List on file.

**EXISTING LAND USE PLAN:**

NORTHWEST COUNTY (RED ROCK) - OPEN LANDS

NORTHWEST COUNTY (RED ROCK) - RESIDENTIAL RURAL

**PROPOSED LAND USE PLAN:**

NORTHWEST COUNTY (RED ROCK) - MAJOR PROJECTS

**BACKGROUND:**

**Project Description**

General Summary

- Site Address: N/A
- Site Acreage: 2,010 (approx.)

The request is to consider an amendment to the Clark County Master Plan and associated land use map for Red Rock. The Plan Amendment is the next step in the Major Project process, after consideration of a Public Facilities Needs Assessment and Specific Plan.

**Applicant's Justification**

The applicant states the requested Major Projects (MP) land use category will ensure that the development will progress in an orderly fashion and in compliance with the goals and objectives established in the Northwest County Land Use Plan.

The Gypsum Reclamation Specific Plan is envisioned to be as a sustainable village that merges the desert landscape with the built environment. While reclaiming the lands that have been strip-mined for decades, the community plan embraces the unique qualities of the area, preserves view corridors, creates public access, and implements a "complete community" vision. The mixed-use

village core, located in the center of the community on lands leveled by mining, incorporates the most diverse mix of land uses in a pedestrian-oriented environment. The residential villages and neighborhoods include a wide variety of housing types, density ranges, sizes, and price levels. To ensure proper transition from residential to the natural environment, large lot rural density homes will be placed at the edges of the community. Lastly, a comprehensive open space, parks, and trails system links the neighborhoods to the natural environment and provides for both the active and passive recreational needs of residents and guests.
