PA-25-700017 and ZC-25-0220 were approved on the site on June 2025. The approved zone change reclassified the site to RM18 zoning and this application was not associated with any proposed design for future development.

The applicant proposes 337 single-family detached homes within 32.36 acres. All of the proposed lots face internally to the site. Access is provided along the south property line adjacent to Vegas Valley Drive. The homes are front-loaded, with garages oriented towards the internal private streets, except for Lot 18, that is proposed as a side loading lot. The proposed development includes open space areas adjacent to the primary entries from Vegas Valley Drive.

STANDARDS FOR APPROVAL:

The applicant shall demonstrate that the proposed request is consistent with the Master Plan and is in compliance with Title 30.

Analysis

Comprehensive Planning

This request meets the tentative map requirements and standards for approval as outlined in Title 30.

Staff is not supporting the proposed Tentative Map as submitted. Ultimately, staff is concerned with the numerous deviations from Title 30 standards for a site that is undeveloped and could be redesigned to align more closely with Title 30. Additionally, staff is not supporting the companion waiver of development standards via WS-26-0332 as well as PUD-26-0329. While the proposed development could help to activate a long-term unused area and is an in-fill development in the neighborhood, the density combined with the modified development standards of the proposed PUD will not be compatible with the character of the surrounding area. For these reasons, staff cannot support this request.

Staff Recommendation

Denial.

If this request is approved, the Board and/or Commission finds that the application is consistent with the standards and purpose enumerated in the Master Plan, Title 30, and/or the Nevada Revised Statutes.
