Applicant characteristics

The Assistance to Firefighters Grants Program's objective is to provide funding directly to fire departments and nonaffiliated EMS organizations or a State Fire Training Academy for the purpose of protecting the health and safety of the public and first responder personnel against fire and fire-related hazards. Please review the Notice of Funding Opportunity Announcement (NOFO) for information on available program areas and for more information on the evaluation process and conditions of award.

Please provide the following additional information about the applicant.

Please describe the critical infrastructure protected below.	The immediate response area encompasses long stretches of Interstate 15, a transcontinental shipping route that is one of Union Pacific Railroad's main lines, and 45 miles of natural-gas-supply pipeline. Critical infrastructure also includes power-generating

stations, Nellis Air Force Base (which is slated to be the primary training ground for the F-35 that will maintain the superiority of our air power through the technology of this weapon system), Hoover Dam, Davis Dam, large complexes of liquid petroleum tanks, BMI Complex (production site of chlorine gas, chlorine liquid and titanium), and Switch Communications. Numerous festivals and recreational sites, including Lake Mead, attract visitors from around the globe. Regional firefighters provide structure and wildland fire protection, emergency medical services, backcountry/technical rescue, and hazardous materials mitigation. The rural, primarily volunteer personnel are frequently first-on-scene for traumatic incidents involving all area roadways, interstates, and railyards. Crucial to interstate commerce, hazardous materials and large numbers of people traverse the area. Interstate 15 (I-15), is one example. It is a major Interstate Highway in the western United States, running through Southern California and the Intermountain West. I-15 begins near the Mexican border in San Diego County and stretches north to Alberta, Canada, passing through the states of California, Nevada, Arizona, Utah, Idaho, and Montana.

Do you currently report to the National Fire Incident Reporting System (NFIRS)? You will be required to report to NFIRS for the entire period of the grant.

What is your organizations operating budget (e.g., personnel, maintenance of apparatus, equipment, facilities, utility costs, purchasing expendable items, etc.) dedicated to expenditures for day-to-day activities for the current (at time of application) fiscal year, as well as the previous two fiscal years?

Current fiscal year: **2023**

Does your department have any rainy day reserves, emergency funds, or capital outlay? **Yes**

What is the total amount currently set aside? **280000.00**

Describe the planned purpose of this fund. **County statute requires this reserve in the case of economic downturn (lost/decreased revenue) and/or unforeseen emergencies, including widespread/severe property damage; injury or death of residents; immediate action to protect the health, safety and welfare, as determined by the fire chief; matching funds for grants to repair damage caused by a natural disaster.**

Multiple communities within this region's immediate response area, including all of Moapa Valley, are federally recognized as disadvantaged communities highly subject to economic and climate hardships. More than one in twelve people live in poverty, and more than one in ten people [under the age of 65] live with disabilities (census.gov). Because it is a special district, Moapa Valley Fire Protection District is exclusively responsible for all expenses related to personnel, apparatus, facilities, equipment, capital purchases, and administrative overhead. The vast majority of the operating budget is allocated toward fixed-cost items needed to operate three fire stations and support sixty uniformed personnel and other expenses such as utilities, fuel, uniforms and training. In

2022, little more than five-thousand dollars remained of \$953,389 revenue dollars once expenses of \$948,268 were paid. Revenue was from consolidated tax, transport fees, wildland revenue, and interest income. Expenses consisted of salaries/benefits, professional services, repairs and maintenance, insurance, medical, supplies and equipment. Moapa Valley receives no funding from city or county general funds. Despite a 30% increase in call volume over the last five years, the revenue level—which comes from consolidated sales tax—declined due to COVID and remained stagnant. Alternate, unsuccessful attempts to secure funding include requests to HSGP, AFG, and American Rescue. As illustrated by re-furbishing, re-mounting, and donation-based projects, below, MVFPD does a lot with a little. Although no capital outlay was budgeted last year, the district had to quickly cutback on essentials and re-allocate funds when the district's 20-year old SCBA's went out of service and ambulance replacement could no longer be delayed. Because no repair parts were available, new SCBA's for each seat in first-due apparatus had to be immediately procured at a cost of \$175,000. The district ambulance was frequently out of commission for three years. The cost of repairs and the time the ambulance was out of service kept increasing. Because there was no money for a new ambulance, MVFPD did a re-mount instead of a new purchase. Other recent investments include refurbishment of a rescue truck. The \$147,000 project was necessary to keep the apparatus in service. Additionally, in order to house volunteer firefighters, MVFD is currently repurposing a donated double-wide office trailer. With exception of the Fire Chief, the District is entirely staffed by volunteers.

In cases of demonstrated economic hardship, and upon the request of the grant applicant, the FEMA Administrator may grant an Economic Hardship Waiver. Is it your organization's intent to apply for an Economic Hardship Waiver?

No

Is your department facing a new risk, expanding service to a new area, or experiencing an increased call volume?

Yes

Please explain how your department is facing a new risk, expanding service to a new area, or experiencing an increased call volume.

Ongoing increases in hazardous materials transportation and of solar arrays with lithium ion storage add risk. Call volume has increased 30% in the last 5 years, yet maintaining and training the volunteer firefighting force is progressively more difficult. Climate change, the challenges of and lessons learned from the pandemic,

and corresponding regulatory agency requirements have forced substantial operational changes to regional emergency-response procedures. Additionally, Nevada’s largest solar plant opens this year. The 18-square mile plant is within the Districts’ first-in area providing mutual aid response to Clark County. Emerging industries in the valley are shipping more ammonia than ever before. At least 15 tier 2 hazmat facilities may necessitate CCFD-rural and MVFPD response.

What is your seasonal increase in population (number of people)?

Please describe your organization and/or community that you serve.

Moapa Valley Fire District (MVFD) is a combination, all-hazard fire department supported by 60 volunteers and just 1 paid firefighter operating out of 3 stations to protect roughly 267 square miles in rural Clark County in Southern Nevada. The response area of MVFD includes the communities of Moapa, Logandale and Overton, as well as Federal, State, and local recreation areas such as the Lake Mead National Recreational Area, Logandale Trails System, Valley of Fire, Lost City Museum, and Overton Wildlife Management Area. The rural nature of the area, the critical infrastructure within it (detailed above in this application), and the continuous need for interagency operability all demand that reliable communication equipment be made available to firefighters. Regional firefighters provide structure and wildland fire protection, emergency medical services, backcountry/technical rescue, and hazardous materials mitigation. Inter-agency cooperation is essential. Contributing factors include increasing call volume, intensifying natural disasters, an abundance of critical infrastructure, a population base that is predominantly low-income and vulnerable to hazards, and the rural nature of the response area. Moapa Valley's volunteer personnel are frequently first-on-scene for traumatic incidents involving all area roadways, interstates, and railyards. Public lands adjoin and surround the district. Response depends largely on the volunteer departments because most Federal firefighting resources are only deployed seasonally. The majority of the open space is managed by the Bureau of Land Management, National Park Service, Fish and Wildlife Service, or US Forest Service. In line with the Southern Nevada Operating Plan, all jurisdictions provide mutual aid during the initial attack period (24 hours). The permanent resident population is just over 13,000. Seasonally, the population

swells with the arrival of special events and temporary residents. Snowbirds increase the population by as much as 1,100 people. Easily accessible from Las Vegas, numerous festivals and recreational sites attract visitors from around the globe. In addition to Lake Mead tourism, the Clark County Fair & Rodeo has the largest draw, bringing 120,000 participants annually. Placing extreme demand on the firefighters, other events that attract thousands of people each year include the Bluegrass Festival, the Fall Festival Car & Motorcycle Show, the Pomegranate Arts & Crafts Festival, the Hump N Pump 4-Wheeler Fair, and multiple marathons.
