

PLANNED UNIT DEVELOPMENT
(TITLE 30)

UPDATE
RUSSELL RD/BONITA VISTA ST

PUBLIC HEARING

APP. NUMBER/OWNER/DESCRIPTION OF REQUEST

NZC-21-0295-OMNI FAMILY LP:

ZONE CHANGE to reclassify 5.0 acres from a C-2 (General Commercial) Zone to an R-3 (Multiple Family Residential) Zone.

USE PERMIT for an attached (townhouse) planned unit development.

WAIVERS OF DEVELOPMENT STANDARDS for the following: **1)** reduce setbacks; **2)** reduce private street width; **3)** allow modified A-curb and ribbon curb with an inverted crown; **4)** reduce street intersection off-set; and **5)** allow modified private residential driveway design.

DESIGN REVIEWS for the following: **1)** an attached single family residential planned unit development; and **2)** finished grade.

Generally located on the north side of Russell Road and the east side of Bonita Vista Street within Spring Valley (description on file). JJ/rk/jd (For possible action)

RELATED INFORMATION:

APN:

163-29-801-008; 163-29-801-009

WAIVERS OF DEVELOPMENT STANDARDS:

1. a. Reduce setback for residential units to a sidewalk to 1 foot where a minimum of 10 feet is required per Section 30.24.080 (a 90% reduction).
- b. Reduce setback for the front face of garage to a street to 4 foot where a minimum of 10 feet is required per Section 30.24.080 (a 60% reduction).
- c. Reduce setback for residential units to a parking curb to 5 feet where a minimum of 10 feet is required per Section 30.24.080 (a 50% reduction).
2. Reduce the width of a private street to 30 feet where a minimum of 37 feet with 36 feet of drivable surface is required per Chapter 30.52 (a 19% reduction).
3. Allow modified A-curb and ribbon curb with an inverted crown where Uniform Standard Drawing 210.S1 is required.
4. Reduce street intersection off-set to 66 feet where a minimum of 125 feet is required per Chapter 30.52 (a 47% reduction).
5. Reduce the distance from property line to a private residential driveway to 3 feet where 6 feet is required per Uniform Standard Drawing 222 is required (a 50% reduction).

DESIGN REVIEWS:

1. An attached (townhouse) planned unit development.

2. Increased finished grade to 36 inches (3 feet) where a maximum of 18 inches (1.5 feet) is the standard per Section 30.32.040 (a 100% increase).

LAND USE PLAN:

SPRING VALLEY - COMMERCIAL GENERAL

BACKGROUND:

Project Description

General Summary

- Site Address: N/A
- Site Acreage: 5
- Number of Lots: 78
- Density (du/ac): 15.6
- Minimum/Maximum Lot Size (square feet): 1,132/1,258
- Project Type: Attached (townhouse) planned unit development
- Number of Stories: 2 & 3
- Building Height: Up to 35 feet, 10 inches
- Square Feet: 1,235/2,050
- Open Space Required/Provided: 19,621/48,008
- Parking Required/Provided: 204/204

Neighborhood Meeting Summary

The applicant conducted a virtual neighborhood meeting on January 5, 2021 as required by the nonconforming amendment process, prior to formal filing of this application. All owners within 1,500 feet of the project site were notified about the meeting. There were 8 attendees present at the meeting for this item. The attendees had questions on the design and layout of the project. According to the applicant overall, there were no objections raised by the neighbors.

Site Plans

This request is for a nonconforming zone change to reclassify approximately 5.0 acres to an R-3 zone for a proposed attached (townhouse) planned unit development. The plans depict an attached single family residential development consisting of 78 residential lots with a density of 15.6 dwelling units per acre. The development consists of townhouse, residential dwellings under separate ownership that are attached to 1 or more dwellings on opposite sides of the structure.

The proposed development features a total of 15 buildings, made up of 4 plex, 5 plex, and 6 plex buildings designed around 30 foot wide private streets. The street network consists of 1 main drive with a loop street around the center of the project. The townhomes are designed with garages facing the private streets. The development will be served by a single point of ingress/egress to the west from Bonita Vista Street. A network of common open spaces is located throughout the development, which will include on-site pedestrian paths, gazebo, picnic tables, BBQ's, benches, and a dog park. Parking will consist of garage parking for residents and designed surface off-street parking for visitors. Approximately 48 parking spaces are shown for

the visitors and 156 parking spaces are provided for the residents. Sixteen visitor parking spaces are located on Bonita Vista Street.

Per Title 30, many of the development standards for planned unit developments are established by a use permit process based on the plans that are approved for the project by the Board of County Commissioners. The minimum setbacks and height for each of the townhouse units are the following:

- Front face of garage - 4 feet (from the edge of the private street)
- Front living area/architectural intrusions - 4 feet
- Side street (corner) yard - 5 feet
- Interior side yard – 8 feet between buildings; zero feet between units
- Rear living area - 5 feet to common element
- Rear courtyard/patios - zero feet to common element
- Perimeter - 10 feet
- Height – 35 feet 10 inches

The plans indicate that an increase in grade to 36 inches is required due to typical grading constraints. The increased fill will be generally located along the eastern and northern boundary lines.

Landscaping

Street landscaping consists of a 15 foot wide area, which includes a 5 foot wide detached sidewalk along Russell Road, and a 6 foot wide area behind an attached sidewalk is shown along Bonita Vista Street. Along the north and east property lines, there is a 5.5 to 10 foot wide landscape buffer with trees shown 20 feet on-center. Internal to the site, a network of common open space areas is located throughout the development, which will include on-site pedestrian paths, gazebo, picnic tables, BBQ's, benches, and a dog park. The development requires 19,621 square feet of open space where 48,008 square feet of open space is provided.

Elevations

The plans depict 4 plex, 5 plex, and 6 plex residential units with 4 different elevations. The units will be both 2 and 3 stories with a maximum height of 35 feet 10 inches and feature pitched, concrete tile roofs. All units feature consistent and unified architecture throughout the exterior design of the buildings. The building materials generally consist of stucco and stone veneer accents, which include horizontal and vertical articulation on all elevations. Decorative window variations and trimming are featured on all elevations, in addition to wrought iron railings utilized for the patio decks. Additionally, design variations have been incorporated into the overall design of the garage doors facing the private streets.

Floor Plans

The plans depict 3 bedroom units with 4 different floor plans that range from 1,235 square feet to 2,050 square feet. The first floor of every unit will contain a 2 car garage.

Applicant's Justification

The applicant states the subject property is an in-fill site, and will serve as a transitional land use from the single family R-2 developments on the north of the drainage channel and the planned commercial development on the south side of the drainage channel. The proposed project will have less impacts on the area than the approved land use of Commercial General. It will generate less traffic and have a similar use (dwellings) as most of the area.

According to the applicant, the waivers of development standards are appropriate since the development is lower density than typical attached developments. The reduced setbacks to the street are internal to the subdivision street and will not impact the adjacent properties or future residence of the development. Furthermore, the reduced street width is suitable since the streets function as a drive aisle, providing access to garages similar to multiple family developments. The design will meet all fire access requirements and meet turning movement requirements. Lastly, each home will provide a 2 car garage.

Prior Land Use Requests

Application Number	Request	Action	Date
ZC-0721-08	Reclassified this site to C-2 zoning for a future commercial development	Approved by BCC	September 2008

Surrounding Land Use

	Planned Land Use Category	Zoning District	Existing Land Use
North*	Commercial Neighborhood	R-2	Single family residential
South	Commercial General	R-E	Undeveloped
East	Commercial General	C-2	Undeveloped
West	Public Facilities	R-E	NV Energy substation

*Directly to the north is the Red Rock Drainage Channel.

The subject site and surrounding properties are in the Public Facilities Needs Assessment (PFNA) area.

TM-21-500093	A tentative map for 78 lots on 5 acres is a companion item on this agenda.

STANDARDS FOR APPROVAL:

The applicant shall demonstrate that the proposed request meets the goals and purposes of Title 30.

Analysis

Current Planning

Zone Change

The applicant shall provide Compelling Justification that approval of the nonconforming zoning boundary amendment is appropriate. A Compelling Justification means the satisfaction of the following criteria as listed below:

- 1. A change in law, policies, trends, or facts after the adoption, readoption or amendment of the land use plan that have substantially changed the character or condition of the area, or the circumstances surrounding the property, which makes the proposed nonconforming zone boundary amendment appropriate.*

According to the applicant, development trends within this portion of the Spring Valley Township have changed over the past few years, with an emphasis toward single family residential development. Most of the property with commercial land use designations north and west of the project site have residential zoning with existing homes. This request appears to be warranted in this area as a transition from residential to commercial zoning to the east and south. In addition, approved RUD zoning under NZC-19-0257 is located 400 feet north of the currently proposed community.

To the north and northwest of the project site is an existing single family residential development that is zoned R-2; however, the land use plan designates this site for Office Professional and Commercial Neighborhood development. Since 2014 several parcels located between Durango Drive and Riley Street, and between Russell Road and Mesa Vista Avenue that are designated for commercial development in the land use plan have been reclassified into residential zoning districts and developed with single family and multiple family residential developments. The trend in this area is for additional residential development and less commercial development. The proposed zone change to R-3 for single family residential development is consistent and compatible with existing and approved development in this area and is appropriate for this location.

- 2. The density and intensity of the uses allowed by the nonconforming zoning is compatible with the existing and planned land uses in the surrounding area.*

According to the applicant, the proposed density and intensity will result in a land use of like intensity when compared to adjacent residential developments to the north of the project site. There will also be no impacts to the NV Energy substation directly to the west of the project site.

The project is bounded to the north by an existing flood control channel adjacent to a single family detached residential R-2 zoned development; to the west by an existing NV Energy Substation; to the south by undeveloped future commercial development; and to the east by undeveloped future commercial development. Staff finds that the density and intensity of the proposed project, a single family residential development with a density of 15.6 dwelling units per gross acre, are compatible with existing and planned land uses in the surrounding area. Also there remains a demand for housing, particularly for sale housing that is attainable in the

southwest; therefore, the proposed density and intensity will result in a land use that is consistent with the surrounding residential area.

- 3. There will not be a substantial adverse effect on public facilities and services, such as roads, access, schools, parks, fire and police facilities, and stormwater and drainage facilities, as a result of the uses allowed by the nonconforming zoning.*

There has been no indication from service providers that this request will have a substantial adverse effect on public facilities and services. The school district has indicated that this development would generate 13 additional elementary school students, 7 middle school students, and 10 high school students. Rogers Elementary School, Sawyer Middle School and Durango High Schools are all currently under capacity and can accommodate the additional students.

- 4. The proposed nonconforming zoning conforms to other applicable adopted plans, goals, and policies.*

The applicant indicates this project complies with several of the recently adopted Comprehensive Master Plan Urban Land Use Policies. The project provides amenities such as pedestrian paths, recreational pool area with an indoor gym, play structure, picnic areas, and a dog park within the complex, which complies with Urban Land Use Policy 51, which encourages developments to provide amenities for residents. Urban Land Use Policies encourage quality townhome developments with certain architectural elements and designs in mind. Specifically, Policy 43b encourages projects that provide varied neighborhood design and/or innovative architecture. Lastly, this request complies with Comprehensive Master Plan Housing Policy 2 to promote a mix of housing types that meet the diverse needs of the community.

Summary

Zone Change

Staff finds that there is a trend changing the character and condition of the area which makes this request appropriate. The density and intensity of the proposed project are consistent and compatible with existing and planned developments in this area. There has been no indication that the proposed project will have an adverse effect on public services or facilities in this area. The proposed project complies with other goals and policies within the Comprehensive Master Plan. Staff finds the applicant has provided a Compelling Justification to warrant approval of the nonconforming zone boundary request.

Use Permit

A use permit is a discretionary land use application that is considered on a case by case basis in consideration of Title 30 and the Comprehensive Master Plan. One of several criteria the applicant must establish is that the use is appropriate at the proposed location and demonstrate the use shall not result in a substantial or undue adverse effect on adjacent properties.

A planned unit development (PUD) is intended to maximize flexibility and innovation in residential development by utilizing area sensitive site planning and design to achieve a desirable mixture of compatible land use patterns that include efficient pedestrian and vehicular traffic systems, streetscapes, and enhance residential amenities. The design of the project is not a

typical single family residential development; however, the standards for planned unit developments allow flexibility in design to provide for innovative and unique development options. The design is unique and innovative in that it allows for individual home ownership rather than a rental option of an apartment unit or the ownership of airspace like the typical condominium development. To mitigate the impact of the proposed structures, the buildings are designed with variations in height, roof pitch, and other architectural enhancements. Staff finds the proposed development provides an appropriate land use transition to the existing residential development and commercial land uses within the immediate area; therefore, recommends approval of the use permit.

Waivers of Development Standards

According to Title 30, the applicant shall have the burden of proof to establish that the proposed request is appropriate for its existing location by showing that the uses of the area adjacent to the property included in the waiver of development standards request will not be affected in a substantially adverse manner. The intent and purpose of a waiver of development standards is to modify a development standard where the provision of an alternative standard, or other factors which mitigate the impact of the relaxed standard, may justify an alternative.

Waiver of Development Standards #1

Staff finds the proposed residential unit and garage setback reductions will have minimal to no impact on this development and will be internal to the site; therefore, staff recommends approval of this waiver.

Design Review #1

Architectural enhancements are provided on all sides of the proposed residences. Staff finds that the design of the residences comply with Urban Land Use Policy 43 which promotes projects that provide varied neighborhood design and/or innovative architecture that includes varied setbacks from residences to front property lines, varied rooflines, and/or architectural enhancements on all sides. Staff finds the design of the proposed development is effective for both pedestrian and vehicular safety and is compatible with the surrounding residential and commercial development within the area.

Public Works - Development Review

Waiver of Development Standards #2

Staff has no objection to the request to reduce the width of the private streets provided that Fire Prevention approves the request.

Waiver of Development Standards #3

Staff has no objection to allowing an "A" curb or Ribbon curb with an inverted crown on the private streets within the proposed subdivision. The applicant must show and provide evidence that this request will not be detrimental to the subdivision.

Waiver of Development Standards #4

Staff has no objection to the reduction in the street intersection offset between Bonita Vista Street and Drive "B". With Bonita Vista Street terminating in a public cul-de-sac adjacent to the site and an NV Energy substation as the only other site with access, the subdivision should see a

low volume of traffic, mitigating potential impacts from the reduction in the street intersection off-set.

Waiver of Development Standards #5

Staff has no objection to the reduction in the distance from the driveway to the property line. The applicant provided open space to act as a buffer between each of the unit blocks to minimize hazards for drivers traveling through the site and exiting the garages.

Design Review #2

This design review represents the maximum grade difference along the boundary of this application. This information is based on preliminary data to set the worst case scenario. Staff will continue to evaluate the site through the technical studies required for this application. Approval of this application will not prevent staff from requiring an alternate design to meet Clark County Code, Title 30, or previous land use approval.

Staff Recommendation

Approval. This item has been forwarded to the Board of County Commissioners for final action.

If this request is approved, the Board and/or Commission finds that the application is consistent with the standards and purpose enumerated in the Comprehensive Master Plan, Title 30, and/or the Nevada Revised Statutes.

PLANNING COMMISSION ACTION: August 3, 2021 – APPROVED – Vote: Unanimous **Current Planning**

- Resolution of Intent to complete in 4 years;
- Maximum of 78 residential lots;
- Enter into a standard development agreement prior to any permits or subdivision mapping in order to provide fair-share contribution toward public infrastructure necessary to provide service because of the lack of necessary public services in the area;
- Certificate of Occupancy and/or business license shall not be issued without final zoning inspection.
- Applicant is advised that the County is currently rewriting Title 30 and future land use applications, including applications for extensions of time, will be reviewed for conformance with the regulations in place at the time of application; a new application for a nonconforming zone boundary amendment may be required in the event the building program and/or conditions of the subject application are proposed to be modified in the future; a substantial change in circumstances or regulations may warrant denial or added conditions to an extension of time; and that the extension of time may be denied if the project has not commenced or there has been no substantial work towards completion within the time specified.

Public Works - Development Review

- Drainage study and compliance;
- Drainage study must demonstrate that the proposed grade elevation differences outside that allowed by Section 30.32.040(a)(9) are needed to mitigate drainage through the site;
- Traffic study and compliance;

- Full off-site improvements.
- Applicant is advised that the installation of detached sidewalks will require the vacation of excess right-of-way and granting necessary easements for utilities, pedestrian access, streetlights, and traffic control; and that approval of this application will not prevent Public Works from requiring an alternate design to meet Clark County Code, Title 30, or previous land use approvals.

Clark County Water Reclamation District (CCWRD)

- Applicant is advised that a Point of Connection (POC) request has been completed for this project; to email sewerlocation@cleanwaterteam.com and reference POC Tracking #0226-2020 to obtain your POC exhibit; and that flow contributions exceeding CCWRD estimates may require a new POC analysis.
