Project Description

General Summary

- Site Address: N/A
- Site Acreage: 6.38

Site Plan

The site plan shows a proposed 56-lot single-family residential subdivision at the northeast corner of Burnham Avenue and Karen Avenue. The lots are arranged in a grid pattern with internal streets and labeled dimensions throughout the subdivision. Existing overhead power lines and an existing power pole are shown along the southern and eastern boundaries of the site. A proposed new standalone power pole is identified near the southeast portion of the subdivision, positioned slightly outside the existing overhead alignment.

Applicant's Justification

The applicant requests a waiver to allow construction of a new power pole needed to relocate an existing overhead power line within a proposed 56 lot residential subdivision approved after a prior zone change. The existing commercial use on the site requires the line to be moved, and NV Energy's design identifies a new pole within the existing overhead alignment to transition the line underground around the subdivision. The pole is proposed on the east side of the community, adjacent to commercial property and approximately 100 feet north of Karen Avenue, and the applicant states the adjacent commercial uses will not be impacted.
