#### Use Permit

A special use permit is considered on a case by case basis in consideration of the standards for approval. Additionally, the use shall not result in a substantial or undue adverse effect on adjacent properties, character of the neighborhood, traffic conditions, parking, public improvements, public sites or right-of-way, or other matters affecting the public health, safety, and general welfare; and will be adequately served by public improvements, facilities, and services, and will not impose an undue burden.

The proposed business will meet the requirements for auto body paint and repair business in an IP and IL zones. Due to the location of this site within the accident potential zone for Nellis Air Force Base, a special use permit is required to determine if there may be additional factors which would make the use incompatible and/or inconsistent with Base operations. Staff finds the business will be compatible and consistent with the area and base operations. Staff also finds that the business will not negatively impact abutting residential developments to the north since it is approximately 140 feet from the building to the residential developments and all the work will be done inside. Therefore, staff recommends approval of this request.

### **Staff Recommendation**

Approval.

If this request is approved, the Board and/or Commission finds that the application is consistent with the standards and purpose enumerated in the Master Plan, Title 30, and/or the Nevada Revised Statutes.
