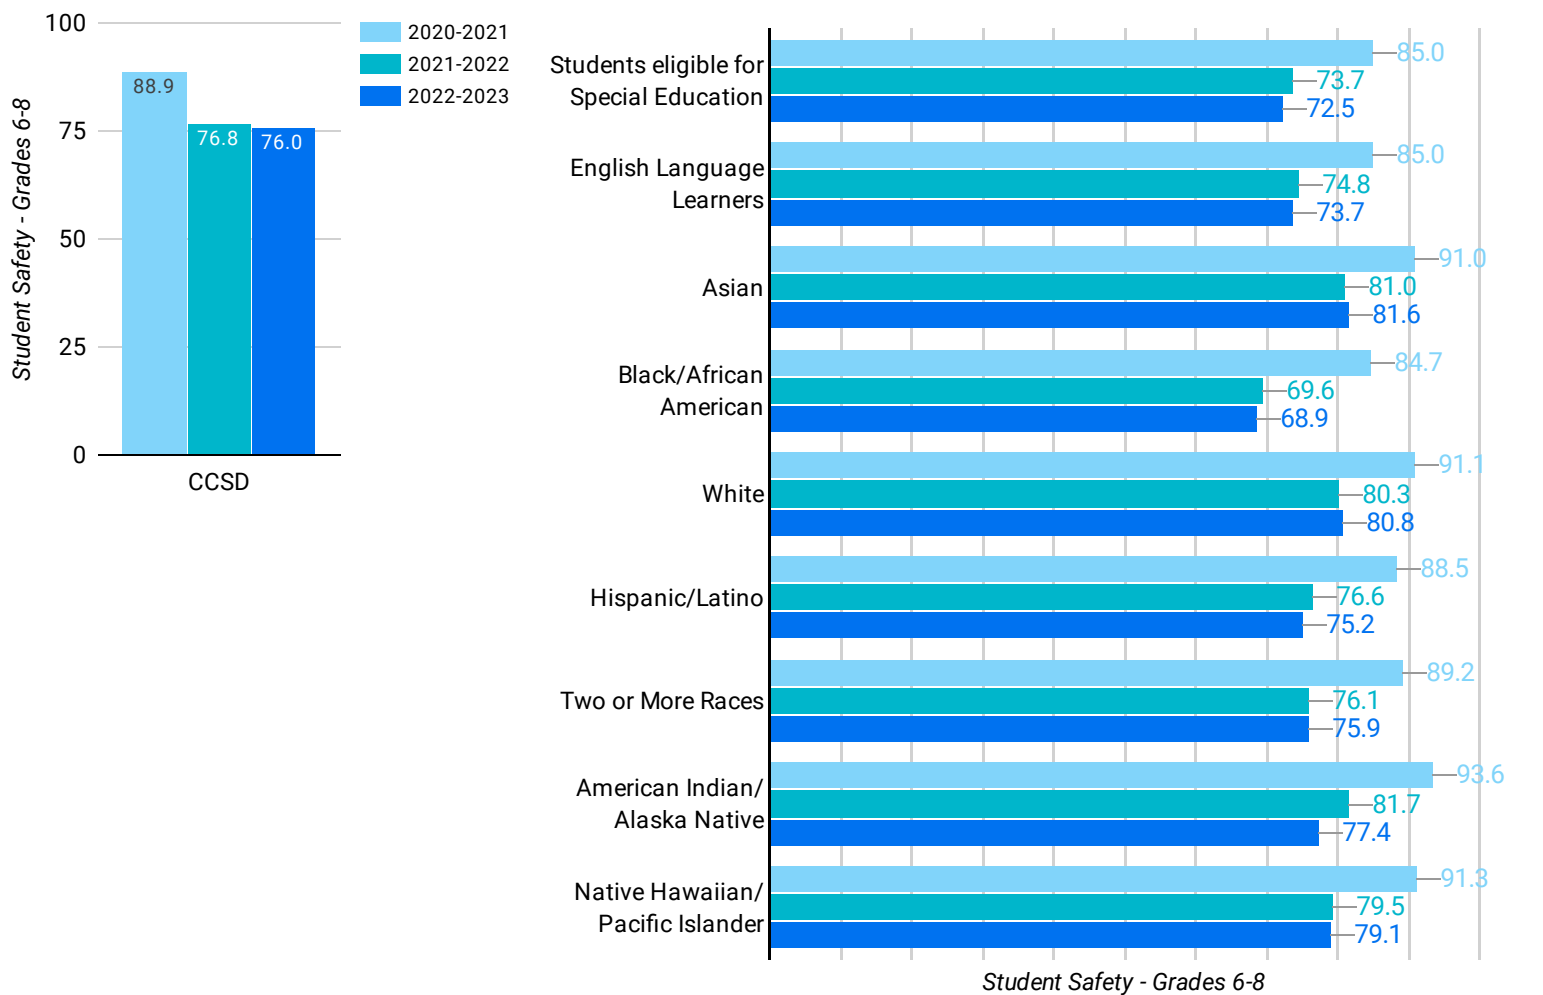

Students feel safe in this school.

This school has safety procedures that work.

This school is safe.

The District reports the percentage of a combination of negative responses to the first and positive responses to the remaining items annually.

Note: 2020-2021 survey was completed during full-time distance education.

Clark County School District

Student Safety - Grades 9-12

Student safety is measured by positive responses on four Districtwide Survey items:

I sometimes stay home because I don't feel safe at this school.

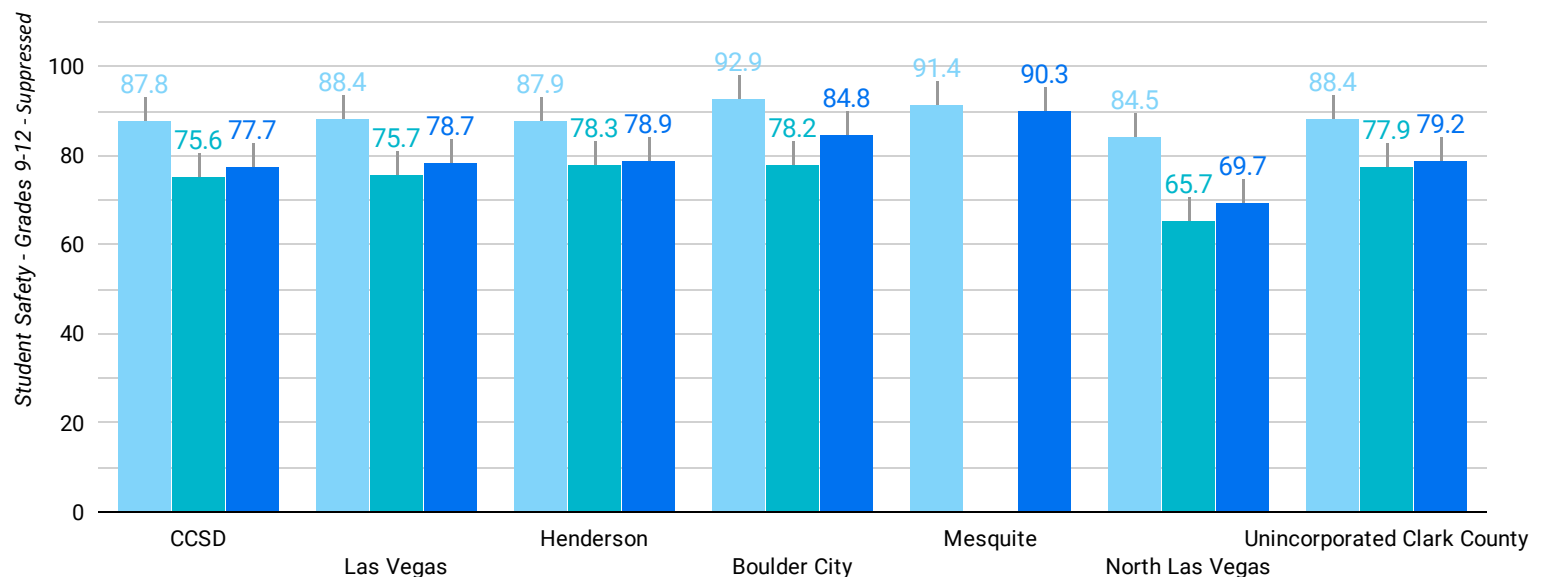

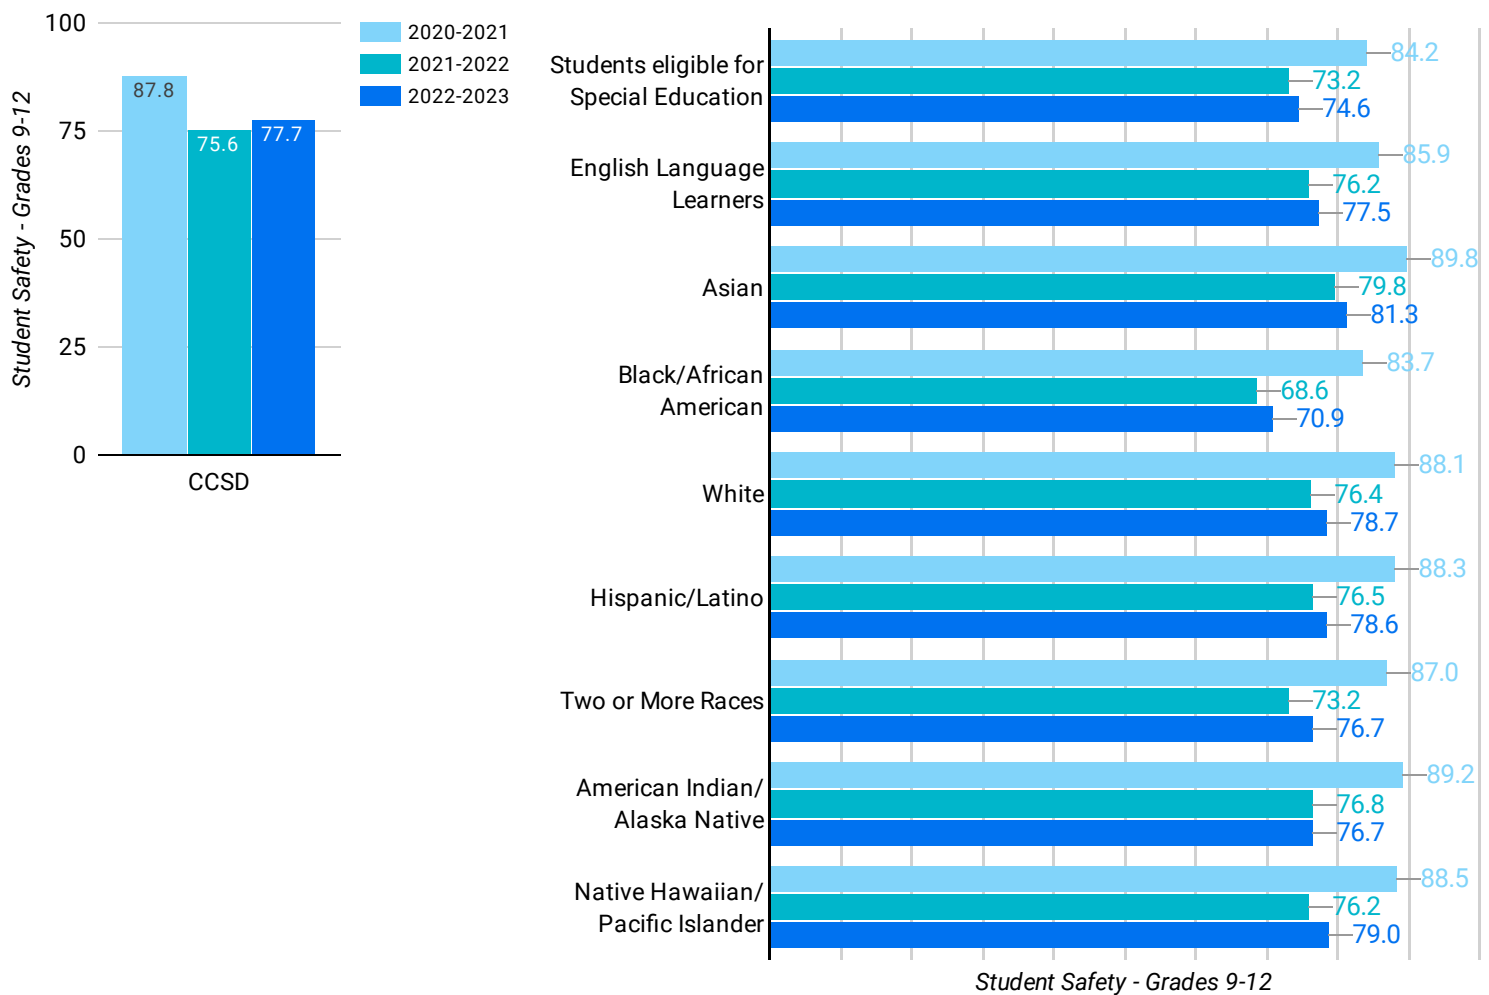

Students feel safe in this school.

This school has safety procedures that work.

This school is safe.

The District reports the percentage of a combination of negative responses to the first and positive responses to the remaining items annually.

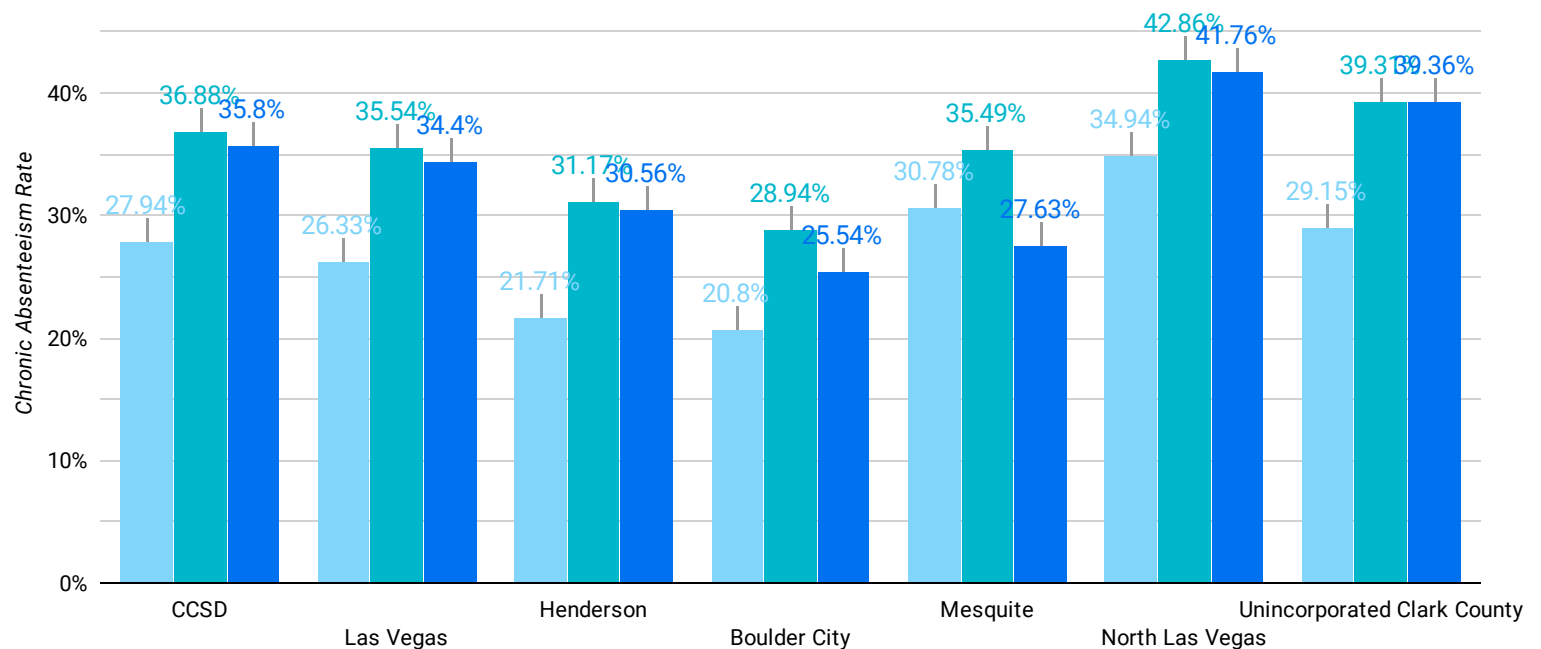

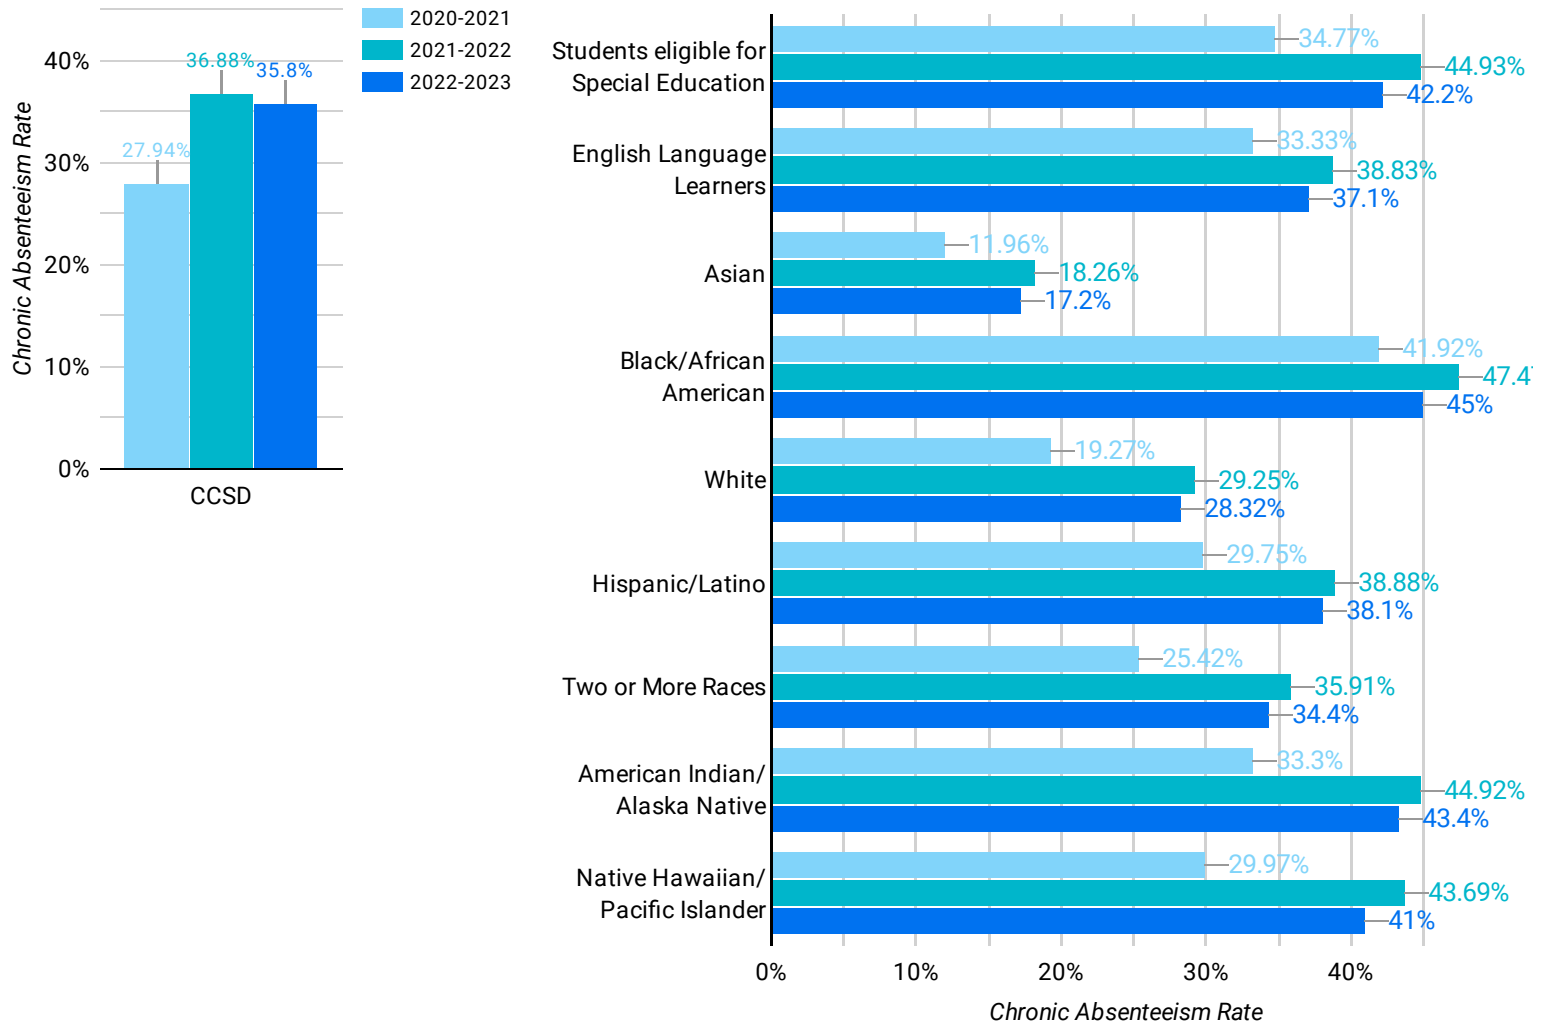

Note: 2020-2021 survey was completed during full-time distance education.

Clark County School District

Chronic Absenteeism

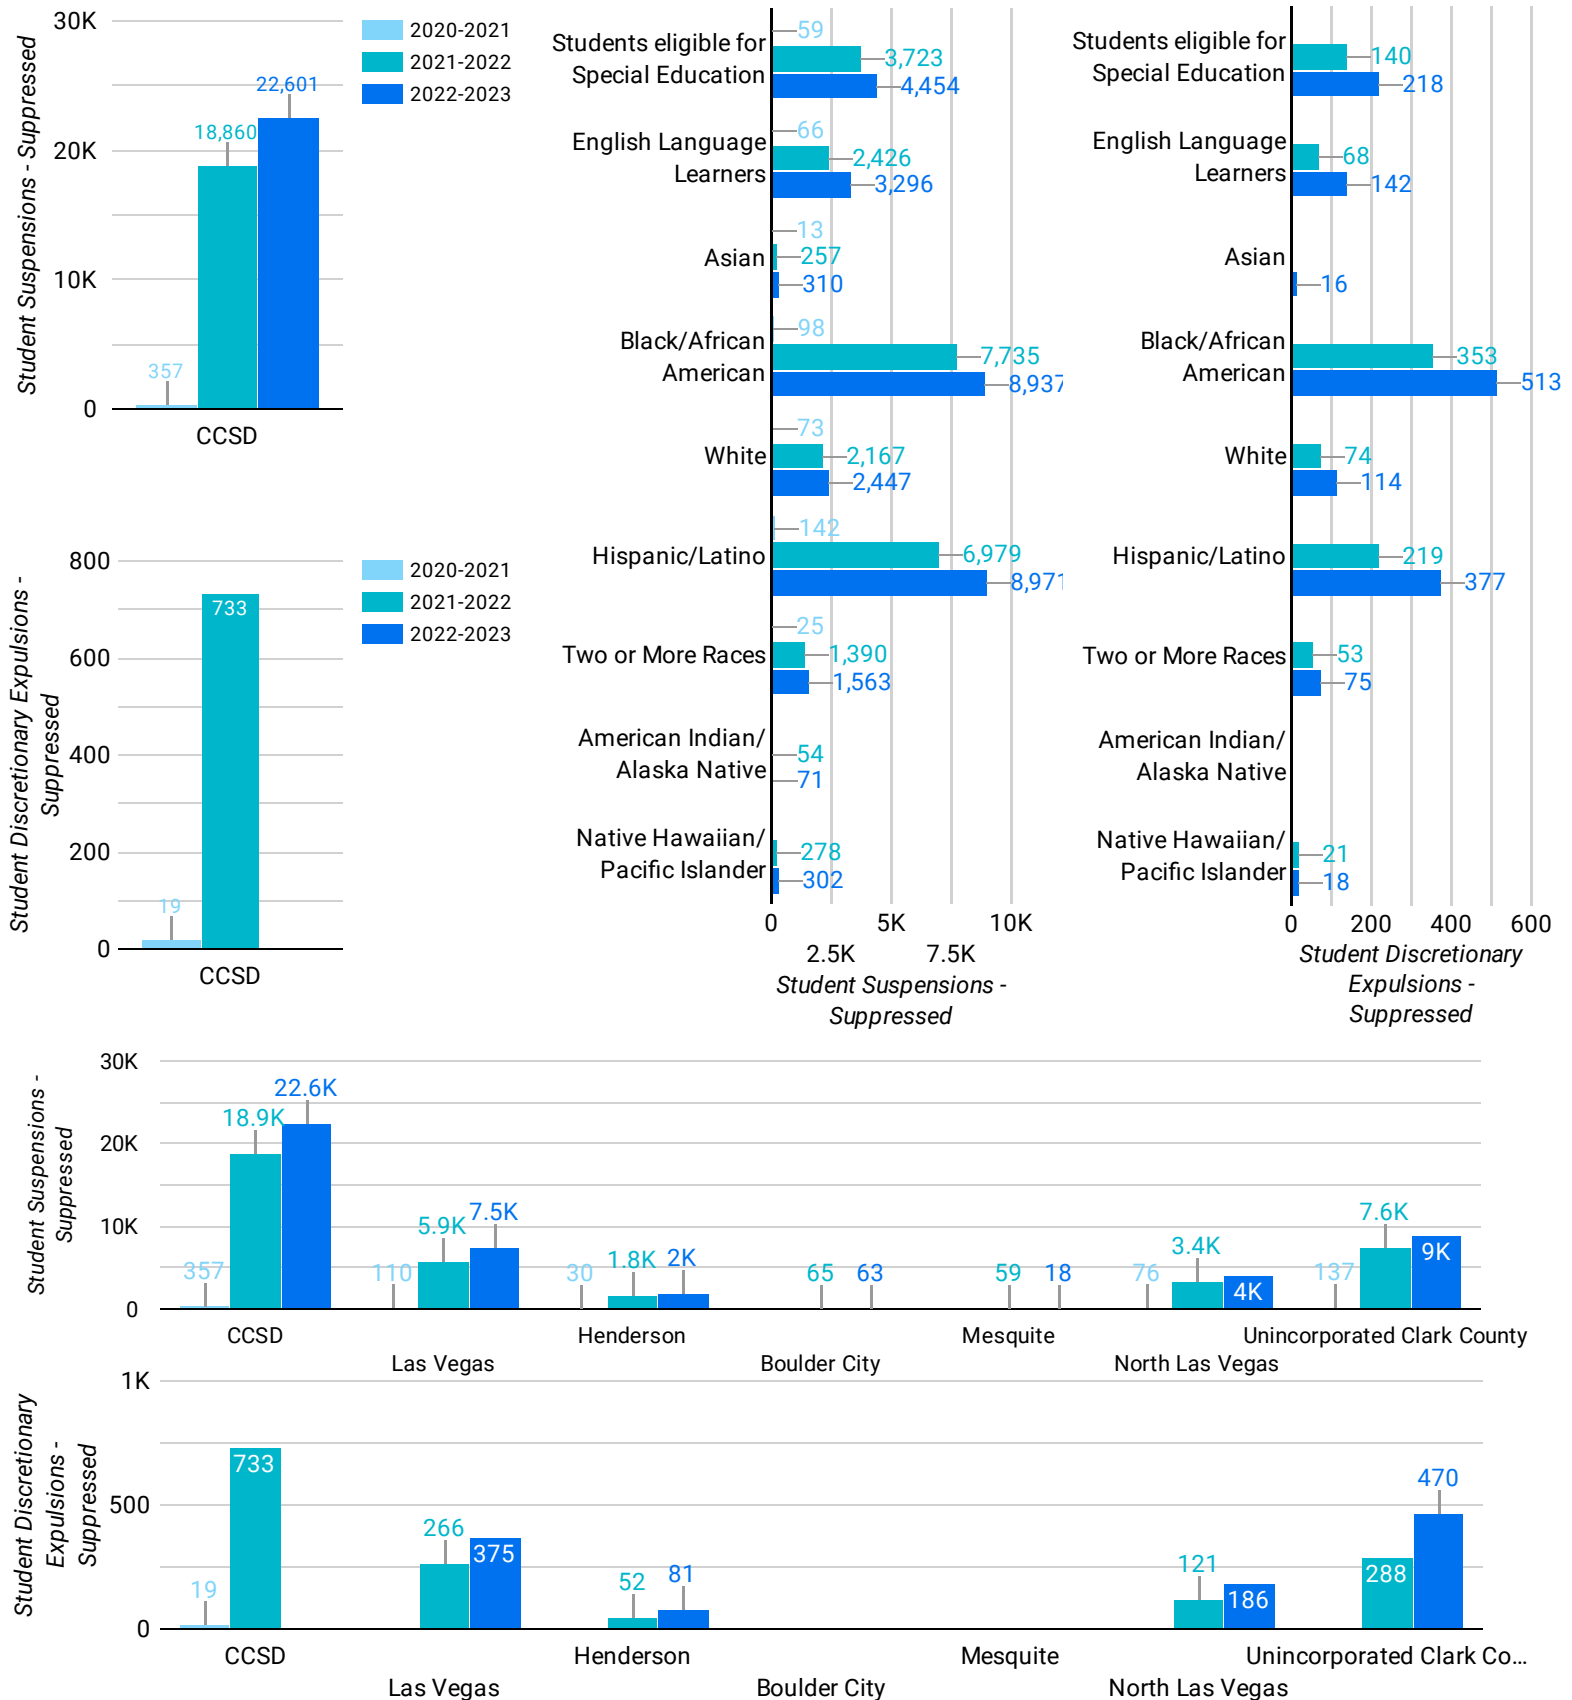

Chronic absenteeism is a school quality measure on the Nevada School Performance Framework that captures the total percentage of students who are absent for ten percent or more of their enrolled days. The District reports chronic absenteeism quarterly. This report represents data through the end of the third quarter of each school year.

Clark County School District

Student Behavior

The District strives to treat all students fairly and provide them with early interventions that will ultimately reduce time spent outside of the classroom. If we identify root causes and systematize appropriate restorative practices, students experience equitable application of disciplinary consequences, feel safe, and contribute to a positive school climate, then student discipline figures are less disproportionate and decrease overall. The District reports student suspensions and discretionary expulsion referrals, and the disproportionate application of suspensions and discretionary expulsion referrals, quarterly. This report represents data through the end of the third quarter of each school year.

Boulder City

Student Safety

Student safety is measured by positive responses on four Districtwide Survey items:

I sometimes stay home because I don't feel safe at this school.

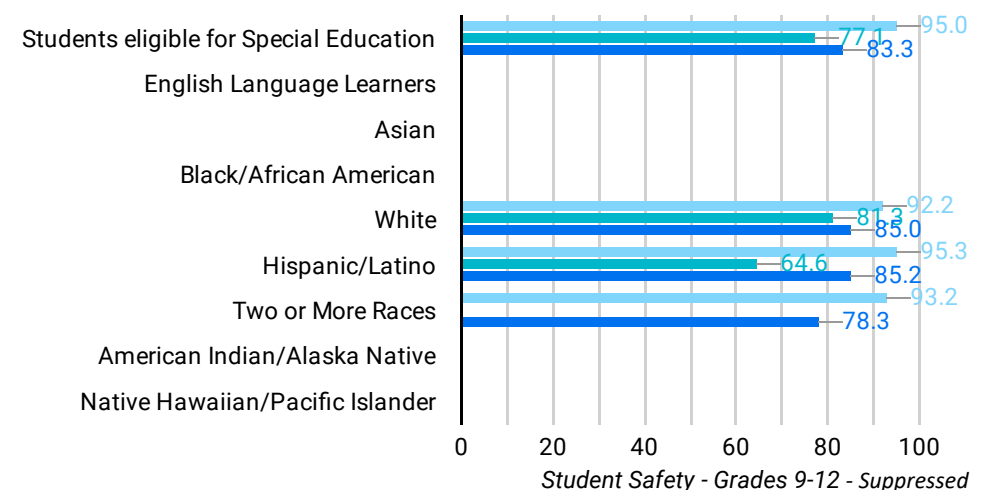

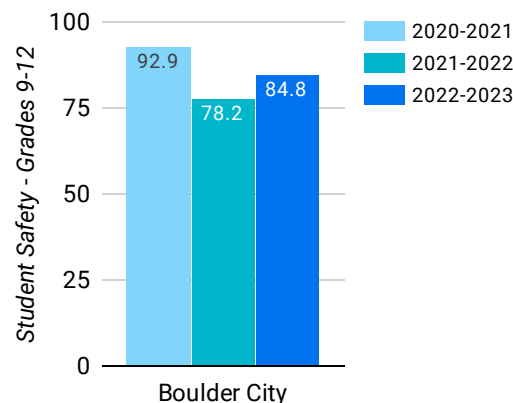

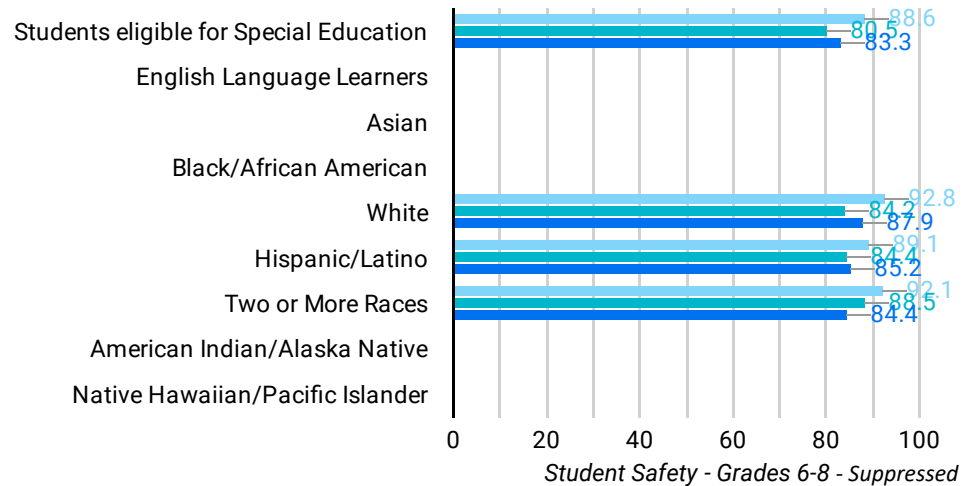

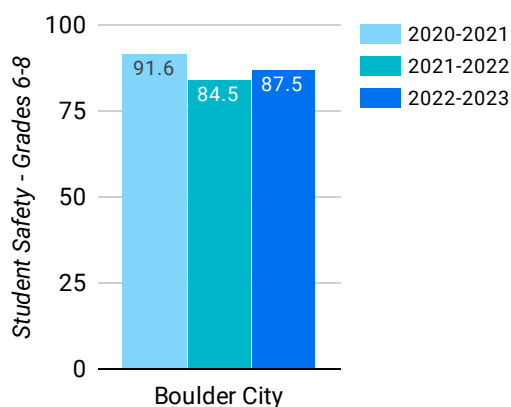

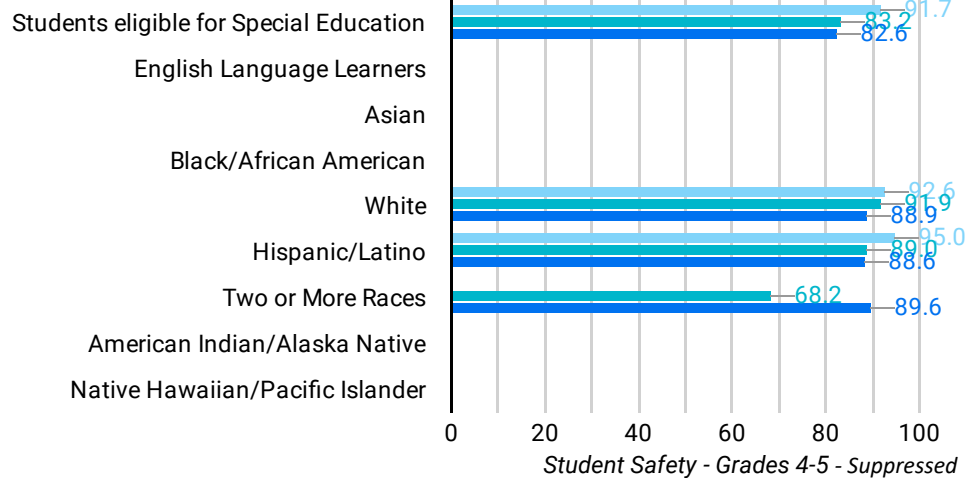

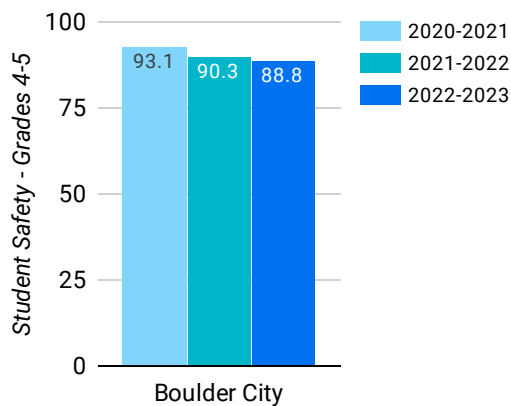

Students feel safe in this school.

This school has safety procedures that work.

This school is safe.

The District reports the percentage of a combination of negative responses to the first and positive responses to the remaining items annually.

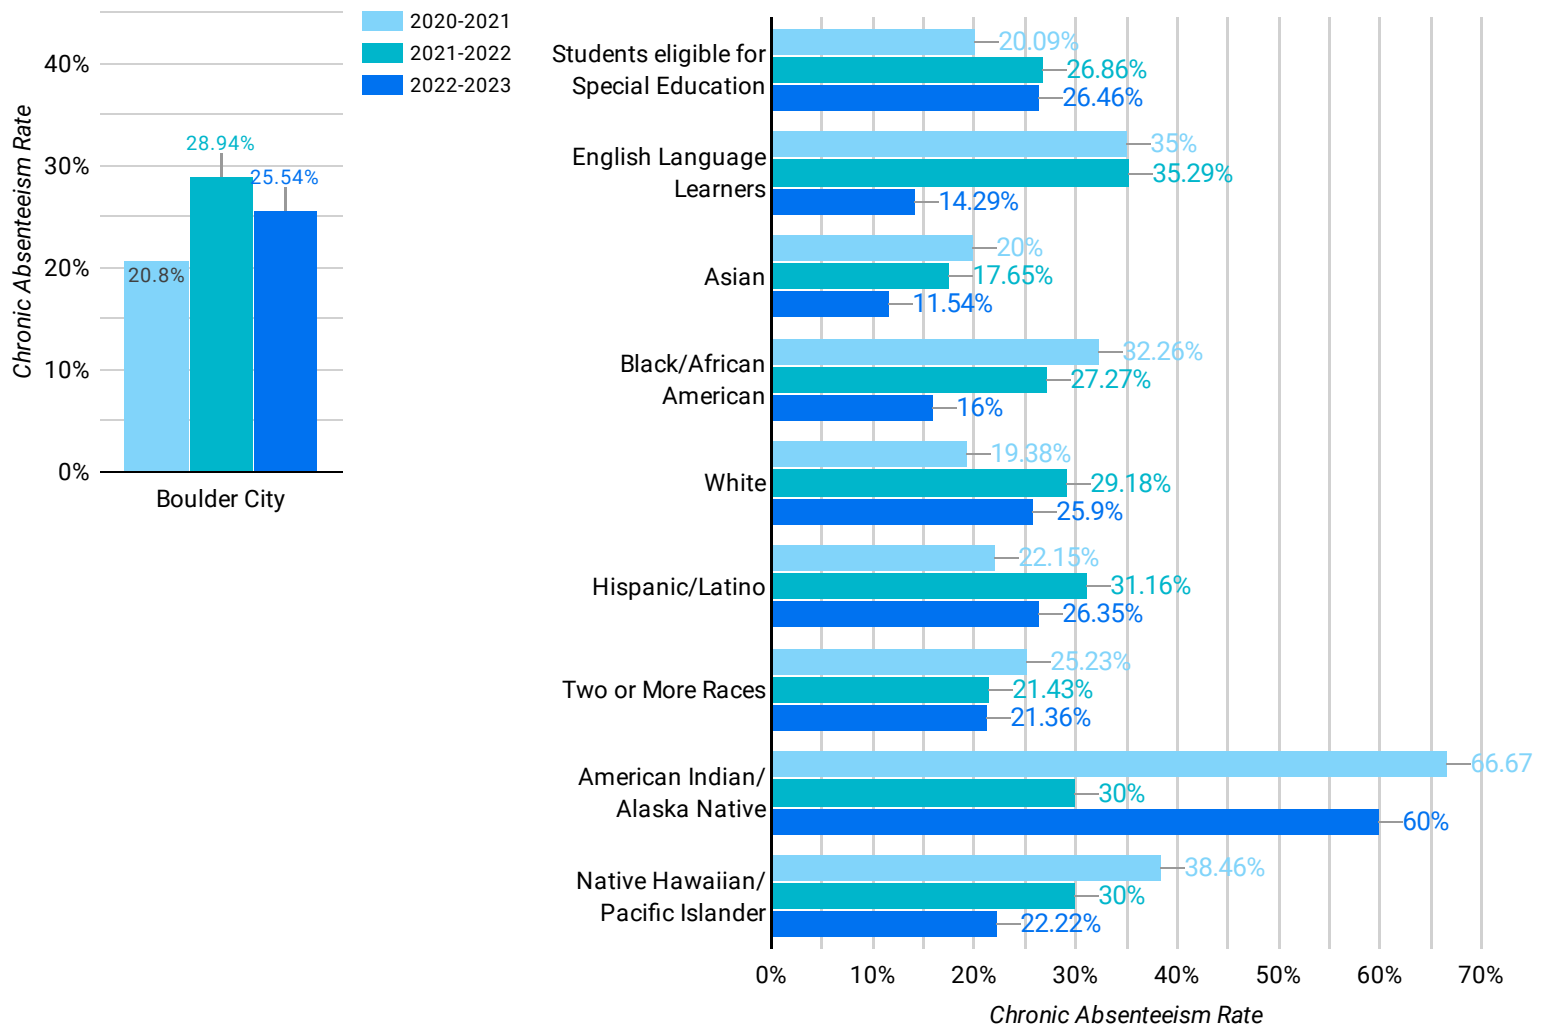

Note: 2020-2021 survey was completed during full-time distance education.

Boulder City

Chronic Absenteeism

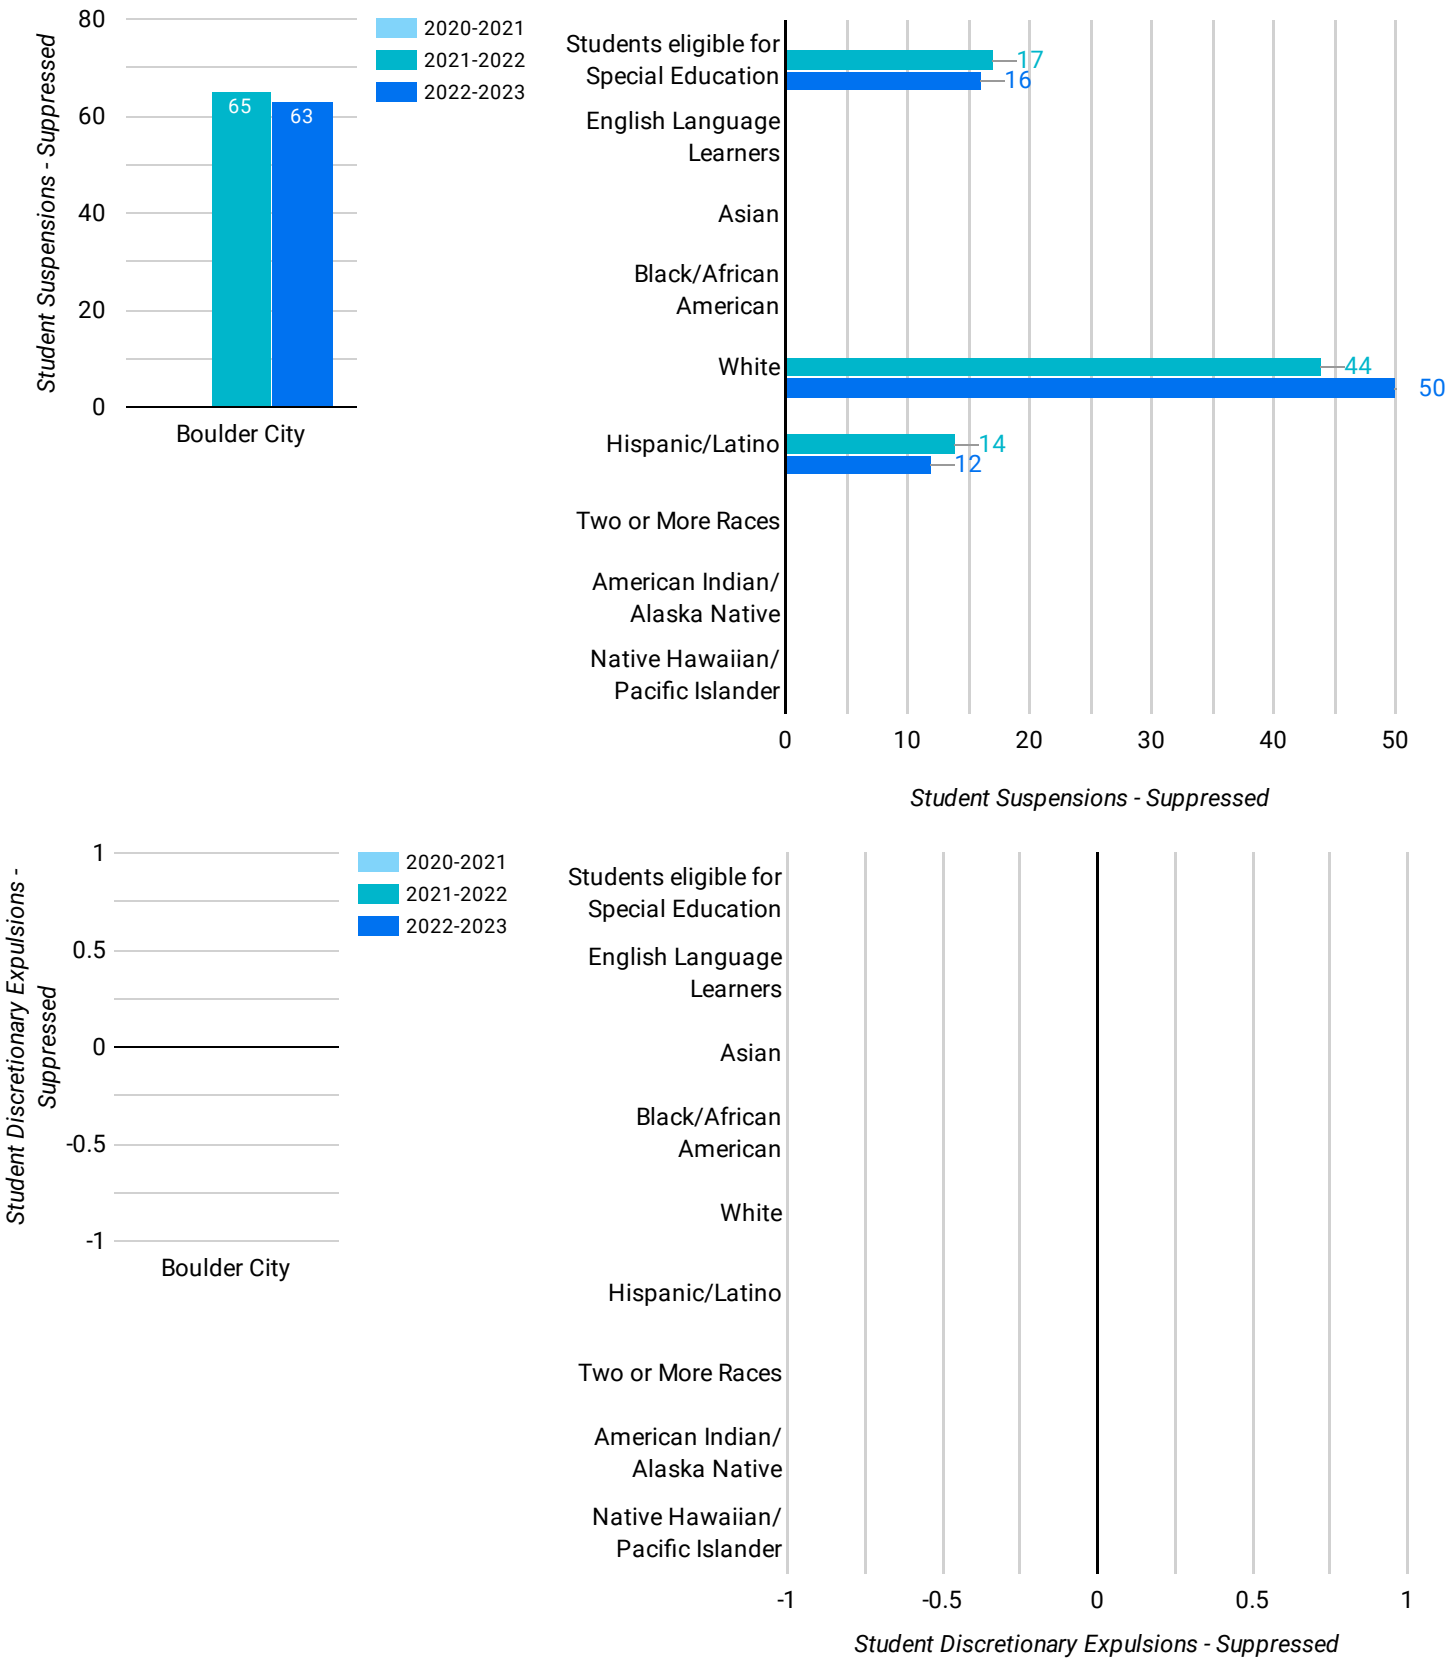

Chronic absenteeism is a school quality measure on the Nevada School Performance Framework that captures the total percentage of students who are absent for ten percent or more of their enrolled days. The District reports chronic absenteeism quarterly. This report represents data through the end of the third quarter of each school year.

Boulder City

Student Behavior

The District strives to treat all students fairly and provide them with early interventions that will ultimately reduce time spent outside of the classroom. If we identify root causes and systematize appropriate restorative practices, students experience equitable application of disciplinary consequences, feel safe, and contribute to a positive school climate, then student discipline figures are less disproportionate and decrease overall. The District reports student suspensions and discretionary expulsion referrals, and the disproportionate application of suspensions and discretionary expulsion referrals, quarterly. This report represents data through the end of the third quarter of each school year.

If an axis label indicates that data is suppressed, that means any values lower than 10 are not shown in that chart.

Henderson

Student Safety

Student safety is measured by positive responses on four Districtwide Survey items:

I sometimes stay home because I don't feel safe at this school.

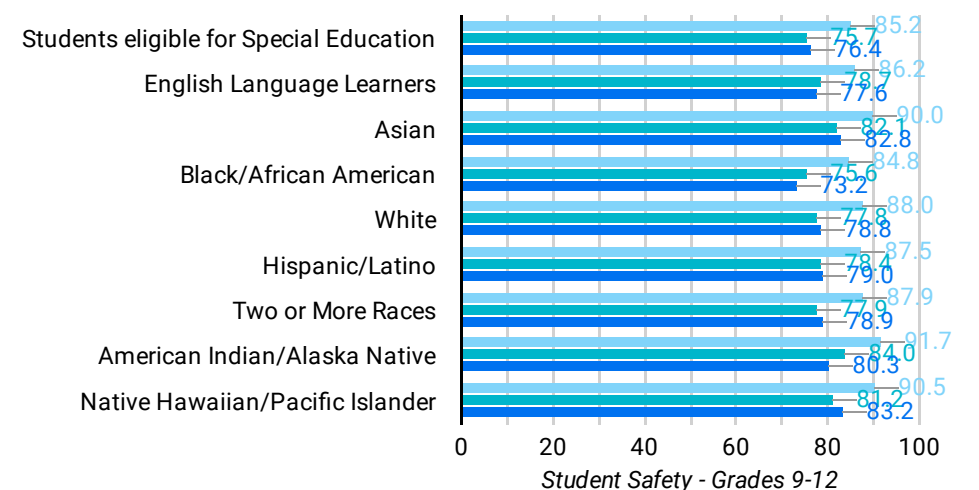

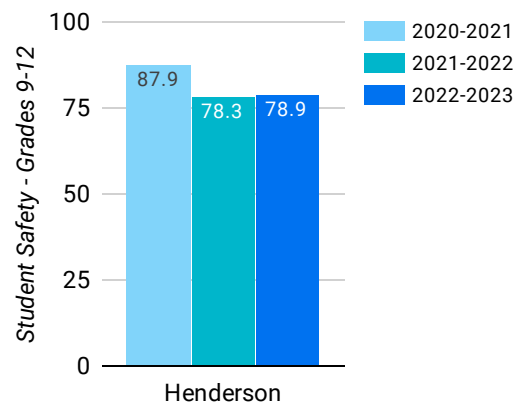

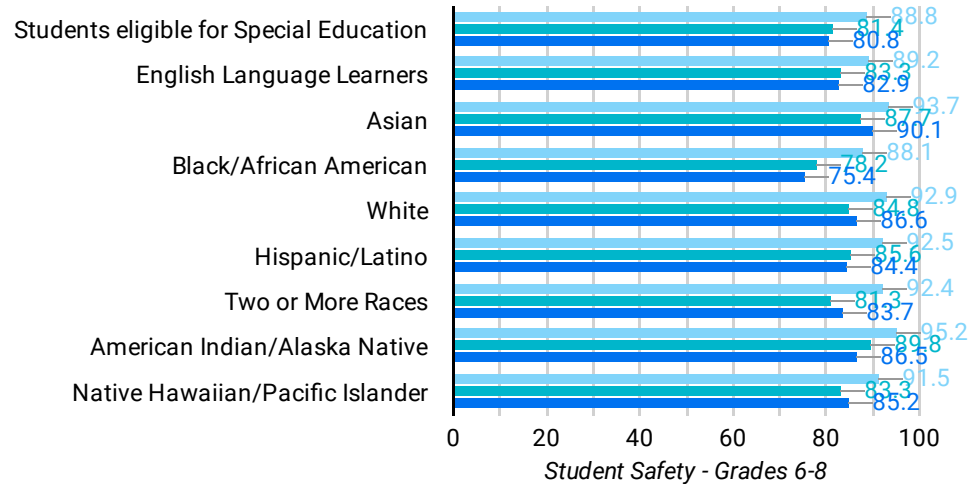

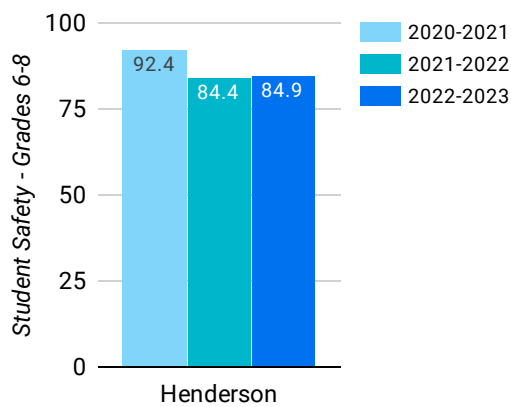

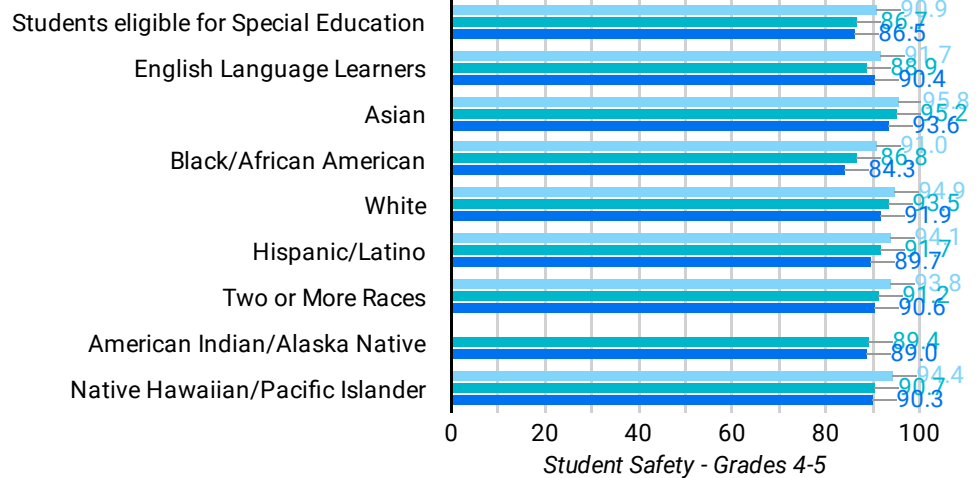

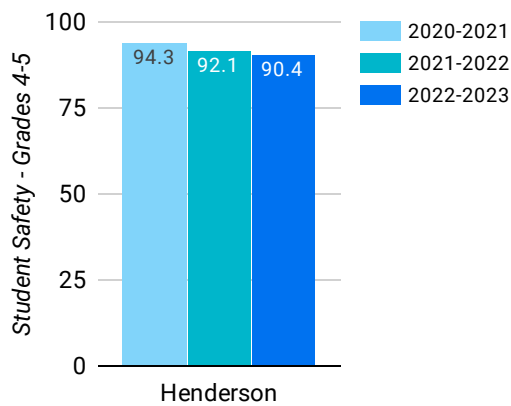

Students feel safe in this school.

This school has safety procedures that work.

This school is safe.

The District reports the percentage of a combination of negative responses to the first and positive responses to the remaining items annually.

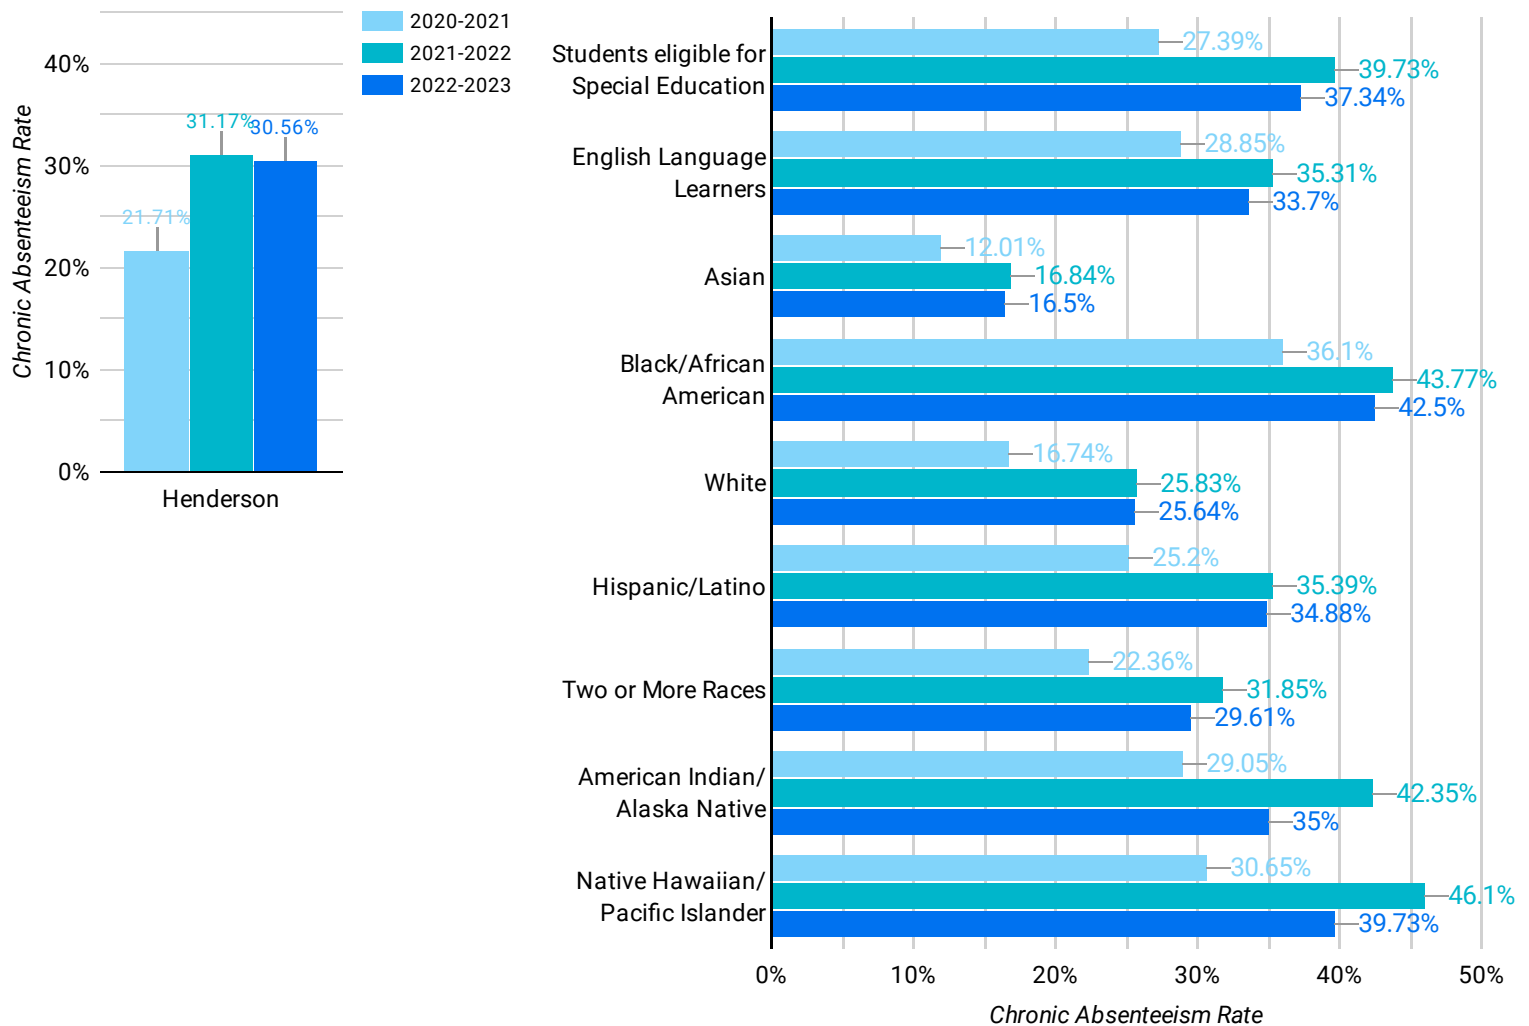

Note: 2020-2021 survey was completed during full-time distance education.

Henderson

Chronic Absenteeism

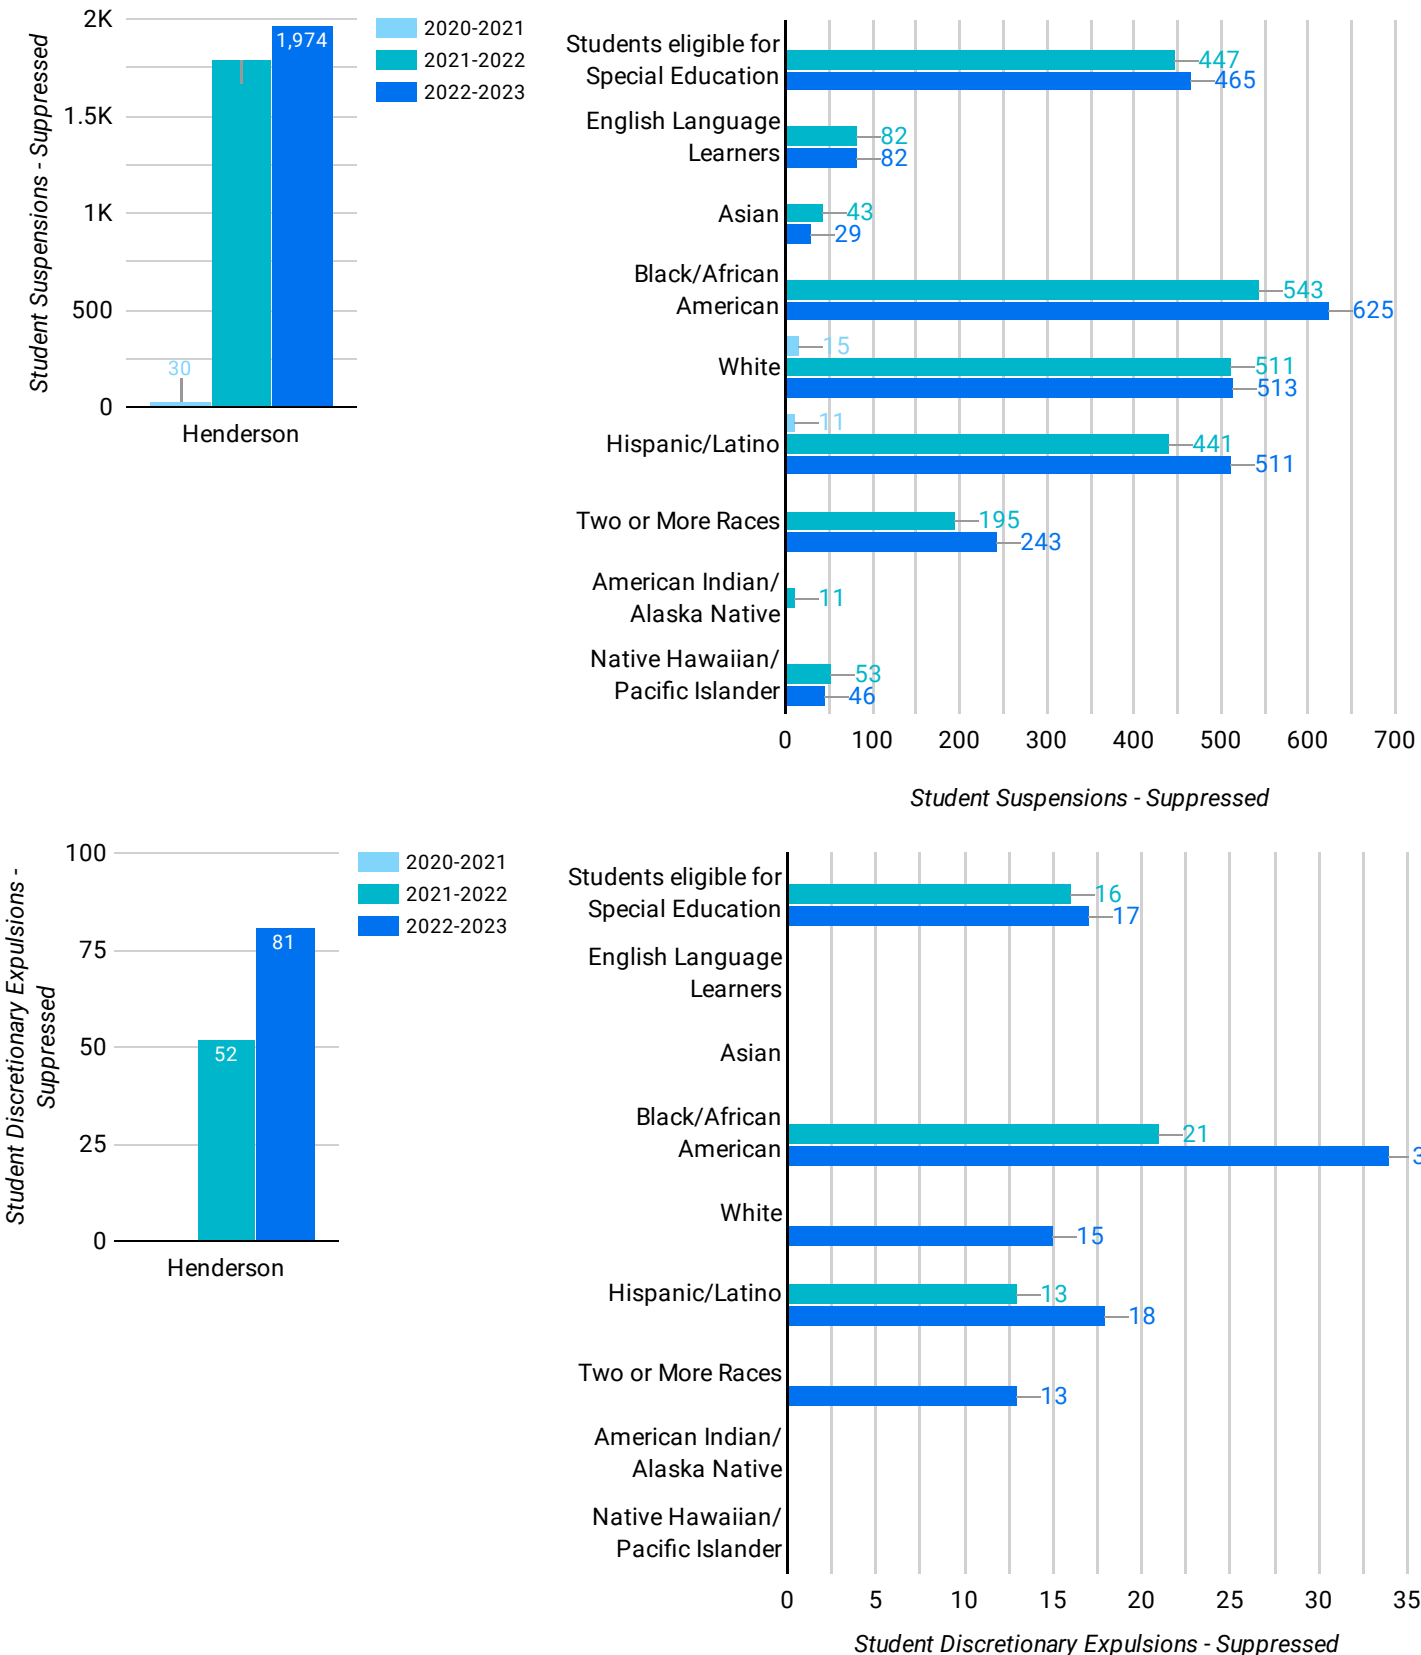

Chronic absenteeism is a school quality measure on the Nevada School Performance Framework that captures the total percentage of students who are absent for ten percent or more of their enrolled days. The District reports chronic absenteeism quarterly. This report represents data through the end of the third quarter of each school year.

Henderson

Student Behavior

The District strives to treat all students fairly and provide them with early interventions that will ultimately reduce time spent outside of the classroom. If we identify root causes and systematize appropriate restorative practices, students experience equitable application of disciplinary consequences, feel safe, and contribute to a positive school climate, then student discipline figures are less disproportionate and decrease overall. The District reports student suspensions and discretionary expulsion referrals, and the disproportionate application of suspensions and discretionary expulsion referrals, quarterly. This report represents data through the end of the third quarter of each school year.

Las Vegas

Student Safety

Student safety is measured by positive responses on four Districtwide Survey items:

I sometimes stay home because I don't feel safe at this school.

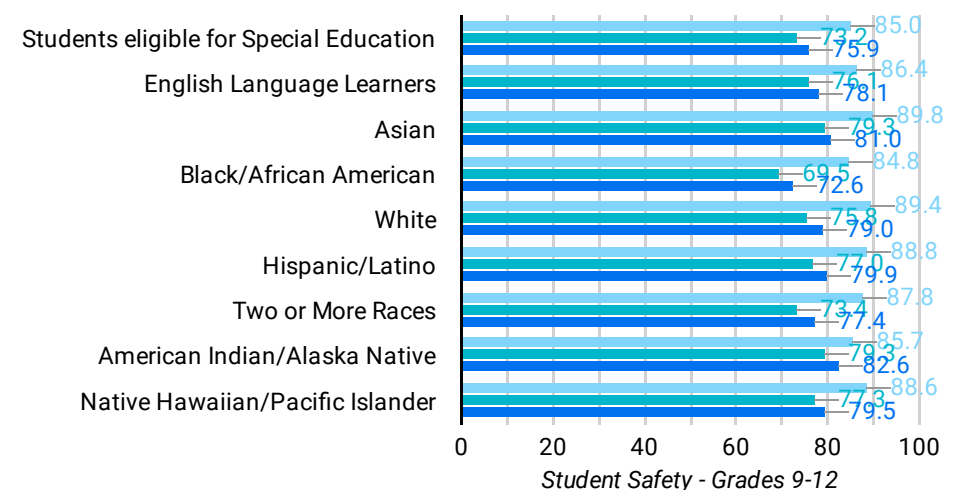

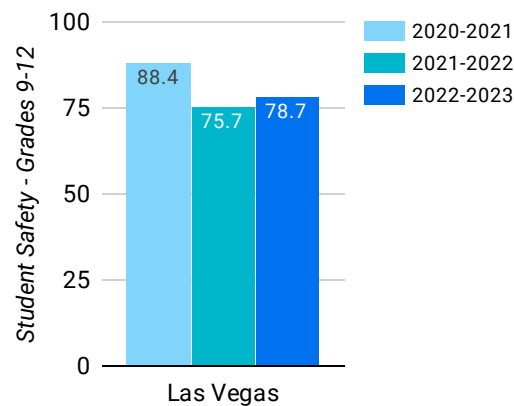

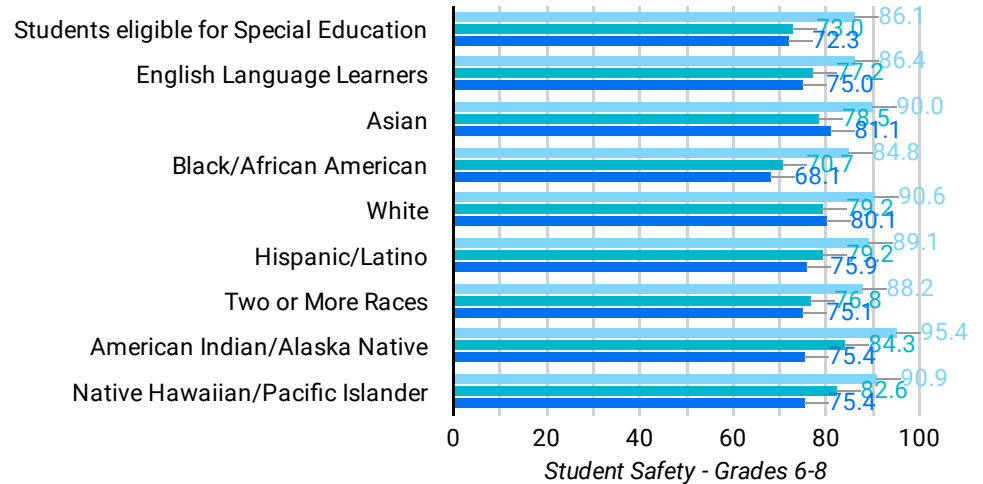

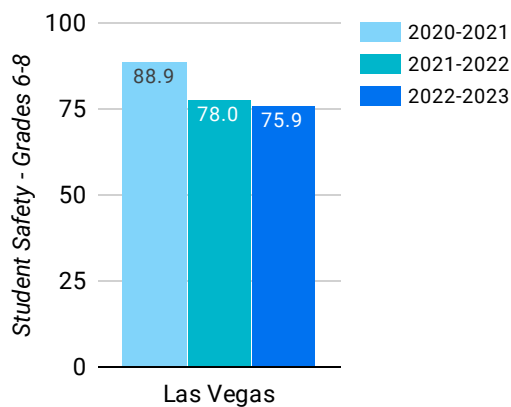

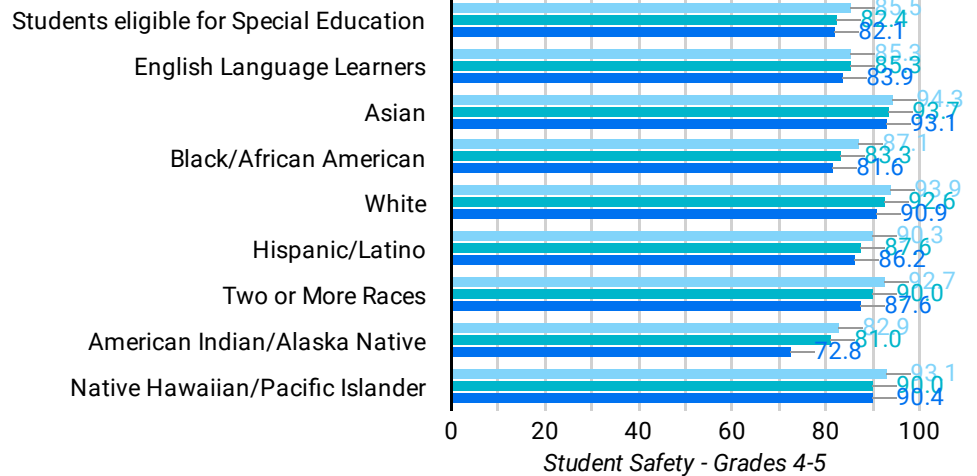

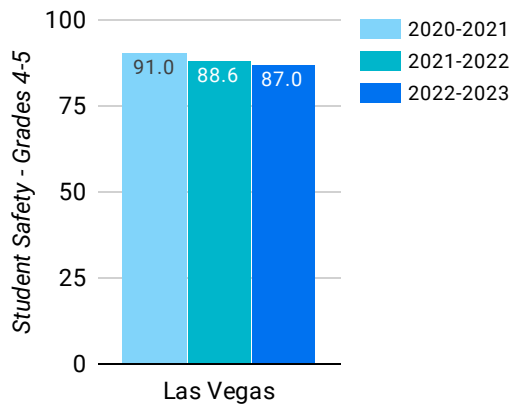

Students feel safe in this school.

This school has safety procedures that work.

This school is safe.

The District reports the percentage of a combination of negative responses to the first and positive responses to the remaining items annually.

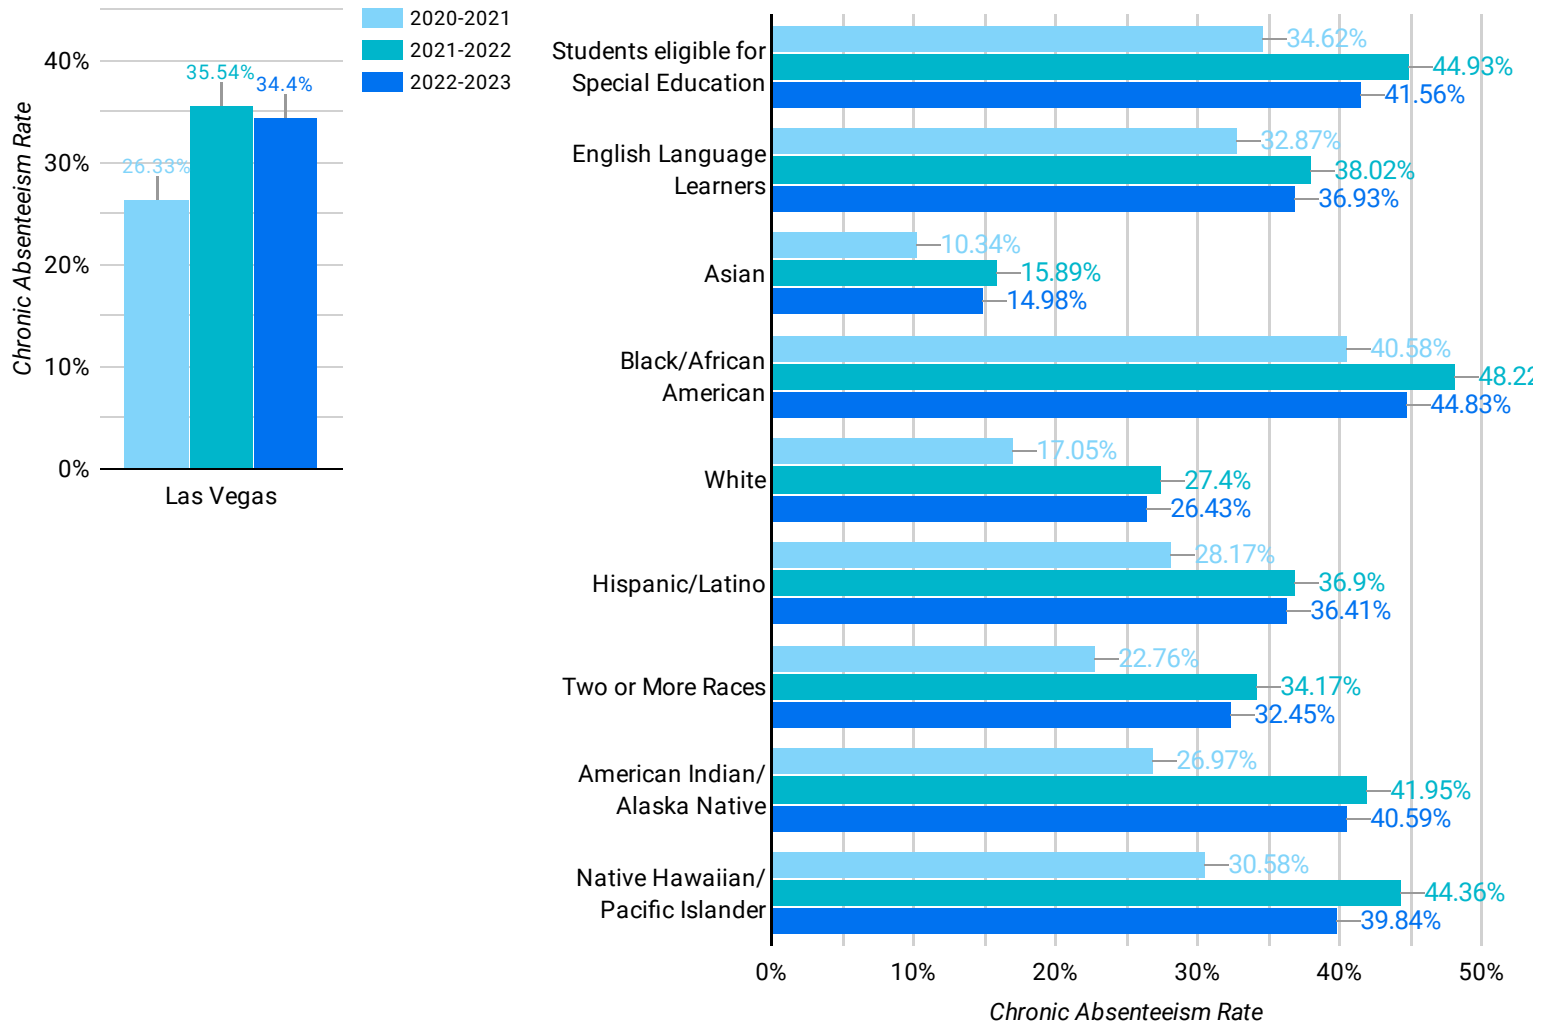

Note: 2020-2021 survey was completed during full-time distance education.

Las Vegas

Chronic Absenteeism

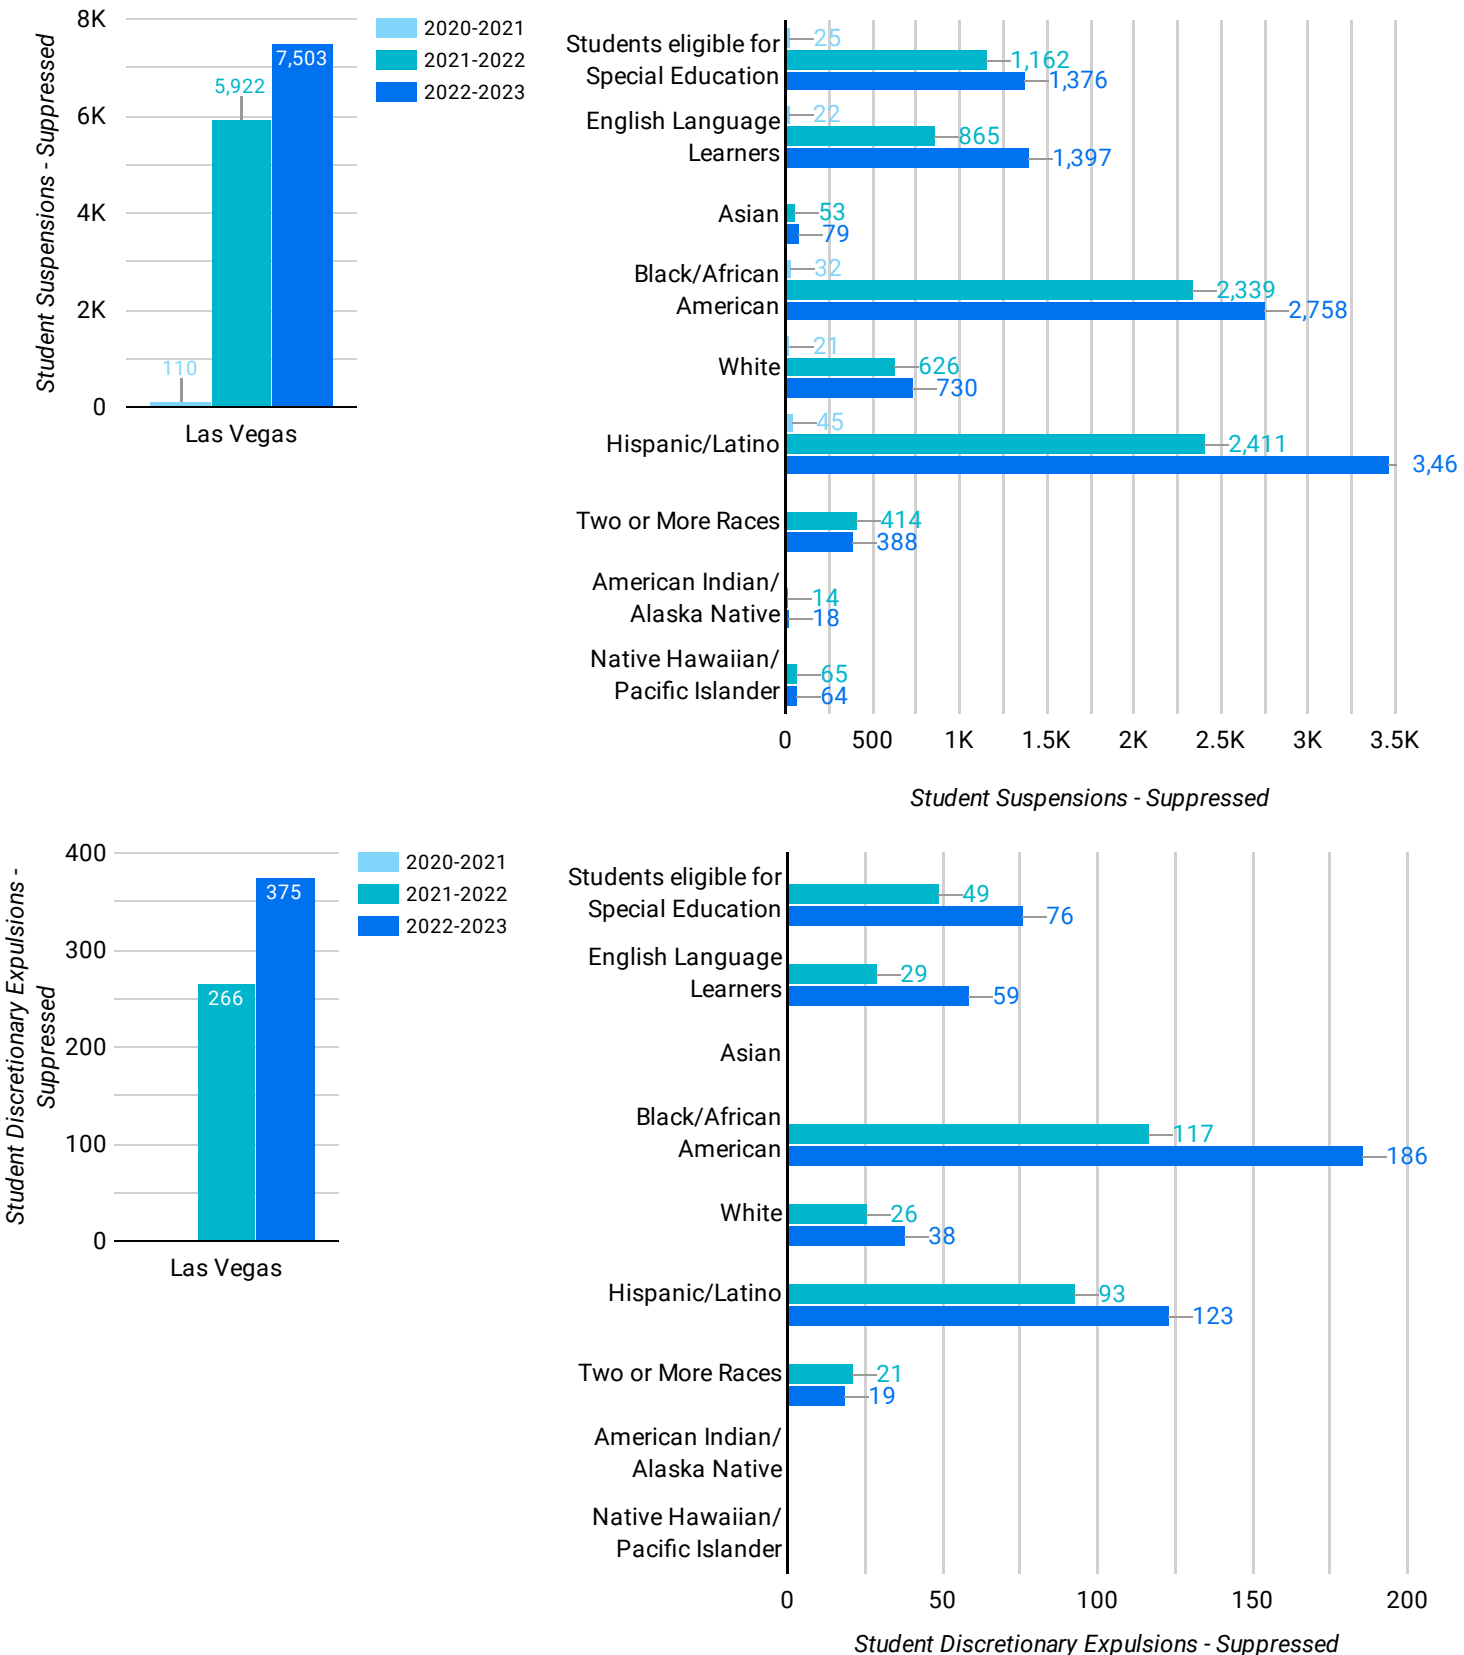

Chronic absenteeism is a school quality measure on the Nevada School Performance Framework that captures the total percentage of students who are absent for ten percent or more of their enrolled days. The District reports chronic absenteeism quarterly. This report represents data through the end of the third quarter of each school year.

Las Vegas

Student Behavior

The District strives to treat all students fairly and provide them with early interventions that will ultimately reduce time spent outside of the classroom. If we identify root causes and systematize appropriate restorative practices, students experience equitable application of disciplinary consequences, feel safe, and contribute to a positive school climate, then student discipline figures are less disproportionate and decrease overall. The District reports student suspensions and discretionary expulsion referrals, and the disproportionate application of suspensions and discretionary expulsion referrals, quarterly. This report represents data through the end of the third quarter of each school year.

Mesquite

Student Safety

Student safety is measured by positive responses on four Districtwide Survey items:

I sometimes stay home because I don't feel safe at this school.

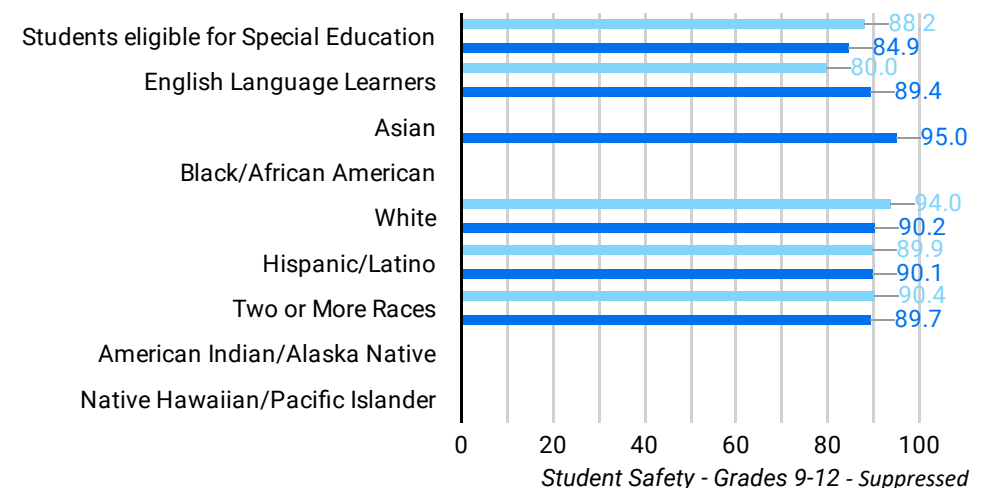

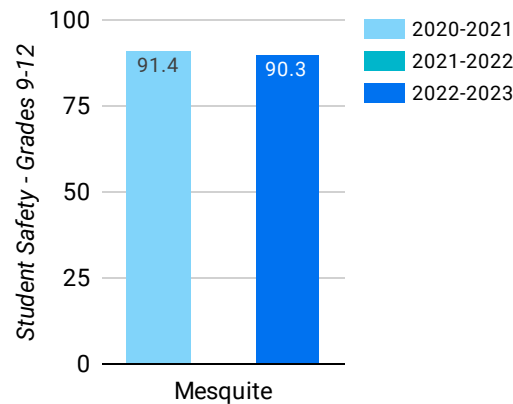

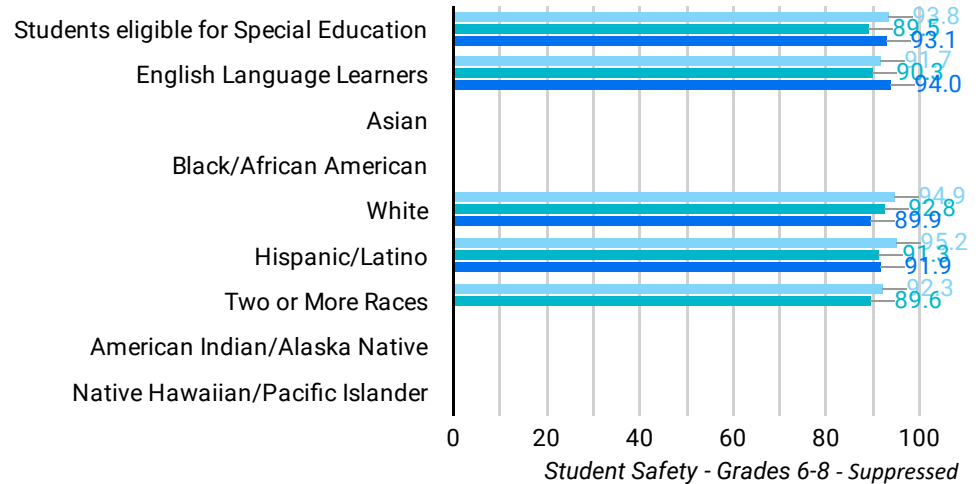

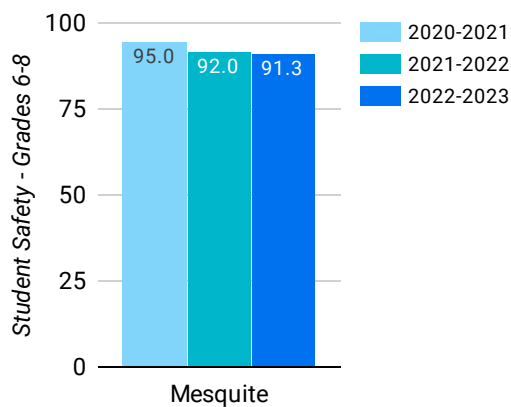

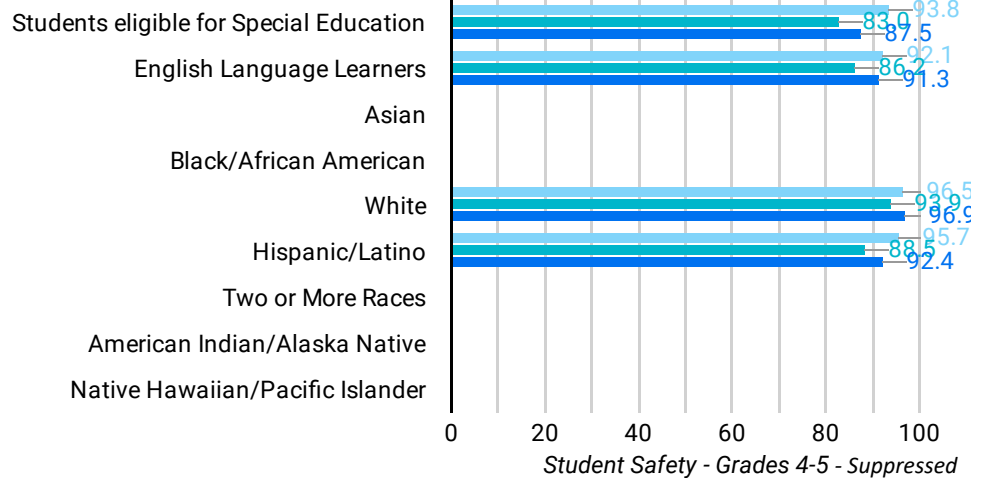

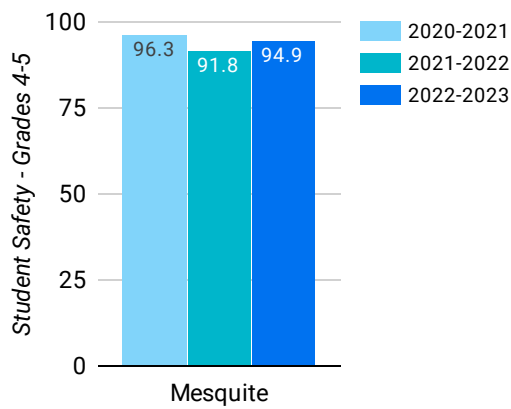

Students feel safe in this school.

This school has safety procedures that work.

This school is safe.

The District reports the percentage of a combination of negative responses to the first and positive responses to the remaining items annually.

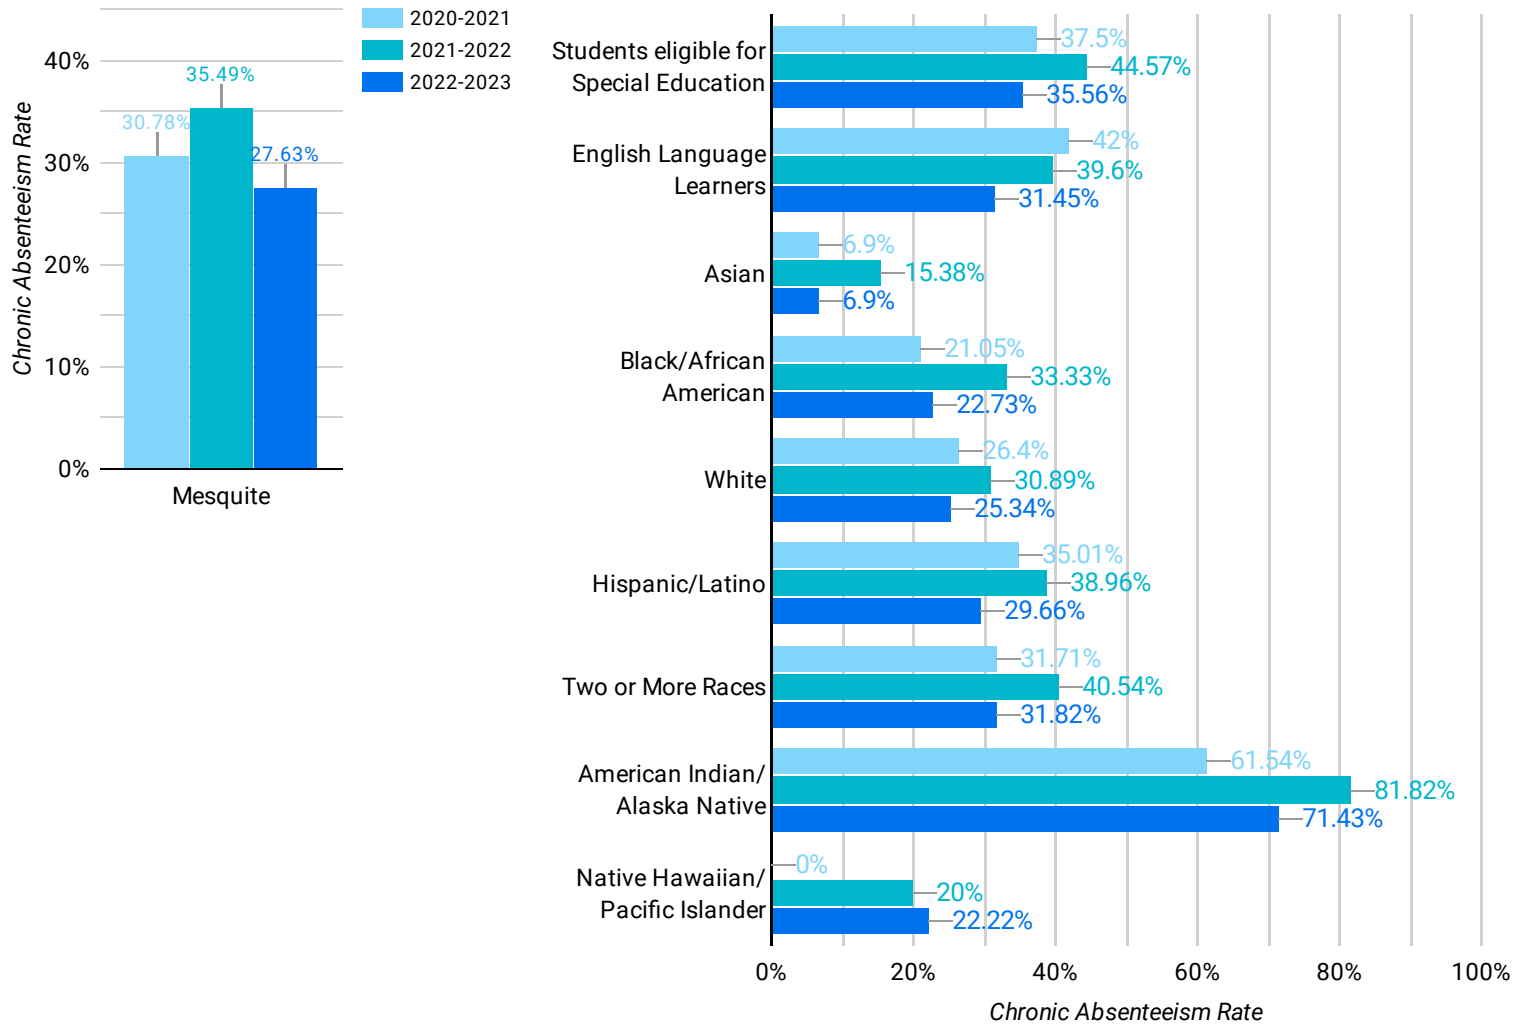

Note: 2020-2021 survey was completed during full-time distance education.

Mesquite

Chronic Absenteeism

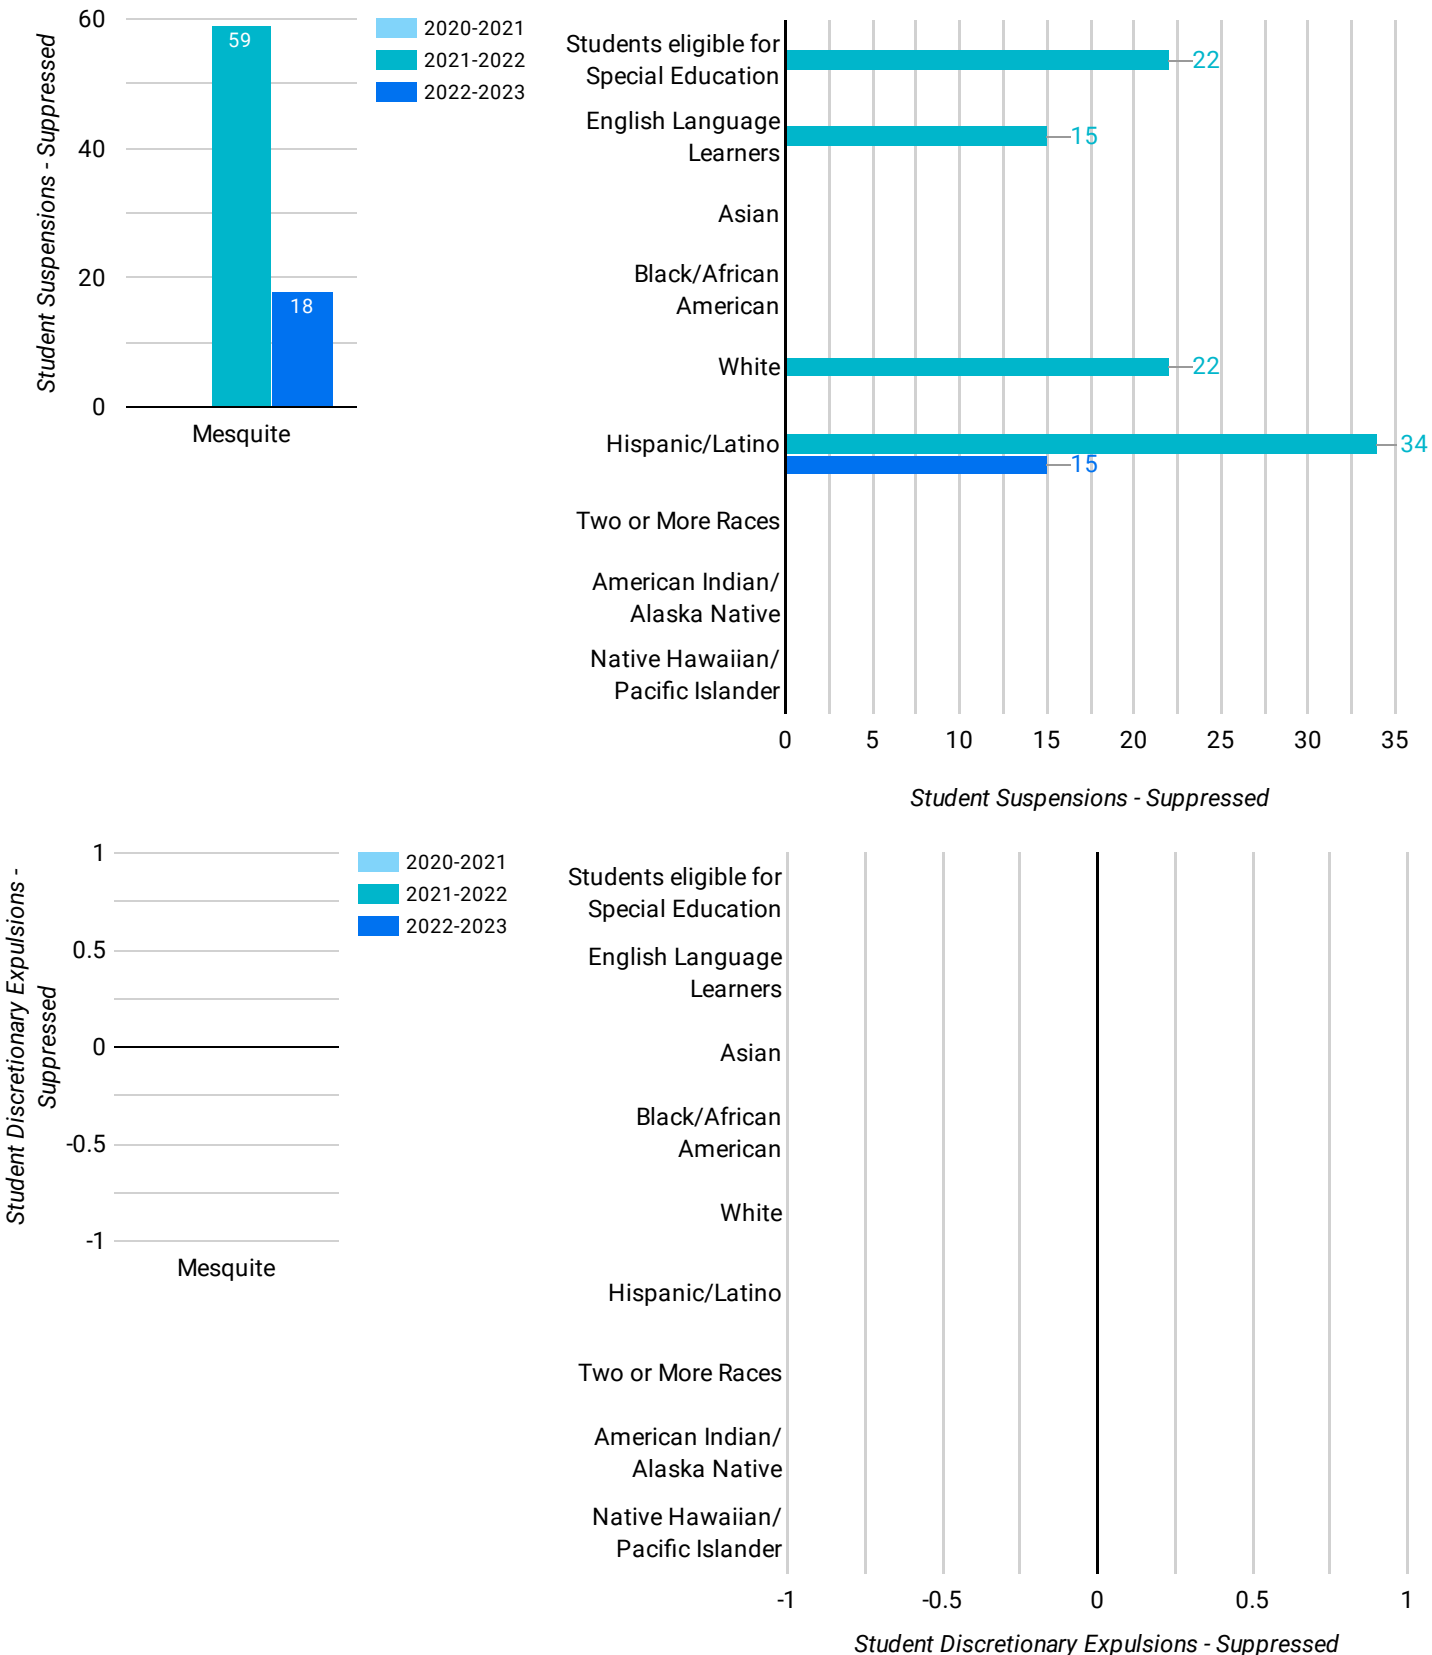

Chronic absenteeism is a school quality measure on the Nevada School Performance Framework that captures the total percentage of students who are absent for ten percent or more of their enrolled days. The District reports chronic absenteeism quarterly. This report represents data through the end of the third quarter of each school year.

Mesquite

Student Behavior

The District strives to treat all students fairly and provide them with early interventions that will ultimately reduce time spent outside of the classroom. If we identify root causes and systematize appropriate restorative practices, students experience equitable application of disciplinary consequences, feel safe, and contribute to a positive school climate, then student discipline figures are less disproportionate and decrease overall. The District reports student suspensions and discretionary expulsion referrals, and the disproportionate application of suspensions and discretionary expulsion referrals, quarterly. This report represents data through the end of the third quarter of each school year.

North Las Vegas

Student Safety

Student safety is measured by positive responses on four Districtwide Survey items:

I sometimes stay home because I don't feel safe at this school.

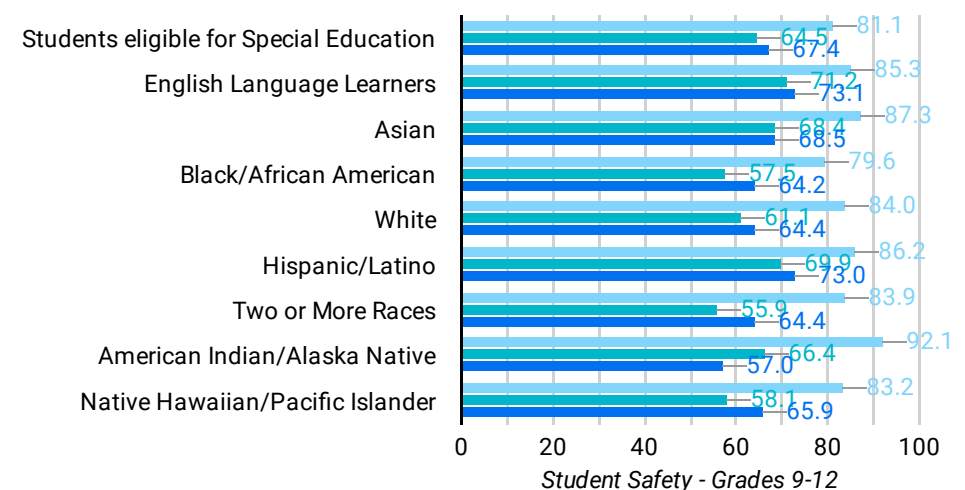

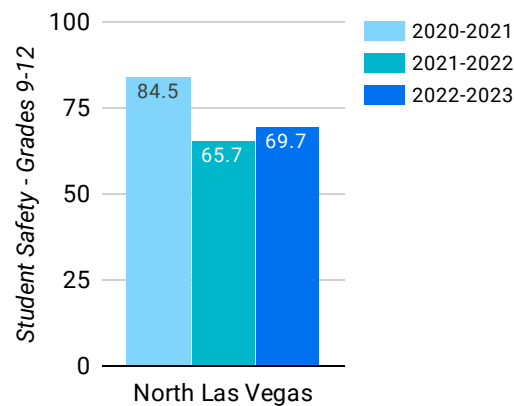

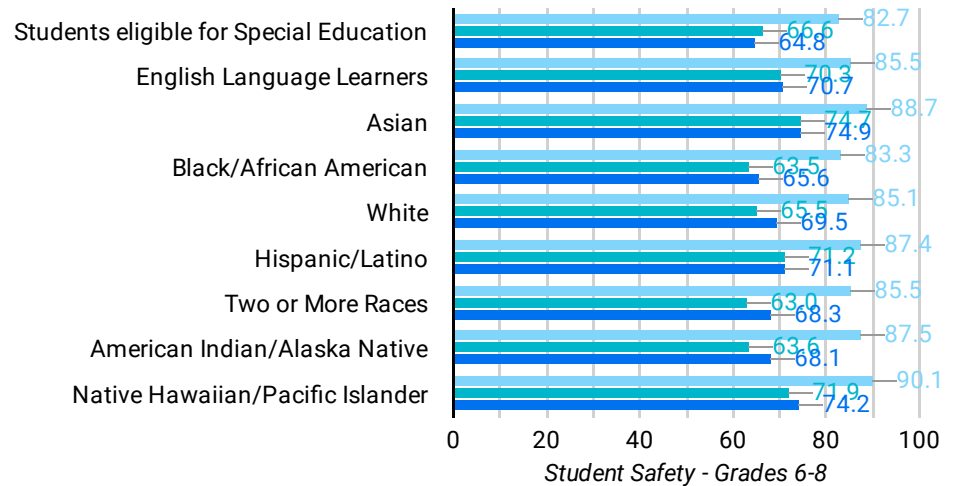

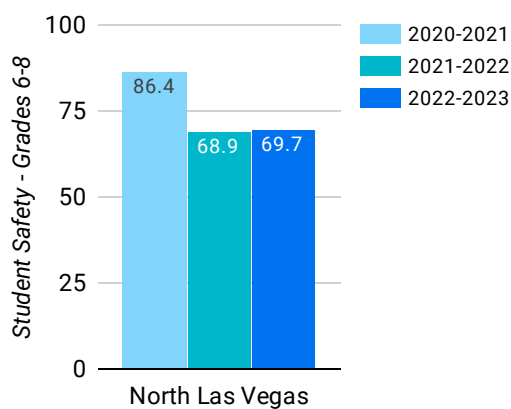

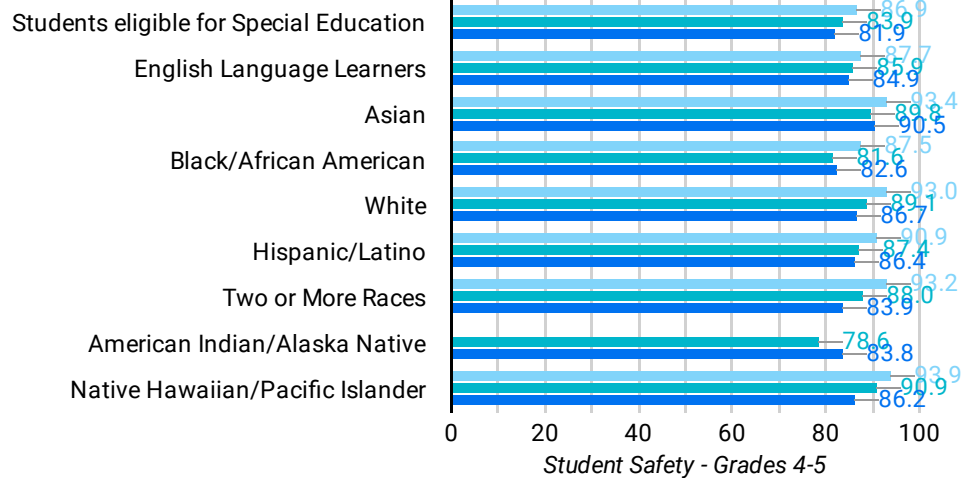

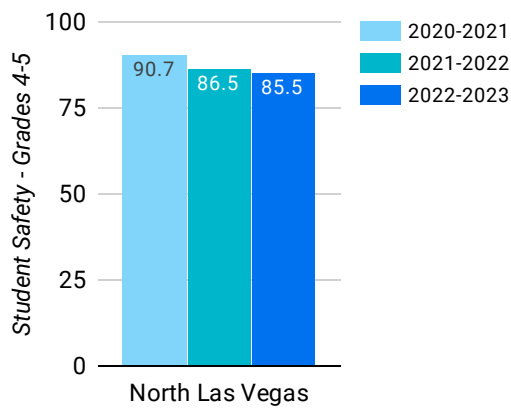

Students feel safe in this school.

This school has safety procedures that work.

This school is safe.

The District reports the percentage of a combination of negative responses to the first and positive responses to the remaining items annually.

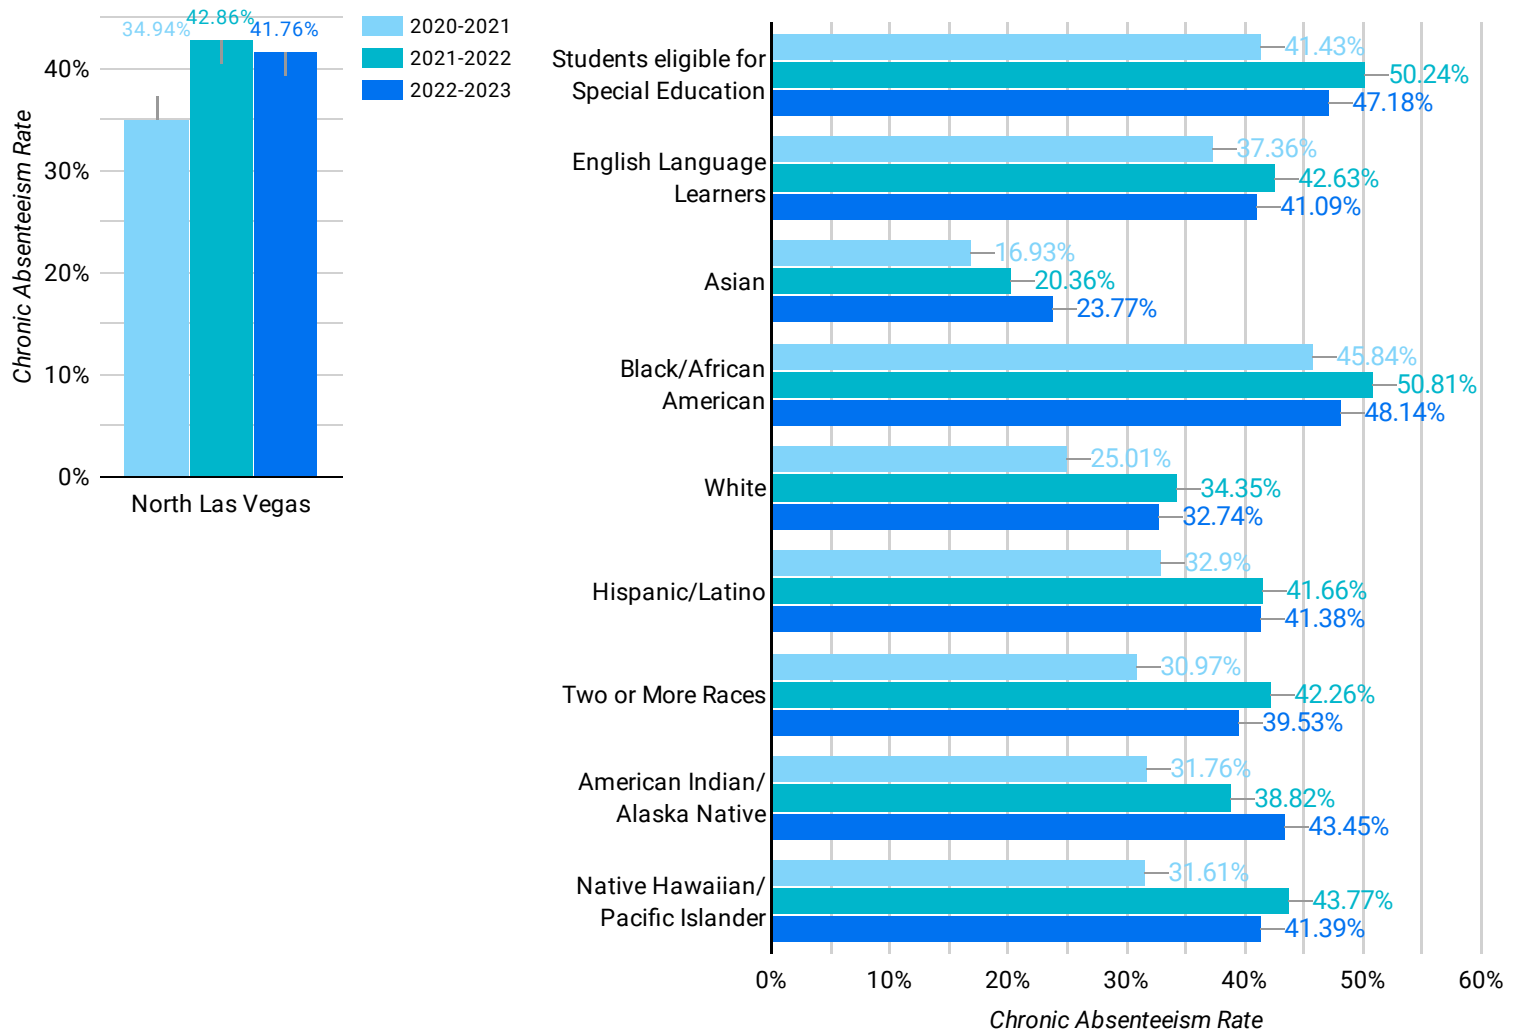

Note: 2020-2021 survey was completed during full-time distance education.

North Las Vegas

Chronic Absenteeism

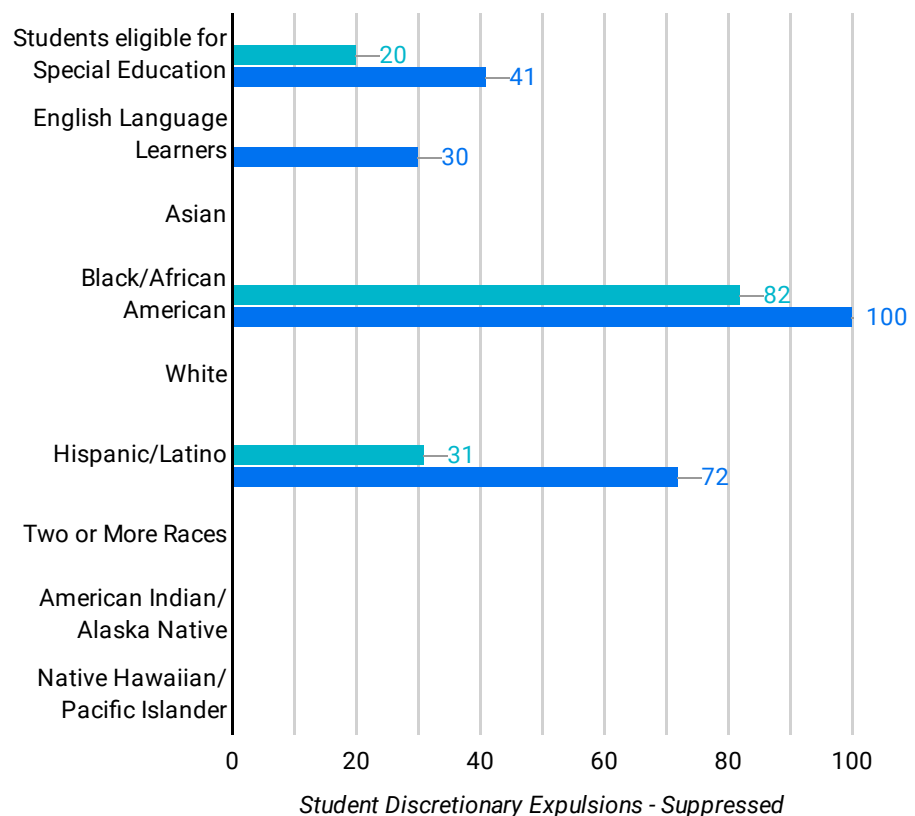

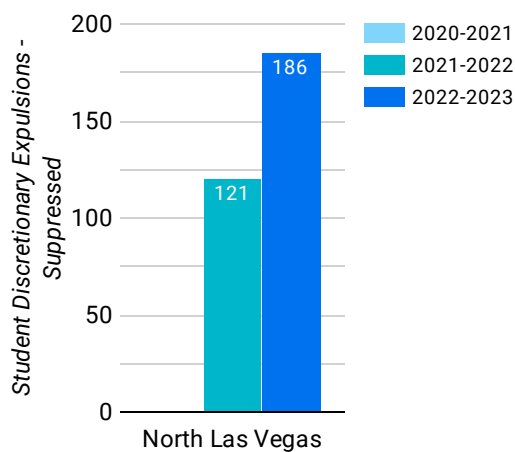

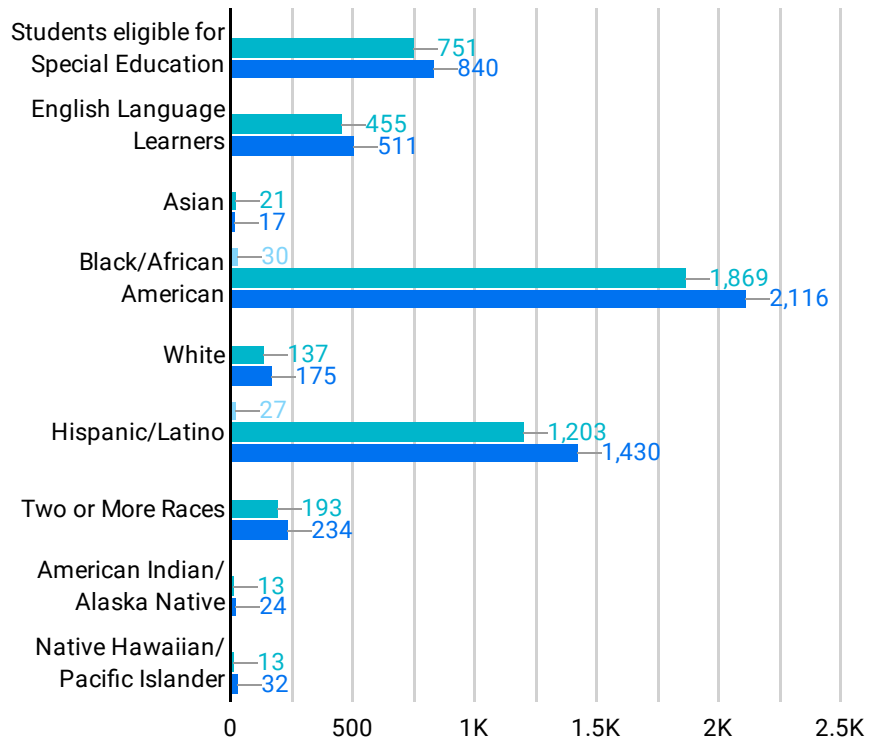

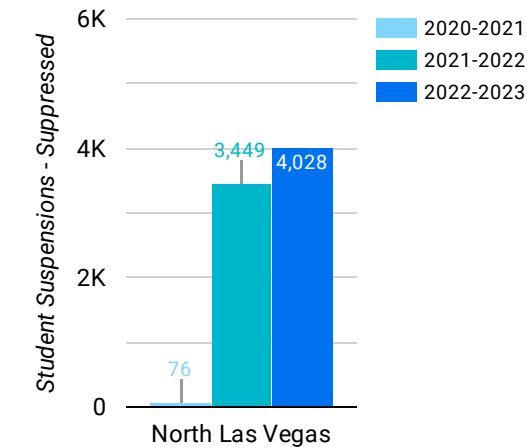

Chronic absenteeism is a school quality measure on the Nevada School Performance Framework that captures the total percentage of students who are absent for ten percent or more of their enrolled days. The District reports chronic absenteeism quarterly. This report represents data through the end of the third quarter of each school year.

North Las Vegas

Student Behavior

The District strives to treat all students fairly and provide them with early interventions that will ultimately reduce time spent outside of the classroom. If we identify root causes and systematize appropriate restorative practices, students experience equitable application of disciplinary consequences, feel safe, and contribute to a positive school climate, then student discipline figures are less disproportionate and decrease overall. The District reports student suspensions and discretionary expulsion referrals, and the disproportionate application of suspensions and discretionary expulsion referrals, quarterly. This report represents data through the end of the third quarter of each school year.

Unincorporated Clark County

Student Safety

Student safety is measured by positive responses on four Districtwide Survey items:

I sometimes stay home because I don't feel safe at this school.

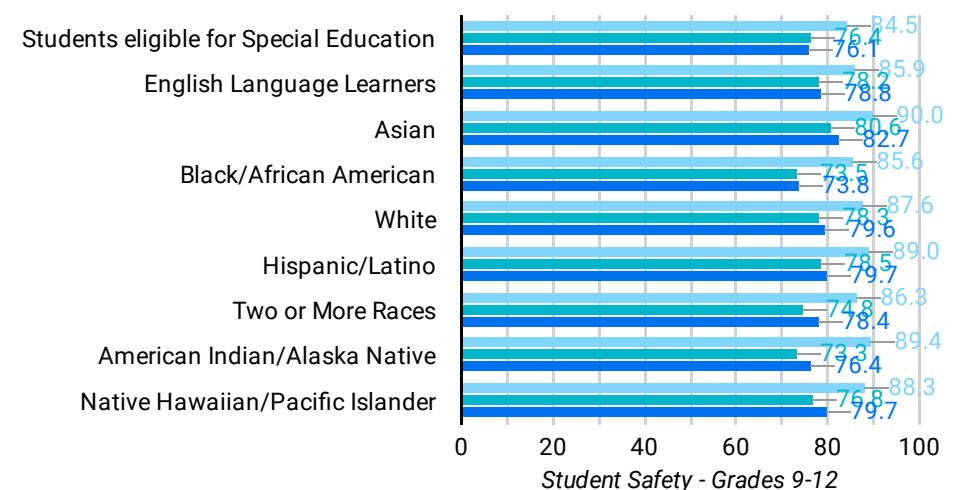

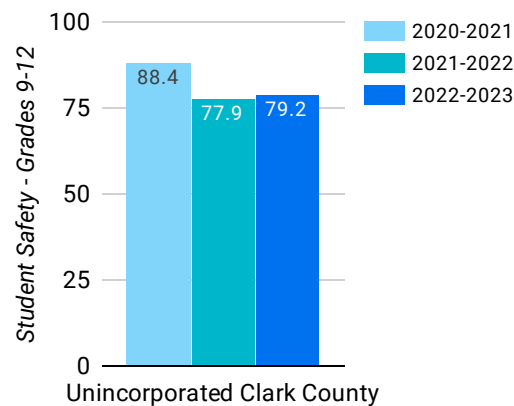

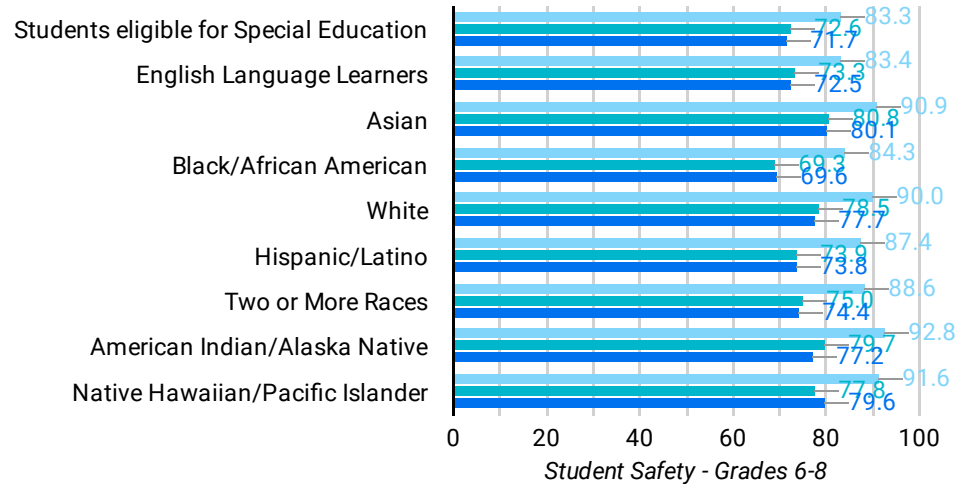

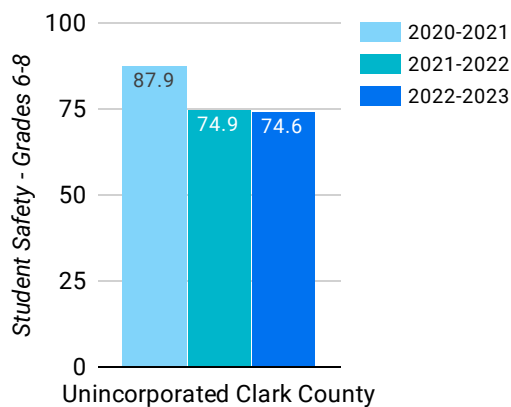

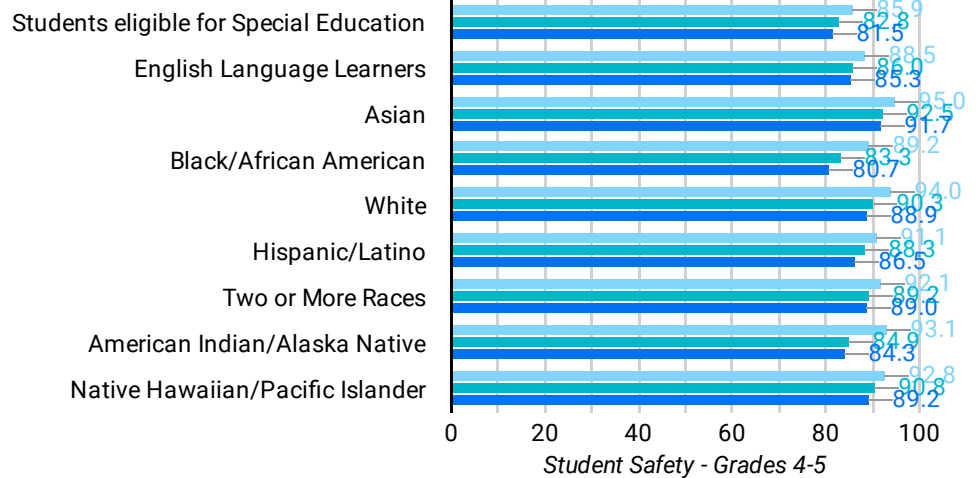

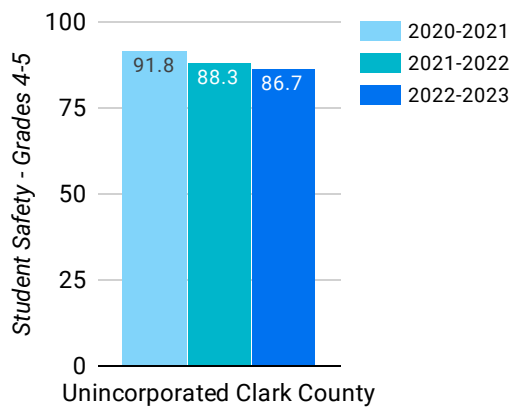

Students feel safe in this school.

This school has safety procedures that work.

This school is safe.

The District reports the percentage of a combination of negative responses to the first and positive responses to the remaining items annually.

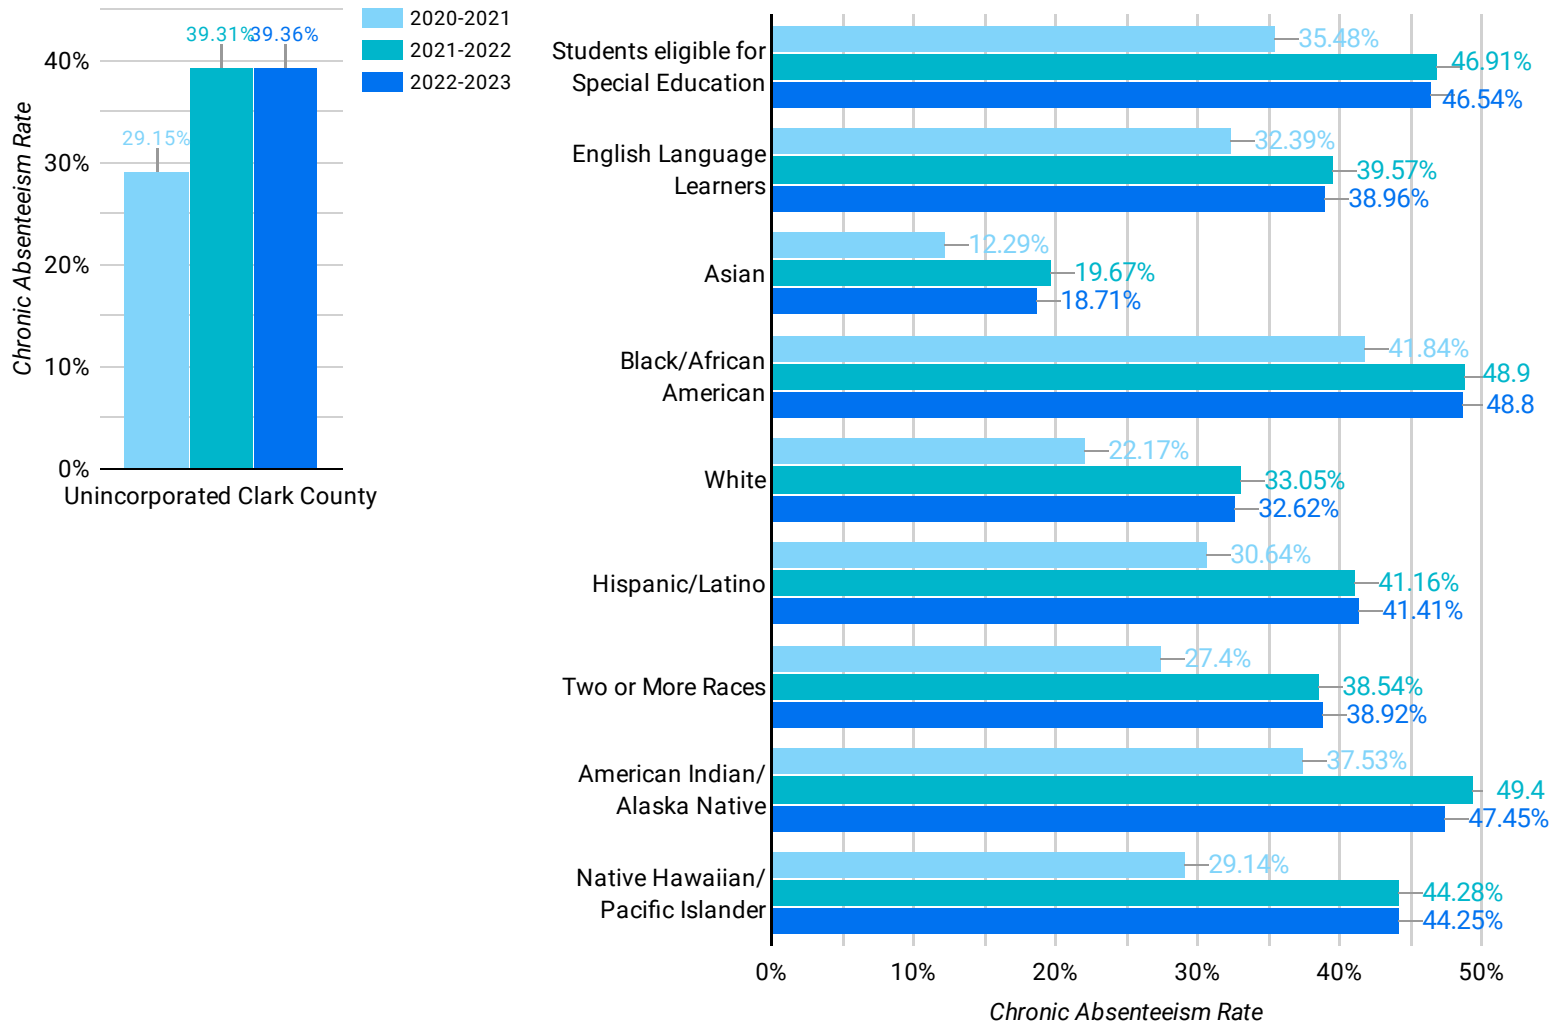

Note: 2020-2021 survey was completed during full-time distance education.

Unincorporated Clark County

Chronic Absenteeism

Chronic absenteeism is a school quality measure on the Nevada School Performance Framework that captures the total percentage of students who are absent for ten percent or more of their enrolled days.
