BACKGROUND:

The District has a standardized catalog of Microsoft applications including its Office Suite, E-mail server, database software, and the Windows Operating System for desktops and servers. To properly support the Microsoft applications, additional software is needed to improve functionality, enhance security, and leverage Microsoft services subscriptions and Cloud technologies for future growth and disaster recovery. Additionally, the District has an ongoing annual requirement to purchase various Information Technology Solutions hardware, software, related equipment, and services to support its business networks and operational needs. This procurement will meet these various needs.

Staff recommends that the Board approve and authorize the General Manager to sign a Master Enterprise Licensing Agreement and a Select Plus Licensing Agreement, inclusive of any modifications to the agreements thereafter, with Microsoft Corporation for Microsoft Licenses.

The following are the pertinent provisions of the Microsoft Licensing agreements with Microsoft Corporation:

- The term of the agreements is from date of award and will continue until terminated by either of the parties thereto;
- The agreements include the option to terminate or suspend for cause or convenience by either party with 30 day and 60 day written notice respectively.
