

Nevada Clean Energy Fund Board of Directors
Interest Application

(Note: This document and accompanying materials become public record once it is received by Clark County.)

The Clark County Board of County Commissioners (County Commission) is currently seeking applications to select nominees to be presented to the Governor for appointment to the Nevada Clean Energy Fund Board of Directors (Board). The County Commission will select the nominees at their June 16, 2026, County Commission meeting.

Among its duties (NRS 701B.995), the Board shall:

- (a) Annually develop and adopt a work program to serve and support the deployment of qualified clean energy projects in this State, including, without limitation, projects benefitting single-family and multi-family residential property, commercial, industrial, educational and governmental property and hospitals and nonprofit property and any other projects which advance the purposes of [NRS 701B.930](#) to [701B.995](#), inclusive;
- (b) Develop rules, policies and procedures which specify the eligibility of borrowers and any other terms or conditions of the financial support to be provided by the Nevada Clean Energy Fund before financing support is provided for any qualified clean energy project;
- (c) Develop and offer a range of financing structures, forms and techniques for qualified clean energy projects, including, without limitation, loans, credit enhancements, guarantees, warehousing, securitization, and other financial products and structures;
- (d) Leverage private investment in qualified clean energy projects through financing mechanisms that support, enhance and complement private investment;
- (e) Develop consumer protection standards to be enforced on all investments to ensure the Nevada Clean Energy Fund and its partners are lending in a responsible and transparent manner that is in the financial interests of the borrowers;
- (f) Assess reasonable fees for the financing support and risk management activities provided by the Nevada Clean Energy Fund in amounts sufficient to cover the reasonable costs of the Fund;
- (g) Collect and make available to the public in a centralized database on an Internet website maintained by the Nevada Clean Energy Fund information regarding rates, terms and conditions of all financing support transactions, unless the disclosure of such information includes a trade secret, confidential commercial information or confidential financial information;
- (h) Work with market and program participants to provide information regarding best practices for overseeing qualified clean energy projects and information regarding other appropriate consumer protections;
- (i) Prepare an annual report for the public on the financing activities of the Nevada Clean Energy Fund; and
- (j) Undertake such other activities as are necessary to carry out the provisions of NRS 701B.930 to 701B.995, inclusive.

The Board consists of nine (9) members, including the Director of the Office of Energy, the Executive Director of the Office of Economic Development, the Real Estate Administrator of the Department of Business and Industry, the Commissioner of Financial Institutions, and persons nominated by the Clark County Commission, the Washoe County Board of County Commissioners, the 15 other counties in Nevada, the State Contractors' Board, and labor organizations in Nevada. Terms of Board members are three (3) years, and members are eligible for reappointment.

Required Additional Information:

Along with this application, please submit a letter of interest, as well as a separate document providing the information that is asked for below.

NRS 701B.990 requires that nominees and those appointed to the Board have certain expertise. Please submit a separate document that details your expertise in matters relating to renewable energy, economic development, banking, law, finance, or other matters relevant to the work of the Board.

Submitting Application:

Your signed application and supporting documents must be received no later than 5:00PM, Thursday, May 21, 2026. You may email your completed application packet to Shelly Gulotta at gulottms@ClarkCountyNV.gov, or deliver the same in-person to the County Manager’s Office, 6th Floor, Clark County Government Center, 500 South Grand Central Parkway, Las Vegas.

Nevada Clean Energy Fund Board of Directors Application - Expertise Statement

Pursuant to NRS 701B.990, I am submitting this statement to outline my relevant expertise in economic development and other matters pertinent to the work of the Nevada Clean Energy Fund Board of Directors.

My professional background spans civic leadership, operational strategy, public engagement, organizational governance, and community-centered systems development. Across my career, I have worked at the intersection of public service, nonprofit leadership, stakeholder engagement, and strategic implementation—bringing experience that aligns with the Board's responsibility to support the equitable deployment of clean energy solutions across Nevada.

Economic Development & Community Impact

My work has consistently focused on strengthening communities through strategic initiatives, partnership development, and public-serving programs that improve quality of life and expand opportunity. I understand economic development not solely through traditional business finance, but through practical systems that help communities thrive—supporting infrastructure, public access, organizational sustainability, and pathways that reduce barriers to participation.

Clean energy investment presents a significant economic opportunity for Nevada, from job creation and business development to reduced energy costs, increased resilience, and long-term economic diversification. I bring a community-informed perspective on how economic strategies translate into real-world public outcomes.

Strategic Operations & Systems Leadership

I have extensive experience leading complex operational systems, developing organizational processes, managing budgets, coordinating cross-functional initiatives, and supporting strategic decision-making across mission-driven organizations.

This experience includes:

- Organizational systems design and implementation
- Budget stewardship and financial coordination
- Contract and vendor management
- Governance support and strategic planning
- Program implementation and oversight
- Stakeholder coordination across diverse sectors

The Nevada Clean Energy Fund requires thoughtful governance, operational discipline, transparency, and strategic execution. My background in building and managing systems would support the Board's responsibility to steward programs effectively and responsibly.

Public Engagement & Stakeholder Collaboration

A core area of my expertise is convening diverse stakeholders, facilitating productive collaboration, and building trust across communities, institutions, and partner organizations.

My experience includes:

- Community engagement and public-facing initiative design
- Coalition and partnership building
- Facilitation of strategic convenings and public forums
- Cross-sector collaboration between nonprofit, civic, business, and community stakeholders
- Equity-centered program development

Effective clean energy deployment depends not only on financing structures, but also on public trust, accessibility, stakeholder coordination, and community participation. I bring experience in helping complex initiatives remain grounded in public accountability and lived community realities.

Environmental Justice & Community Resilience

My growing work in environmental justice has reinforced the urgent connection between energy systems, public health, affordability, and equity.

In Nevada, communities face increasing challenges related to extreme heat, infrastructure resilience, utility affordability, and environmental inequities that disproportionately affect historically underserved populations. I believe clean energy solutions must be designed and implemented with these realities in mind.

My perspective is grounded in the belief that equitable access to clean energy financing is both an environmental and economic justice issue.

Relevant Perspective to Board Service

While my expertise does not come from traditional renewable energy finance or banking institutions, I offer a complementary and highly relevant perspective rooted in:

- Systems implementation
- Governance and accountability
- Economic/community development
- Public engagement
- Equity-centered strategy
- Cross-sector partnership development
- Community resilience

I believe these experiences would allow me to contribute meaningfully to the Nevada Clean Energy Fund Board as it advances innovative financing strategies that serve Nevada's people, communities, and future.

Respectfully submitted,

Haley Johnson

SUBJECT: Letter of Interest – Nevada Clean Energy Fund Board of Directors

Dear Members of the Clark County Board of County Commissioners,

I am writing to express my sincere interest in being considered as a nominee for appointment to the Nevada Clean Energy Fund Board of Directors.

As a native Nevadan raised in a family deeply rooted in public service, the opportunity to serve my home state in this capacity is deeply meaningful to me. Public service is not simply a professional pathway for me—it is a personal value system. My family includes long-term retired public servants whose commitment to serving Nevada communities helped shape my own dedication to civic engagement, community leadership, and stewardship. As someone whose career has been grounded in public service, I feel a deep responsibility to contribute to the wellbeing, resilience, and future of the state I call home.

Nevada stands at a pivotal moment. As our communities continue to grow, so do the urgent and interconnected challenges we must thoughtfully navigate—including rising utility costs, extreme heat, infrastructure resilience, economic diversification, and ensuring that clean energy investment reaches the communities that need it most. The Nevada Clean Energy Fund represents an important opportunity to help accelerate innovation while making clean energy financing more accessible, practical, and impactful for households, businesses, nonprofits, and public-serving institutions across our state.

Professionally, I bring experience across civic leadership, operational strategy, public engagement, organizational governance, and cross-sector partnership development. My work has consistently focused on building systems, strengthening partnerships, supporting public-facing initiatives, and translating strategy into practical implementation in ways that are accountable, collaborative, and community-centered.

Throughout my career, I have worked across civic, nonprofit, and community-based sectors leading complex operational systems, strategic initiatives, stakeholder engagement efforts, and large-scale public convenings. My experience includes building organizational infrastructure, facilitating cross-sector collaboration, stewarding initiatives that require thoughtful governance and accountability, and helping move ideas into action with public trust at the center.

My work in community advocacy and environmental justice has further deepened my understanding that energy policy is fundamentally a people issue. [REDACTED]

[REDACTED] I have engaged in community-centered conversations around environmental health, resilience, public education, and equitable access to sustainable solutions. This work has reinforced my belief that access to affordable, resilient, and clean energy directly impacts household stability, public health outcomes, economic mobility, and long-term community wellbeing—particularly in historically underserved communities.

While my background is not rooted in traditional energy finance or banking, I believe effective public boards benefit from leaders who bring complementary expertise in systems implementation, equitable program design, stakeholder engagement, and public accountability. Strong clean energy deployment requires not only technical financing mechanisms, but thoughtful leadership that understands how policy decisions translate into lived community outcomes.

As someone deeply committed to Nevada's future, I would be honored to contribute my experience, perspective, and dedication in service to this work.

Thank you for your consideration and for your service to Clark County and the State of Nevada. It would be a privilege to support Nevada's clean energy future through service on this Board.

With gratitude & purpose,

Haley Johnson

HALEY JOHNSON
