- Site Acreage: 15.48
- Project Type: Wall height
- Wall Height (feet): 9

History & Site Plan

WS-19-0503 was approved in August 2019, allowing walls up to 9 feet in height to be located along the front property lines of 19 undeveloped lots located along Jensen Street and Grand Canyon Drive. The application has since expired; however, front walls were constructed on 2 lots located on Jensen Street prior to the expiration.

A companion zone change, ZC-26-0339, has been submitted to remove 18 lots from the Neighborhood Protection (RNP) Overlay so that a waiver may be requested to increase the wall heights where front walls have not been constructed. The submitted site plan depicts 17 single-family residential lots with 8 undeveloped lots and 3 developed lots facing Jensen Street, along with 6 undeveloped lots facing Grand Canyon Drive. The front wall is depicted to be set back 10 feet from the front property lines of each of the lots along Jensen Street and Grand Canyon Drive. Each lot includes 1 wrought iron gate at the driveway that is set back 20 feet from the front property lines along the streets.

Landscaping

Landscaping is not required or a part of this request.

Elevations

The site plan includes a detail of the proposed front wall which is comprised of a 5 foot block wall with 8 courses of decorative smooth face CMU with light earth tone, a 3 foot wrought iron fence on top, and 9 foot tall columns including a decorative cap and 1 foot tall light fixture on top. The columns would be a maximum of 50 feet apart as measured center to center. The detail of the wrought iron gate indicates it will be up to 9 feet in height at the center.

Applicant's Justification

The applicant states the requested wall configuration has been thoughtfully designed to balance security, aesthetics, and visibility. The CMU base provides durability and privacy at the pedestrian level with the wrought iron portion maintains openness and reduces the visual mass of the wall. The decorative cap and integrated lighting enhance the overall appearance and contribute to site safety. The proposed wall height is consistent with existing perimeter walls in the surrounding area. The applicant states that granting this waiver will not negatively impact adjacent surrounding area, as the design remains compatible with typical perimeter treatments and will improve both functionality and visual quality of the site.

STANDARDS FOR APPROVAL:

The applicant shall demonstrate that the proposed request is consistent with the Master Plan and is in compliance with Title 30.

Analysis**Comprehensive Planning**Waiver of Development Standards

The applicant shall have the burden of proof to establish that the proposed request is appropriate for its proposed location by showing the following: 1) the use(s) of the area adjacent to the subject property will not be affected in a substantially adverse manner; 2) the proposal will not materially affect the health and safety of persons residing in, working in, or visiting the immediate vicinity, and will not be materially detrimental to the public welfare; and 3) the

proposal will be adequately served by, and will not create an undue burden on, any public improvements, facilities, or services.

A similar wall configuration was previously approved under WS-19-0503. The height and location of the walls will be compatible with other existing front walls in the area. The proposed walls will be on lots that are between 0.75 acres and 1 acre in size. The majority of the front yards will still be open, and the existing and future single-family residences will still be visible from the streets. Therefore, staff can support this request.
