---

Task Order RP.D0923009A, BETWEEN CLARK COUNTY, NEVADA, hereinafter referred to as "COUNTY", and LGA Architecture (LGA), located in Las Vegas, Nevada, hereinafter referred to as "CONSULTANT" for the following PROJECT:

The Clark County Office of the Coroner/Medical Examiner (CCOCME) is the agency charged with investigating deaths in Clark County, Nevada, under defined circumstances, including criminal, violent, suicidal, and unattended deaths. Established as a standalone Coroner/Medical Examiner office in 1980, the agency currently operates out of 1704 Pinto Lane, Las Vegas, NV 89106.

The existing facility, originally constructed in 1975 as a church, no longer adequately supports CCOCME's operational needs. Over the past three years, the case load has increased by 50%, driven by both population growth and expanding service demand. In addition, the aging facility requires frequent maintenance, further limiting its functionality.

As part of a recent master plan study, all existing facilities on the Pinto Campus were evaluated to determine their potential to support CCOCME's future needs. The study identified the ambulatory building currently leased by UMC at 1524 Pinto Lane as the most suitable structure for the relocation of CCOCME operations. To fully support this transition, the master plan also recommends the construction of a new parking garage and the installation of perimeter fencing to secure the campus and ensure an appropriate level of safety.

The project will consist of three components, delivered through two procurement methods:

Remodel of the Existing Ambulatory Building – The building at 1524 Pinto Lane will be renovated to accommodate the administrative and operational functions of the CCOCME.

Perimeter Fencing and Access Control – Approximately 1,430 linear feet of new perimeter fencing will enclose the Pinto Campus. Vehicle access points will be located at six identified locations, as shown in the Pinto Lane Campus Master Plan 2.0. The design shall incorporate vehicle access control in coordination with Clark County's access control vendor, as well as pedestrian gates for staff and visitors.

The fencing shall comply with RPM design standards and match the established campus color palette. Fencing shall be a minimum of 8 feet in height, powder-coated wrought iron, with curved spear points at the top for enhanced security.

Parking Garage – A new four-story parking structure, approximately 36,502 SF, will be constructed on the south side of the campus along Pinto Lane. Ground Level: ~79 parking spaces, including 7 ADA stalls, with a 13-foot floor-to-floor height. Security measures shall be incorporated at the ground level to protect vehicles. Levels 2–4: ~92 spaces per floor, with a 12-foot floor-to-floor height. The structure shall be designed by RPM standards, with an emphasis on durability and low maintenance.

Delivery methods will be as follows:

---

The perimeter fencing and parking garage will advance through schematic design, then be completed using a design-build delivery method.

The ambulatory building remodel will follow a traditional design process.

This phased approach ensures that CCOCME will have a secure, functional, and future-ready facility that meets both immediate operational needs and long-term growth requirements.
