LAND USE PLAN:
SPRING VALLEY - COMPACT NEIGHBORHOOD

BACKGROUND:
Project Description

General Summary

- Site Address: N/A
- Site Acreage: 6.5

Applicant's Justification

The applicant states the request is compatible with the surrounding area since the Urban Neighborhood (UN) designation would be an ideal buffer between the commercial uses to the south and west, and the residential uses to the north and east. Additionally, the UN designation is appropriate since the site is located near 2 major streets, Desert Inn Road and Durango Drive, and the commercial center that the site is located in has struggled over the years where a higher density residential use can bring more business to the area. There is a need for higher density multiple family residential in-fill projects throughout Spring Valley and the Las Vegas Valley. The proposed amendment will not result in any additional impacts on surrounding infrastructure not already contemplated in the area.

STANDARDS FOR ADOPTION:

The applicant shall demonstrate that the proposed request meets the goals and purposes of the Master Plan and Title 30.

Analysis

Comprehensive Planning

The applicant requests a change from Compact Neighborhood (CN) (up to 18 du/ac) to Urban Neighborhood (UN) (greater than 18 du/ac). Intended primary land uses in the proposed Urban Neighborhood land use designation include single family attached and detached homes, duplexes, triplexes, fourplexes, townhomes, and multiple family. Supporting land uses include accessory dwelling units, multiple family dwellings, and neighborhood serving public facilities.

Staff finds the request to redesignate the site to Urban Neighborhood (UN) to be too intense for, and not compatible with, the surrounding area. The site is immediately adjacent to an existing R-2 zoned single family residential subdivision to the north that is planned for Mid-Intensity Suburban Neighborhood (up to 8 du/ac) uses. The nearest property currently designated UN is over 1.75 miles away. The nearest R-5 zoned property is over 2 miles away. Existing R-4 zoned properties are nearly a mile away, and those properties are separated from single family residential developments by public rights-of-way.

Staff finds the current Compact Neighborhood (CN) designation to be more appropriate for the site, as the CN designation provides a more suitable transition and buffer from the adjacent R-2 zoned subdivision to the north to the adjacent C-2 zoned properties to the south and west. Additionally, the adjacent and existing multiple family development to the east is zoned R-3 and planned CN. Pursuant to Title 30 (Table 30.44-1), multiple family residential in the C-2 zone is only permitted as a mixed-use development at a maximum density of 18 du/ac. Therefore, the CN designation at up to 18 du/ac would be more appropriate adjacent to any potential multiple family residential on the C-2 zoned properties to the south and west. The request to UN does not comply with Policy 6.2.1 of the Master Plan which promotes ensuring the design and intensity of new development is compatible with established neighborhoods and uses, or Policy 1.4.4 which encourages in-fill development that is compatible with the scale and intensity of the surrounding area. Therefore, staff cannot support the proposed request.
