MA152-1 Wireless Voice, Data and Accessories Attachment C: Costsheet									
Category 3A: Fleet Management Costsheet									
VENDOR Verizon Connect NWF Inc. (Formerly Networkfleet)									
Monthly Recurring Cost									
Description	minimum quantity of vehicles	monthly fee	total annual cost (qty x fee x 12)	OFFEROR NOTES Describe plan attributes and characteristics per the instructions*.					
	10	\$29.00	\$3,480.00	The Verizon solution features a GPS-tracking system that provides location and tracking data to help you manage your entire fleet in a new, more efficient manner. Our solution includes wireless fleet management services that improve fleet operating efficiency by reducing fuel consumption, maintenance expenses, insurance costs, fleet size, and vehicle emissions while increasing productivity and levels of service. The					
Basic Fleet Management	100	\$29.00	\$34,800.00	solution also includes a number of tools that empower near real-time management of vehicles and drivers to boost your fleet's performance. The proposed solution includes our 5500 series device which is designed to enable the					
	500	\$29.00	\$174,000.00	customer to connect with every aspect of their vehicle operations. The 5500 series hardware offers affordable wireless coverage, transmitting vehicle location, performance, diagnostics, and sensor event information for your fleet.					
	1000	\$29.00	\$348,000.00	Our solution offers 24/7 visibility into fleet assets, which allows fleet managers to easily locate vehicles in real-time and view specific vehicle data such as current location, mileage, speed, fuel consumption, and diagnostic trouble codes — increasing response time and reducing operating costs. VCN is a universal solution, compatible on all light, medium, and heavy vehicles, and consists of an in-vehicle unit and an online					
		\$29.00	\$1,740,000.00	application. The 5000 product line features two different automotive grade hardware devices: The 5500 is compatible with Light and Heavy Duty vehicles with an OBD-II diagnostic link connector (cars and light trucks 1996 and newer) or J1708/J1939 6-pin or 9-pin diagnostic link connector (heavy trucks 1988 and newer).					
Total Annual Recurring Cost			\$2,300,280.00						

The monthly fee above is based on the cost of the device and harness divided over 12 months, plus the cost of the subscription service for a 5500 device. VCN does not currently sell the total solution based on a monthly fee. The hardware must be purchased separately up front, and then VCN bills the monthly subscription fee. These individual costs are shown below and should become the pricelist for the solution. Discounts for customers ordering 600 or more devices on the initial order with 12 months of service will be provided with a discount to the current price.

Service Requirements						
	requirements					
	*Solution to track, monitor & dispatch vehicles while collecting information on vehicle location & operation					
	*must have option to connect to vehicle's On Board Diagnostic-II (OBD-II) port					
*Ability to monitor vehicle location						
*Provide location-based vehicle dispatch support						
	*Collect information on driver performance					
	*Real time and historical reporting via secure, centralized portal					
	*Ability to set up alerts based on customer devined parameters

Traffic Data Services -OD 500K	Traffic Data Services - Origin & Destination Reports, population up to 500K	Pricing incluides: - 4 quarterly Origin & Destination reports		
Traffic Data Services - OD 1M	Traffic Data Services - Origin & Destination Reports, population up to 1M	Pricing incluides: - 4 quarterly Origin & Destination reports		
Traffic Data Services - OD 2.5M	Traffic Data Services - Origin & Destination Reports, population up to 2.5M	Pricing incluides: - 4 quarterly Origin & Destination reports		
Traffic Data Services - OD 5M	Traffic Data Services - Origin & Destination Reports, population up to 5M	Pricing incluides: - 4 quarterly Origin & Destination reports		
Traffic Data Services - Micro OD	Traffic Data Services - Micro Origin & Destination Report per section	Pricing incluides: - 4 quarterly Micro Origin & Destination reports - Reports cover 1 section of congested road		
Traffic Data Services - Signal Tuning	Traffic Data Services - Signal Tuning (per junction)	Pricing incluides: - 4 quarterly Signal Tuning reports including percentage turn movement count and delay per junction		
Traffic Data Services - Counting Station	Traffic Data Services - Counting Station	Pricing incluides: - 4 quarterly counting station reports including estimated vehicle counts for a specific location		

Additional HW/SW and Service includes

- Pre-construction
- Construction Installation
- Design, Kitting, Installation Support
- Field Engineering Support
 Warranty and Break/fix cost covers manufacturer defects only; up to 5 year term

The enclosed pricing is for the material and services set forth in this proposal and based on the assumptions detailed below for ITM Advanced Plus. If any of the assumptions are not true and/or any additional requirements are identified Verizon's oricing may change.

Pricing does not include taxes or surcharges, if any, and assumes the following applies for ITM Advanced:

- ITM Advanced Hard
- Advanced intersection supports 8 lanes & includes 8 sensors, 8 tubes, 2 Long Life Repeaters, and 2 Standard External
 - nnas
 Does not include any Conflict Monitors, MMUs, or updates to signal controllers
 Assumes line of sight exists from digital radios to repeaters
 Permits and associated fees are not included.

- Does not include union or prevailing wages
- Does not include off-hours nights, or other times outside of regular business hours

- Holiday work days excluded
 Does not include traffic controller fees
 Includes shipping in the continental United States

- Flex Control Enhanced Module With Flex ID
- Flex Control Power Supply
- Flex Connect Power Supply

APCC Serial Port Protocol (Digital Radio)
 The enclosed pricing is for the material and services set forth in this proposal and based on the assumptions detailed below for ITM Advanced Plus. If any of the assumptions are not true and/or any additional requirements are identified Verizon's

Pricing does not include taxes or surcharges, if any, and assumes the following applies for ITM Advanced Plus:

Advanced Plus Hardware

Advanced Plus Hardware
 Advanced Plus Intersection supports 10 lanes & includes 50 sensors, 2 micro sensors, 60 tubes, 4 Long Life Repeaters, and 2 Standard External Antennas
 Assumes line of sight exists from digital radios to repeaters
 Does not include any Conflict Monitors, MMUs, or updates to signal controllers.
 Permits and associated fees will exist and are not included.

- Does not include union or prevailing wages
- Does not include off-hours, nights, or other times outside of regular business hours Holiday work days excluded
- Does not include traffic controller fees
- Includes shipping in the continental United States

ITM Advanced Plus includes the following HW components, per intersection: Flex Control Enhanced Module with Flex ID Flex Control Power Supply

The enclosed pricing is for the services set forth in this proposal and based on the assumptions detailed below for Traffic
Data Services. If any of the assumptions are not true and/or any additional requirements are identified, Verizon's pricing
may change. Pricing does not include taxes or surcharges, if any, and assumes the following applies:

d pricing is for the services set forth in this proposal and based on the assumptions detailed below for Traffic Data Services. If any of the assumptions are not true and/or any additional requirements are identified, Verizon's pricing may change. Pricing does not include taxes or surcharges, if any, and assumes the following applies:

-3 main roads with 6 feeders

The enclosed pricing is for the services set forth in this proposal and based on the assumptions detailed below for Traffic
Data Services. If any of the assumptions are not true and/or any additional requirements are identified, Verizon's pricing
may change. Pricing does not include taxes or surcharges, if any, and assumes the following applies:

5 main roads with 10 feeders

-3 main roads with Dreeders
The enclosed pricing is for the services set forth in this proposal and based on the assumptions detailed below for Traffic
Data Services. If any of the assumptions are not true and/or any additional requirements are identified, Verizon's pricing
may change. Pricing does not include taxes or surcharges, if any, and assumes the following applies:

- 1 main road covered with 3 feeders ed pricing is for the services set forth in this proposal and based on the assumptions detailed below for Traffic

Data Services. If any of the assumptions are not true and/or any additional requirements are identified. Verizon's pricing may change. Pricing does not include taxes or surcharges, if any, and assumes the following applies:

-3 main roads with 6 feeders
The enclosed pricing is for the services set forth in this proposal and based on the assumptions detailed below for Traffic Data Services. If any of the assumptions are not true and/or any additional requirements are identified, Verizon's pricing may change. Pricing does not include taxes or surcharges, if any, and assumes the following applies:

5 main roads with 10 feeders

-3 main loads with 10 receivers
The enclosed pring is for the services set forth in this proposal and based on the assumptions detailed below for Traffic
Data Services. If any of the assumptions are not true and/or any additional requirements are identified, Verizon's pricing
may change. Pricing does not include taxes or surcharges, if any, and assumes the following applies:

Local population is what is covered in zones of interest

1 zone = 10,000 people

Over night annual visitors for 60 days are 25% of local population or less
4 quarterly reports are provided
Market share is assumed to be 55% or higher
Inclusion list is 70% or higher (gov numbers are excluded)

porting details:

ed pricing is for the services set forth in this proposal and based on the assumptions detailed below for Traffic Data Services. If any of the assumptions are not true and/or any additional requirements are identified, Verizon's pricing may change. Pricing does not include taxes or surcharges, if any, and assumes the following applies

-4 micro OD reports per year
The enclosed pricing is for the services set forth in this proposal and based on the assumptions detailed below for Traffic Data Services. If any of the assumptions are not true and/or any additional requirements are identified, Verizon's pricing may change. Pricing does not include taxes or surcharges, if any, and assumes the following applies:

-4 signal tuning reports per year The enclosed pricing is for the services set forth in this proposal and based on the assumptions detailed below for Traffic Data Services. If any of the assumptions are not true and/or any additional requirements are identified, Verizon's pricing may change. Pricing does not include taxes or surcharges, if any, and assumes the following applies:

- Requires Real time or historical speed purchase covering the location of the counting station

-					
			Pricing incluides: - 10 additional zones above the		The enclosed pricing is for the services set forth in this proposal and based on the assumptions detailed below for Traffic Data Services. Professional Services – One Time Charges			
Sku Name	Sku	Pricing Frequency	Price
Professional Services	GDFPSV	One Time Charge per Hour	\$95.00
One Time Charges ³			
The below credits do not expire			
1000 Credits	GDFCR1	One Time Charge	\$250.00
5000 Credits	GDFCR5	One Time Charge	\$1,000.00

Note: Core subscription include access to the doForms web portal to build, manage, and view mobile forms. All Subscriptions are per user and can be accessed via web or mobile on iOS or Android devices. Products cannot be mixed. See attached calling plan and feature details for important information about calling plans, features, and product details options.

- 1. 30 Day Free Trial. Limit 1 30-day trial at no cost per customer profile.
- 2. Professional Services. Provides custom forms, custom reports, custom PDF templates, integration support, training, product enhancements, design consulting, and custom development.
- 3. Credit. Credits are required for forms completed or sent outside of the doForms mobile app. Credits are used to when forms are sent as links in emails or embedded in documents as hyperlinks for each form submitted. Website forms require a credit for each form submitted. Scheduled reports require a credit each time they are run (distribution is unlimited). Dispatched form links or Fill & Send forms require a credit when sent and submitted. C * doForms Credits do not expire as long as Customer's subscription remains active*

Should a Business Associate Agreement (BAA) be required, the agreement would be between doForms and the Customer.

Products shown or referenced are provided by doForms Inc. ("doForms"), a Verizon Partner Program Member, which is solely responsible for the representations and the functionality, pricing and service agreements. doForms can connect to several different systems including cloud based and server based applications. Customer may purchase doForms licenses and services ("doForm Services"), to be billed by Verizon Wireless, at the prices listed above. Verizon Wireless is not the licensor of the doForm Services and makes no representations or warranties whatsoever, either express or implied, with respect to them. doForm Services are manufactured by doForms, Inc. Any license for doForm Services must be obtained directly from doForms either upon purchase or installation of the doForms Services. doForms Services are subject to doForms' terms and conditions and can be viewed here: https://www.doforms.com/terms-of-use/ Verizon Wireless will direct doForms to fulfill Customer's doForms Services order. Customer support for doForm Services must be obtained directly from doForms, Inc. If Verizon Wireless in its sole discretion determines that an inquiry from a subscriber is related to doForms Services and is not one concerning Equipment or Wireless Service, it may transfer the service request to appropriate doForms representatives.

IVI400-33 I	VIDEO SCARPING		φ3 99 .00	

Note: Coverage includes the Verizon Wireless 4G network only. Usage outside of the United States will be billed at the international travel feature rate, if applicable, or pay as you go pricing, which can be found at www.verizonwireless.com/international. Lines activating on these plans must be on 4G HD voice-capable smartphones.

Mutualink solution provides the interoperability required when an active incident occurs (robbery, shooting etc.),

Date Page 2 of 5

and there is a need for different public safety agencies, schools, or commercial establishments to work together. Specifically allow all parties to exchange video, files (e.g. floor plans), messages, in addition to instant Push To Talk for voice communication.

Interoperability – Mutualink solution improves collaboration (Audio, Video, Data) during emergencies in real-time. Overcome silos by enabling you to share information, between first responders, schools, and private security personnel, when you need it.

- 1. IWS Edge Client Has a way of allowing drag and drop of participants and creating an active incident. Sharing audio/video data.
- 2. Multimedia PTT Client Group communication to share audio/video data.
- 3. Radio Gateway Interconnection Monthly charge for connecting the radio gateway to the hosted solution
- 4. Video Gateway Interconnection Monthly charge for connecting the radio gateway to the hosted solution
- 5. Telephone Interconnection Monthly charge for connecting the radio gateway to the hosted solution (Wireline)
- 6. Soft Panic SW Allows customer to create an incident with predefined participants automatically

Product Overview:

Intelligent Video

The Intelligent Video solution is a turnkey advanced video management system with hosting and management options and distributed architecture. It can provide monitoring in areas that previously have been out to range because of high cost or limited connectivity. It can be a force multiplier, a deterrent to crime, and it may provide protection against litigation due to increased levels of video documentation.

Product Overview:

Verizon Grid Wide simplifies the path to intelligent electric / water / gas grid modernization. Grid Wide Connected Utilities helps you modernize your grid at your own pace. It makes it easy to use Internet of Things (IoT) technology and services to connect your operations with near real-time data. As a result, you can more easily and remotely monitor, manage and control your utility systems. As Intelligent Energy helps you modernize your grid, it also helps you get better at doing all of the following:

- Improve efficiency and cost controls
- Balance grid loads while enhancing customer experience and quality of service
- Reduce service downtime with near real-time demand monitoring
- Promote conservation efforts with more efficient operations and resource distribution

Pricing Overview:

Grid Wide Service Plan	
	This plan Is Not eligible for access fee discounts.

Note: Network coverage includes the Verizon Wireless 4G network. Current data coverage details and additional plan information can be found at www.verizonwireless.com. Only Verizon Wireless Grid Wide 4G LTE devices and firmware can be activated on this plan. The Grid Wide Service includes a hosted platform-as-a-service for deploying and managing utility metering equipment integrated with the Grid Wide firmware. Activation on this plan requires a fixed/stationary meter endpoint device. This plan is NOT to be used in the mobile environment and is only available for domestic use. Billing system limitations may require services to be set up on multiple billing accounts. Detailed billing information will only be available online and the account will require its own unique log in credentials. All charges and taxes will be billed in advance. The Grid Wide Service can support integration with other systems. Any integration with other systems will require additional terms and fees.

¹The Grid Wide Platform Implementation fee will be billed to Customer upon the SOW Effective Date. Customer agrees to pay the implementation fee by the due date indicated on the invoice.

²Electric AMI - Term Subscription pricing requires a minimum initial bulk purchase of 100 Electric AMI licenses within 30 days of the Effective Date of the Amendment/Agreement. Additional licenses may be purchased thereafter in minimum amounts of 100 licenses. Such additional licenses will be coterminous with the current term of previously purchased licenses. Fees for additional licenses will be prorated based on the amount of time remaining in the current license term. At the end of the current term, all licenses will automatically renew for 12 months, and will continue to renew every 12 months, unless changed to a different subscription term or terminated by either Party with at least 30 days' Legal Notice prior to the end of the initial term or renewal term.

No unused portion of Electric AMI - term subscription initial license fees, additional license fees, or renewal licenses fees are refundable or transferrable. Customer agrees to pay license fees by the due date indicated on the invoice.

Action Log: X Verify Log is attached

Product Overview:

Group First Response provides the next tier, in terms of Push To Talk features. Group First Response is based on international 3GPP standards (Mission Critical Push To Talk (MCPTT)), that ensures that the user gets "LMR like" features. Specifically it allows, fast setup time, ability to handle very large groups, and a strong security and priority handling. Group First Response is only supported on certain devices, as it requires the device to support specific hardware capabilities. The mobile devices need to support QCIs that are needed for LTE QoS. Please refer to the "Devices" section for a list of devices supported. All features that are available with Push Talk Plus, Group Advance and Group Command are included as part Group First Response. In addition, the following features are only available to the Group First Response tier.

- LTE Network supported Quality of Service (QoS), Priority, and Preemption (QPP). In times of network congestion, it is important to give priority to First Responders compared to other users, otherwise, congestion can impair a user's experience such as slow application response, delayed downloads, or even worse, no service.
 - QoS: Verizon will attempt to give priority to the user, so the user gets guaranteed bit rate through the LTE network. This ensures that the PTT event has enough bandwidth, on the LTE network, to reach its destination.
 - Priority: Verizon will attempt to give precedence to the Group First Response user, over another user's application or usage of the network.
 - Preemption: Verizon will attempt to give higher priority traffic to take over resources assigned to lower priority traffic.
- End-to-End Encryption. End to end encryption only applies when all participating clients are using R10.0 client. End-to-end encryption is supported for 1:1 private PTT calls and group PTT calls.

- Talk group Affiliation. A User can be part of a Talk Group but it will not receive any traffic until it affiliates to that Talk Group. This reduces clutter for the user and effectively filters unwanted communication from non-priority groups. This also allows support for very large talk groups, during times of national/state disaster with 1000s of possible users that can use these groups.
- Very large Group First Response group. Up to 300,000 users can be assigned to a single Talk Group. At any
 given time up to 3000 users can be affiliated to the Talk group to receive services such as PTT and
 messaging.

 - Priority: Verizon will attempt to give precedence to the Group First Response user, over another user's application or usage of the network.
 - Preemption: Verizon will attempt to give higher priority traffic to take over resources assigned to lower priority traffic.
- End-to-End Encryption. End to end encryption only applies when all participating clients are using R10.0 client. End-to-end encryption is supported for 1:1 private PTT calls and group PTT calls.

- Talk group Affiliation. A User can be part of a Talk Group but it will not receive any traffic until it affiliates
 to that Talk Group. This reduces clutter for the user and effectively filters unwanted communication from
 non-priority groups. This also allows support for very large talk groups, during times of national/state
 disaster with 1000s of possible users that can use these groups.
- Very large Group First Response group. Up to 300,000 users can be assigned to a single Talk Group. At any
 given time up to 3000 users can be affiliated to the Talk group to receive services such as PTT and
 messaging.

ATTN: Mr. Chris Jennings (CJ)

NASPO ValuePoint Contract Administrator

RE: NASPO ValuePoint Master Service Agreement #MA152 (the "Contract") with Verizon Wireless

("Contractor")

Dear Mr. Jennings:

Action Requested:

Contractor requests to add the product(s) and/or service(s) referenced in this document (collectively, the "Products") to the Contract.

Action Log: X Verify Log is attached

Product Overview:

Provide a CIPA compliant premier Web Filtering Solution for Verizon Wireless MiFi JetPacks as part of a Back to School Mobility offer for SLED customers . Verizon Secure Cloud Gateway (SCG) is the selected web filtering solution that was launched in 2018 for wireline Enterprise customers. This is an operational project to enable SCG SLED SKUs on Verizon Wireless solutions catalog, so that sales reps can sell SCG as part of the Back to School Mobility offer to SLED customers. Education – K-12 school districts

MA152 Wireless Data, Voice, and Accessories Attachment V Category 3 Subcategory Definitions

Item	Application	Definition	
А	Fleet Management	Allows the management of tasks associated with managing a fleet of vehicles through the use of telematics or remote sensing devices.	
В	Mobile Device Management /Enterprise Mobility Management (MDM/EMM)	Mobile device management/enterprise mobility management (MDM/EMM) are solutions IT organizations use to manage and support end users' mobile devices, applications and data, and to enforce enterprise security policies.	
С	Mobile Integration/Mobile Substitution Solutions	 Network-based solutions that allow the integration of a user's mobile device and a desk phone, and provide a number of other business-oriented features. As a minimum, solutions meeting this criteria will provide: Single Number Reach or the ability for a user to be reached at a single business telephone number. Calls to that single telephone number would ring at both the user's desk phone or mobile device either through simultaneous and/or sequential ringing. Single Voicemail Box for calls to that single business number. 	
D	Workforce Management	Workforce management solutions are systems that organizations use to manage personnel who are mobile or regularly operate outside of a fixed office or work location. Functions typically include supervisory monitoring, time and attendance tracking, enforcing pay/workforce rules, scheduling, planning, task management, capacity planning, budgeting, forecasting, and other related functions	
E	Field Service Management	Systems that support the management of field service operations typically managing service orders, dispatching technicians, work planning, route optimization, time recording, maintenance data collection/analysis and other related functions.	

F	Mobile Data Collection/Mobile Forms	A solution(s) that allow mobile users with cellular-equipped tablets or smartphones to collect data and possibly other information (e.g. pictures, videos, audio notes, locations, etc.), which is then sent over the cellular network to a cloud storage facility from which it can be accessed or downloaded by the customer.
G	Traffic Management and Intelligent Transport Systems (ITS)	Systems implemented by local governments to manage the flow of vehicle and potentially pedestrian traffic to reduce congestion, improve efficiency, reduce energy waste, improve safety and optimize road utilization.
Н	Snow & Ice Removal and Route Management	Systems that would be used by government (and potentially other) agencies to manage road clearing operations resulting from snow storms or other weather events. Functions might include vehicle location, monitoring road conditions, dispatch, materials management, time clock, workforce monitoring, reporting, and other related functions.
I	Public Safety Systems	Any system that would be used by public safety organizations (e.g. Police, Fire, EMS, etc.) in executing their duties. Those functions might include multimodal communications, locating resources, managing responses, routing and dispatching, building and site intelligence, ongoing monitoring and detection systems, and other related functions.
J	IoT Management	Solutions to monitor, manage and maintain networks of Internet of Things (IoT) devices. Functions might include maintaining inventory, monitoring health/performance, measuring utilization, security maintenance, diagnostics and troubleshooting, downloading software/firmware updates, executing remote commands (e.g. turn off/on, reboot, etc.), logging/reporting, and other related functions.
K	Energy Conservation/ Management	Systems that optimizes the operation of the heating, cooling, lighting and other energy consuming systems within buildings enabling building owners to track energy usage, improve energy conservation, and manage energy economics and sustainability compliance.
L	Building & Facilities Automation	Similar to Energy Conservation/Management but focused on a wider range of systems including building access, security, and other functions to improve occupant comfort and security, ensure efficient operation of building systems, reduction in energy consumption and operating costs, and improve the life cycle of building utilities.
M	Enterprise Messaging	A messaging solution offered as an alternative to traditional SMS/MMS and offering enterprise-grade security, archiving, and retrieval geared for the messaging requirements of organizations with stringent security requirements.
N	Secure LAN Access	A cellular wireless service providing a secure end-to-end virtual private network (VPN) type connection between a mobile device and to the customer's local area network (LAN).
Р	Health and Human Services	Systems to support telemedicine, remote medical care, patient monitoring and other applications related to health and medical care.
Q	Education	Systems to monitor, manage and provide remote education including but not limited to distance learning and educational IoT applications related to K-12 and higher education
