

VERBATIM TRANSCRIPT OF A PORTION OF THE REGULAR BOARD OF COUNTY COMMISSIONERS MEETING HELD SEPTEMBER 21, 2021 REGARDING THE FIRST PUBLIC COMMENT.

00:30:59

YOLANDA KING

So, Madam Chair, Item Number One on your agenda for today is public comment.

MARILYN KIRKPATRICK

'kay, this is the first time set aside for public comment on any Items on our agenda. If I could just ask that - when you come forward to speak, please state and spell your name for the record. Please, no clapping and everybody will have three minutes. And I have approximately thirty-five cards so - we will go through the process. I'm not going to - so - I'm not gonna call your names cause I don't wanna misspell anybody's names but you can just line up at the podium and what I'll do is - I'll go through the cards as I see you and then - if I miss anybody, I'll - do a final call for anybody that would like to speak, so good morning Miss Coleman. It's almost afternoon.

MARGARET ANN COLEMAN

Yes, good afternoon Commissioners; I stayed due to the fact of having more to say. One of the items you have is o - overdose - recognition. You guys have created this epidemic of overdose approving we for the I's. The psychotic drug for the mind of controlling the feelings but mainly the brain just to open up that brain center across the street. That is an illegal tactic. As you know Thirteen Sixteen a Wizard is rightfully mize cause I paid for it. Two thousand and one to two thousand and seven only this land ends a property, so that - that redevelopment in which Shanta Mulhughes - I mean -- taken from me and now you guys have placed Shanta Coleman in control and not giving me my respect as a family member with the same last name. And contacting me and sayin Miss Coleman, I know of you winning this money and the Board Members and Weekly have overpowered your rights. God is on the side of the people. Judgement Day is here today, now, every day when you think

COLEMAN

wrong and do wrong. And you're not really fully helping all as myself and I know that for a fact. I'm still homeless. My daughter is still psychotic and taking these - these opportunities smoking some herb that's supposed to be controlling their eyes but is mentally destroying their brain and stagnating us. Twenty years is of correction. The twenty-one year is for us all to have freedom, justice, and equality. And that is it. You'd think that two thousand and twenty-two is gonna arrive but if you don't correct these problems of your lies and theft on me, personally (unintelligible) am a sun goddess that's been viewed by the sun to given an opportunity to be viewed, properly dealing with nature. Shanta Covin hates me. She don't like me because if she did she wouldn't default. She has - she has no title - titlement to have control over my money. She knows about this. She should step down, or contact me, and involve me because Weekly left a seat that I should be sittin' in empty.

KIRKPATRICK

Thank you, Miss Coleman. Next speaker, please.

COLEMAN

(UNINTELLIGIBLE)

KIRKPATRICK

Thank you, Miss Coleman. Next speaker, please. If you could state and spell your name for the record, that'd be great.

GINA GIAMBRA

Does my three minutes start before my name or after?

KIRKPATRICK

No, starts after.

GIAMBRA

Okay. Hello, my name is Gina Giambra, G-I-A-M-B-R-A I'd like to start off by saying God bless America, and our Constitution and freedoms. I'm gonna go fast here so. Addressing or ca - calling a public meeting to the Metropolitan Police Department and Joe Lombardo as soon as possible. Addressing a call for public hearing to actually get answers from questions we ask you, the panel. Addressing every time, we have come in here to oppose items. These items are still getting passed. Please explain this to us

GIAMBRA

peons. Addressing how many of you are being paid to sign off on items that go against Nevada's constitution, the U.S. Constitution and what we the people oppose. Addressing voting machines and hackers switching votes. We know some of you weren't elected but still got your position. In the next elec - election here, we already know it's going to be violated because of what's going on in California. We know that you guys follow California's lead oh dark lord Sisolak. Addressing calling on the school police who are protecting monarchs such as yourself and not standing for the oath they took or what oath do our school and park police take? Addressing masking children, it should be outlawed period. And vaccines which are not even vaccines. They're gene altering poisons. Everybody on this panel needs to be arrested for crimes against humanity if you allow forced masks and jobs on our children and people. Nevada is one of the only states you cannot seek compensation for medical injury and not force masks and jobs that cause mask health issues ranging to death. Yes, masks cause enormous health issues and job severe injury and death. I understand most workers from nine to five such as yourself do not have the time to research true medical science that's not bought and paid for by the CCP. That's why we the people bring it here for you guys. Well you guys seem to overlook every piece of data we come to you with. Why? To us, that spells out corruption. Simple political math. I'm not sure where in Nevada constitution it says that people have to listen to the Commissioners Board and the Health District regarding their bodies to go in public. Because you monarchists are illegally going against Nevada constitution in Section Eight A, victims of crimes have rights and you're making the cities victims of crimes. You continue to violate so many sections of the Nevada constitution, just in Section One let alone Section Four. Have your lawyers let you guys know that? If you continue this path with our children, workers, teachers, police, and military forcing them to do things they don't want to do, businesses and institutions will

GIAMBRA

lose in the long run. As we the people will not condone or stand for this. Ultimately, that will lead to rebellion, a revolution and possibly the next world war on the land of the Las Vegas valley. Now please tell me, is that what you want, bloodsheds - bloodshed on the streets of Las Vegas? It's your civil duty to address and assure the public you don't want bloodshed on Las Vegas valley roads. Because you are not stupid and understand the long-term possibilities. One nation under God we pray. Let's also remember eventually David did have to throw the stone at - against Goliath. Do you guys really want to know the jab ingredients? No, okay, well, there you go.

KIRKPATRICK

Thank you ma'am. Can I get you to sta - to spell your last name for the record please?

GIAMBRA

My father was William Joseph Giambra. He was a boxer from - Buffalo , Nev - Buffalo, New York and he brought us here in Las Vegas.

KIRKPATRICK

Can I just get you to spell your last name?

GIAMBRA

G-I-A-M-B-R-A. I'm half Sicilian.

KIRKPATRICK

Okay, thank you. Next speaker, please.

JAMES BUTLER JR

J-A-M-E-S B-U-T-L-E-R Junior I stopped asking myself why that you guys act the way you do and the School District too, the School Board, I stopped ask - you guys are obviously being paid by somebody else. You're being pa - not by the United - you're gettin' something on the side. Everybody realizes this. We're all sick of this stuff. This is communism and you know it. I didn't - I'm - I wonder, did we sign up for this stuff through the secret applications on these phones? Did we sign up for communism somehow because that's the attitude we're getting? Like, we already signed up for this s*** and it's already over. I'd like to know; did we sign up communism through hidden contracts with the Chinese on these phones? Did we sign up for hidden contracts? I mean, I'm tellin' ya, because this seems like you - it's - it's flat.

BUTLER JR

There's no life in you people. It's like we're already screwed. I rejected the computer up until like three years ago because my kid was giving my problems at school. So, I rejected that s***. You know what? I feel so happy today. I'm not brainwashed. Youse are sold out. There's nothing else. The School District, they don't look at - nobody looks at nobody. I wanna know who's payin' your bills? Who's - who's payin' your bills, that's what I ask you. You know it's bull****, you do.

KIRKPATRICK

Thank you. Next speaker, please.

MINDY ROBINSON

It's Mindy Robinson M-I-N-D-Y R-O-B-I-N-S-O-N
I'm here because my commissioner Justin Jones wants to label free speech as a public safety crisis to quote unquote take any action deemed appropriate toward it - to fight vaccine misinformation. Like you have that right at all. Let's talk about who's really spreading misinformation here. So, every post you do online about the vaccine will be flagged as safe. Except there are no long-term studies, there's no generational side effects, the short-term side effects are pretty debilitating and fatal, and all the animals died during testing. Does that sound safe to you? Last week, Rolling Stone did an article where injured people were getting turned away from the hospital cause there were so many Ivermectin overdoses. That entire story was false. No cases like that existed there and the doctor they quoted didn't even work there. Speaking of Ivermectin, Fauci doesn't want to recommend it but do you wanna know what he did recommend? Remdesivir. Based on a whole study of one person. What he failed to mention was that it was cut short because it has a fifty-four percent mortality rate. One third of the people were getting kidney and organ failure and dying. Does that sound safe to you? Fauci did the same thing when he recommended AZT to AIDS patients. Only one person survived the AZT test. One person in the placebo group that didn't take it. Does that sound safe to you? Or does that sound like misinformation to trick people into taking

ROBINSON

something? Fauci illegally funded and created this virus to kill us, and he did it with a foreign enemy. And that's who you people are taking your medical advice from? Not - not we the people with all our facts and studies. Doctor Evil that's trying to kill us. Your job as a representative is not to do with a murderous doctor wants. Your job is to do what we the people want. And you're supposed to uphold the Constitution while you do it. You want to dismiss me away as a conspiracy theorist, but you can't debunk anything I said. This is all online if you really look for it and get off Google. First off, discussing the side effects of an experimental injection is not a danger to our democracy. We are not a democracy. Democracy is mob-rule. We are a constitutional republic. And the Constitution protects us from people like you coming in and taking our property, our rights, and our freedom. You are pushing people to fight for their lives, their children, their country. Do you think we're just gonna give it up because you just do whatever the hell you want? Because you've got a socialist on your Board because you've got people who don't care about the constitution even though it's in your job requirements. You've gotta decide what side you're gonna be on in history. You wanna be the side of right? You wanna be on the side that's poisoning everybody? Just remember, you're gonna have to face us when you leave your houses and when you go out cause we're gonna be here. We're waitin' for you.

KIRKPATRICK

Thank you. Next speaker, please.

UNIDENTIFIED

(UNINTELLIGIBLE)

KIRKPATRICK

No clapping, thank you.

ROBINSON

I'm clappin'

KIRKPATRICK

Go ahead.

ANDREA PUZZI

Hi, my name is Andrea Puzzi. I'm here on behalf of my children. I don't think people realize how important they are today. They're our future and

PUZZI

we're mandating stuff for them. That isn't fair. My children are currently not in school because of a religious exemption and I'm waiting to hear back from Clark County School District lawyers. So, my children are not getting the education that they deserve at this time. So, I just hope that everyone realizes our freedom of speech and teaching our children, we're all looking and they're all watching us. So, I hope they can make the right decision.

KIRKPATRICK

Thank you. Next speaker, please.

SHELIA STIRLING

Thank you. Shelia Stirling with an I. S-T-I-R-L-I-N-G. When the approved narrative gives false witness and false facts, and thousands and thousands of physicians and renowned scientists are silenced from speaking the truth, the people, we must speak up. We wanted to believe in you. We wanted to believe that you'd do the right thing. Because we elected you to stand up for the people and for our rights and for the Constitution of the United States. But that's not what's happening. So, when the inventor of the MRNA vaccine comes out and states and warns this vaccine is not safe, it is not meant for humans, do not take it, his voice has been pretty much silenced but there are probably a few million people that have heard his voice and I think we all better take heed. Because there's hundreds and thousands of people dying that don't have to. To allow false statements and lies that have cost thousands of lives and keep it going and have that be the narrative, that's criminal. And now you want to silence and punish and try to label people that are actually speaking the truth? You want to label us as dangerous or terrorists o - whatever you want to do and be able to take action against the citizens? Not only is that not constitutional, it's against the Nevada Constitution but it's really against common sense. If you knew, if you don't know the truth, find the truth. I'm happy, I'm a blood specialist and I'm happy to give you all the information that you need to understand what's really happening here. And if you do understand what's happening and are

STIRLING

pursuing this course of action anyway, then you become criminal yourself and will be held accountable. It's just not right. Your resolution is - is really pushing of - the false narrative. And we just hafta stop. We hafta seek to have the truth cause there's only one truth. And this is still America. And this is still the United States of America. And you have to know that so many our citizens we're being treated like we are in Communist China. When the studies of Ivermectin, you can't get ivermectin in - in this state even though all over the world and there's been huge studies where it has cut eighty-five percent to ninety percent of all deaths from COVID, so why would Nevada outlaw it? Why is the government telling the pharmacies not to fill the prescriptions? When Remdesivir causes kidney failure within five to seven days and then as people come down, they put 'em on a ventilator. Ninety-seven percent of all people put on ventilators never make it off. Why? Because it causes inflammation in the lung. It pushes the COVID back into the lung and eventually die.

KIRKPATRICK

Thank you.

STIRLING

Please -

KIRKPATRICK

Next - next speaker, please.

ERIC JANG

Good afternoon, yes, good afternoon - Commission, Commissioners, my name is Eric Jang E-R-I-C J-A-N-G, my address is eighty-seven forty Autumn Valley Avenue, Las Vegas, NV in eight nine one two nine. I wish to speak on Item Number Nineteen, on the - the new contract for the voter registration system. Nothing - specific, I just wanted to give a quick shout-out. Next Tuesday is National Voter Registration Day and want to commend the Commissioners and especially the Clark County Election Department with our Registrar Joe Gloria with our - with his - right hand - Miss Lorena. How tremendous the job they're doing. And that's for Item Nineteen. And lastly a little bit of personal privilege; I'm a son of a

JANG

evangelical missionaries. We moved very early - back to Asia and where my parents run a church. Eighteen years ago, the first coronavirus, SARS, hit us really hard. I was in middle school. We had to mask for four year. My graduation was cancelled. At that time, many parents, like many of the people here were scared. We have a lot of misinformation. Taiwan, as many of you'll know, oh yeah, our little flag's here, is a target of China for the last fifty years. We didn't know what was happening. We wore our masks, we washed our hands, we took our vaccine. Eighteen years later, we're still strong, we're still standing, and now we're supplying the world's more than half of your microchips. For every car, we help with it. So that's my personal privilege of saying that it gets better, and we can live - we can fight through this together.

UNIDENTIFIED

(UNINTELLIGIBLE)

JANG

So, thank you so much.

UNIDENTIFIED

(UNINTELLIGIBLE)

KIRKPATRICK

Thank you. Next speaker please, next speaker, please. Do not speak out,

UNIDENTIFIED

Boo

KIRKPATRICK

Next speaker please.

MAGALIENE ENYARD

Thank you. Magaliene Eyard E-N-Y-A-R-D and first of all, I'd like to say that I feel it's very important all of us got to come together in peace and - pray that we can solve anything thats go on. Because everything happens for a reason alright, and it wouldn't happen, and everybody is not involved in the reason whether it's bad or good. Everybody's not involved. And I've seen some - bad reasons in - neighborhoods, very very dirty. And - I like to comment on Las Vegas Boulevard, one of the worst streets, to me, named after the city, Las Vegas. Somebody is in for it for that, not being upkept - abandoned buildings. Graffiti all over

ENYARD

everywhere. Just ridiculous for a street named after the city. Then I walk through other sss - streets, like Charleston, Martin Luther King. Now if dirt - I mean not just put there, it's been there for years. And even the - orange - cement border across the street from this building, it's orange in color, I live behind it. Whoever put that up four feet, whatever, behind it, they did not pick up the trash. They just put it in front of the trash, and you can go see yourself. I saw that and I think that's ridiculous but everybody on the Board, everybody in community cannot be in fault of that. That got to fall on certain people. And that should be straightened out because like I say, everything happens for a reason whether it's a good reason or a bad reason. And we need to straighten out these reasons, to be honest Okay, thank you.

KIRKPATRICK

Thank you. Next speaker, please.

KELLY ADKISON

My name is Kelly Adkison, for the record. That's A-D-K-I-S-O-N. Well, we know you guys don't listen to facts. We know don't listen to your Nevada constituents. We know you don't follow science. So the truth is, I'm not here to do any of those things. I'm here to redo a Notice of Maladministration. We're submitting two today. One regarding Number Ninety-Six and one regarding Number Sixty-Six agenda items. Notice to agent is notice to principal and notice to principal is notice to agent, whereas your sworn oaths of office con - constitutes a contract with the people of Nevada. As bonded trustees involuntary indentured servants, it is your duty to carry out the wishes of the people that granted authority for you to handle the peoples' business. When you violate your oath, you've committed a breach of contract. Whereas the people have the absolute right to regulate their internal government and are guaranteed the right to reform, alter, or abolish government whenever the public good may require it. Article One, Section Two of the Nevada Constitution, when you ignore the peoples' grievances, you've committed a breach of trust.

ADKISON

Whereas regarding Agenda Item Ninety-Six, the free exercise and enjoyment of religious profession and worship without discrimination or preference shall forever be allowed in this state. And no person shall be rendered incompetent to be a witness on account of his opinions on matters of his religious belief. But the liberty of conscience hereby secured shall not be so construed as to excuse acts of licen - licentiousness, hard tough word, or justify practices inconsistent with the peace or safety of this state. Article One, Section Four of the Nevada Constitution licentiousness is the indulgence of the arbitrary will of the individual without regard to ethics or law or respect for the rights of others such as Agenda Item Ninety-Six. The resolution of censorship, whereas every citizen may freely speak, write, and publish his sentiments on all subjects being responsible for the abuse of that right and no laws shall be passed to restrain or abridge liberty of speech or of the press. Article One, Section Nine of the Nevada Constitution. Agenda Item Ninety-Six is a resolution of censorship. The people shall have the right to freely - have the right freely to assemble together to consult for a common good, to instruct their representatives, and to petition the Legislature for address of grievances. Censuring the people's right to assemble, consult, in - instruct and redress their grievances is a violation of Article One, Sections Nine and Ten of the Nevada Constitution and the first amendment of the Constitution of the United States of America.

KIRKPATRICK

Thank you. Next speaker, please.

UNIDENTIFIED

Good work woman

UNIDENTIFIED

Come on

BONNIE MCDANIEL

Good morning, my name is Bonnie McDaniel. I am not a public speaker. I - I'm a sixty-two-year resident of Las Vegas and a forty-year open heart and head trauma nurse. Masks are more harm and do more harm to people than they do good.

MCDANIEL

If you take your paper mask Marilyn, and put it over a can of boiling water, you will find bugs and worms crawling out of it. Those bugs and worms will crawl up your nose and into your brain. That is a fact. Do it when you get home today. Masks inhibit the flow of oxygen to the bloodstream and lungs causing red blood cells to shrink and not be able to take up the oxygen needed for e -every organ of the body. Shrinking red cells cause sticky blood cells - clots, strokes, and heart attacks. The vaccine causes the spike proteins in the vaccine, it causes the cells to explode killing parts of the organ. They do not stay in the arm where they - where the shot is given. In fact, the spike protein is the COVID germ and spreads rapidly causing COVID-19 in your body. You don't need any part of the rest of the vaccine. It replicates over and over again in every cell and is never gone out of the body. You will never cure COVID-19. These vaccines cause more problems for people, and especially for children causing harm to their vo - re - rep - reproductive organs which, in the long run, may cause them to be sterile or deliver malformed children. Do you want that on your heads because it is on your heads and Tig, you should be paying attention and not reading your computer?

UNIDENTIFIED

Yep

UNIDENTIFIED

(UNINTELLIGBLE)

MCDANIEL

This vaccine was developed - ma -this vaccine was developed, not tested to reduce the population of the world. This is the world's gas chambers as in World War II for the Jews. Never should a vaccine be mandated or law - or made law in order to prevent some from working. For some cannot take them because of pre-existing conditions or they already have the antibodies because they had COVID or they have just a damn good immune system. Not to mention, it's against the law in the Nuremburg code. And every one of you can be sued for the Nuremburg code. Don't fall into that group that - that

MCDANIEL

makes such rulings. You personally could have - could be held responsible. And if it comes down to it, we will take you to court. Stop listening to the politicians and do -Dr. evil Fossi who's in the - who's making millions by having this - by developing this vaccine and paying for it out of his funds. Thank you.

KIRKPATRICK

Thank you. Next speaker, please. Please do not clap. Please. 'kay, next speaker.

UNIDENTIFIED

Thank you.

UNIDENTIFIED

Thank you.

CLARK BOSSERT

Hi, my name is Clark Bossert C-L-A-R-K B-O-S-S-E-R-T and I'd like to just read Ninety-Six so everybody's fresh. It says discuss approving a resolution declaring health misinformation a public health crisis and take any action deemed appropriate. What I'd like to say is that this such a bad look. This is such a bad look for you. To even put this, you know, on the agenda to say hey, we're going to discuss having health information - health misinformation be a public health crisis. And then take any action deemed appropriate? I mean, I don't know if you realize the optics of how this sounds. It sounds so bad. It sounds so draconian. It sounds so Unamerican. And this is the type of thing that we all notice. We all notice this. We're here, we're reading it. People in Nevada care about this stuff and we're not having it. So, private discussions about COVID are always gonna happen. My background is in engineering and in central finance. I've spent my career in higher education and my wife is an ICU nurse. And, I had COVID. Obviously, it's - it's a real disease and I still, you know, cannot taste substantially what I used to. But, you know, science, you know math, physics, biology, chemistry are perfect, but our understanding of those scientific disciplines is not perfect. And then our application, you know of providing vaccines, trying to have a scientific remedy to COVID is even worse. And, you know, I'm all for science, that's what I've spent my background

BOSSERT

in, I work in that, but, you know, I don't appreciate only having one narrative. It's - It's not acceptable, it's not okay. You know, my wife sees things in the hospital and my other friends in the medical field here in Las Vegas, they say all the time, I've got a patient, he just came in. You know, twenty-six-year-old male, bilateral pulmonary embolism, and a look in the chart and he'll have, you know, Pfizer or Modera two weeks earlier. And the hospital administration will say bury it, just bury it. And these are the types of things that, you know, we're talking about and you can't limit that type of conversation and so, of course, there is an official narrative that the government is trying to put out and there's an agenda behind it and I don't know what orders are being passed down to you but I'm saying, that, you know, we want to have a great Board of Commissioners. And we want to have a Board of Commissioners that's responsive to what Nevadan what - what Nevadans are seeking and wanting. And, this is just completely in the opposite spirit, you know, and it just sounds like such a punishment. You know, that - that, they would be considered a public health crisis. So, our understanding, if anybody claims that they're understanding of COVID is perfect, they're a total liar. So, even, you know, Fauci or anybody throughout the last eighteen months that said I know ex- exactly what's happening, I know what we should do, and I know where we should go from here is just not true. So, this is an adapting thing and to cut out or criminalize private discussions or discussions on Facebook or elsewhere saying hey, this is what I'm seeing, that's just totally wrong. And of course, it's fine if the CDC has their narrative but you know, don't even try to step on people's rights to have -

KIRKPATRICK

Thank you. Next speaker, please

BRIAN DAVIS

Brian Davis. Here to speak on - Item sixty-six and - ninety-six. I served you guys with a Notice of Mal - Maladministration. There's a lot of things I could say that might be

important to me - or important to people in the crowd or people in the town but what I think is most important to bring to your attention is what might be important to you guys. If you guys haven't seen Project Veritas and especially the latest video they just released, I encourage you to take some breaks before you vote on this and go watch this ten-minute video. Because, the truth is turning, turning the tide and I don't know if you guys have noticed that, but the tide is turning on this subject. You guys want to be on the right side of history? I encourage you to not vote yes on these items, okay? You don't want this to lead to something even worse for you guys. The optic is on where you're at right now. The optic is on your vote. People are watching what happens. And if you guys vote down freedom of speech, freedom of action, with what chure doing here, it's not gonna go well for you. People are gonna remember what chu did here today. I encourage you guys to take a break, look at that video, realize the tide is turning against you. And vote accordingly. You guys understand? You guys all hearin' me? Tick you hearin' me?

UNIDENTIFIED

Mmhmm

DAVIS

Okay, good, good. William, you got - you get that? You get the tide is turning?

KIRKPATRICK

Mi-Mister Davis, if you could keep it to the whole Board as a whole.

DAVIS

-the whole Board, okay.

KIRKPATRICK

Yeah.

DAVIS

You guys all hear me then, right? You guys all hear me? Okay, so the tide is turning and I encourage you guys to realize that. Vote with the people, not against them.

KIRKPATRICK

Thank you. Okay?

DAVIS

I got a minute.

KIRKPATRICK 'kay, go ahead.

DAVIS Alright. There's no rush, right. You guys can take a little break? Figure out whatcha need to do in the next few minutes. Let's see, what else was I gonna say. Something important. (No audible dialog) Well, it's not comin' to me right now. You know how it is, standing up here, thinkin' about whatcha gonna say for a while, say what's important, you sit down and then it comes back. (No audible dialog) Can I wait until he comes back? No.

KIRKPATRICK Sorry, thank you Mister Davis. I'll let you go your next fifteen seconds.

DAVIS (No audible dialog) Alright, he's back. I can go.

KIRKPATRICK Thank you. Next speaker, please.

JULIE PANG-KEE Is it my turn?

KIRKPATRICK Mmhmm

PANG-KEE My name is Julie Pang-Kee and I'm here to tell you -

KIRKPATRICK Miss Pang-Kee, can I get you to spell your last name, please?

PANG-KEE P-A-N-G hyphenated K-E-E

KIRKPATRICK Okay, go ahead.

PANG-KEE I'm here to point out something about Agenda Ninety-Six. It's addressing misinformation. So far right now misinformation is going round right now that the COVID-19 vaccine is safe, effective, and keeps you from contracting it and spreading it. So, here's what I wanna tell you. I don't know why you keep telling people that the COVID-19 vaccine prevents the spread of COVID-19 and protects people. If you're worried about misinformation concerning the mad scientist Fauci, Wuhan 19 - COVID 19 my wu attack virus, maybe you should cover your tracks

PANG-KEE

carefully. You let Allegiant Stadium give false hope and false sense of security to who knows how many people on the day of the first Raiders game in Nevada. Your propaganda favorite search engine Google states that people had to have proof of vaccination of COVID-19 to enter the stadium to see the game. However, it clearly shows on all the Google searches that the vaccine takes two weeks to become fully effective so why did you think they could enter the stadium with false protection? Stop trampling on our constitutional rights. We are watching and we will expose you. You can't silence us. This is medical fascism.

UNIDENTIFIED

Amen

UNIDENTIFIED

Amen

KIRKPATRICK

Thank you. Next speaker please.

BRIAN LAMORTE

Good afternoon. Sergeant Major s -Brian Lamorte L-A-M-O-R-T-E. Will be kinda s - short here. You're stepping on our - our rights. It's tyranny. And I've been overseas, and I've seen tyranny in action. I've stood in torture chambers in Afghanistan. I don't want to see it here. You're going down a slippery slope and it scares the crap outta me. I didn't fight twenty-six years in special forces to stand here in front of you guys and explain to you you're on a slippery slope. Please think about what chure doing. Don't step on our rights, it's the Constitution. And I hafta ask the - the Commissioners if their loyalty is to the Constitution or is your loyalty Justin Jones? Have a good day.

KIRKPATRICK

Thank you, sir. Next speaker, please.

LENEE NASTAV

Good afternoon. Also, on Item Number Ninety-Six, my name is Lenee Nastav L-E-N-E-E N-A-S-T-A-V. You don't know me, but you'll remember me. Not only am I an American citizen, forty-eight years strong, I'm also an intelligent, awakened citizen with common sense. Being an American citizen is not only in my mind, it is in my

NASTAV

heart and in my soul of which you have no access or governing right to. What does this mean? It means I'm an American patriot. But most importantly, it means I'm not afraid of the likes of you. You're the ones who are afraid of people like me. You're afraid of we the people. You the Commissioners and all other elected officials currently in office fear us and not the other way around. We are not afraid of you or your mandates or fearmongering. Here's a fact that can't be censored; according to the Library of Congress in Nineteen Fourteen, the start of World War I, John Basil Barnhill, an author and lecturer, who was engaged in debates against socialism, wrote when the people fear the government, there's tyranny. When the government fears the people, there's liberty. Former President JKF remarked - on the twentieth anniversary of the Voice of America, Department of Health, Education, and Welfare, February Twenty Sixth, Nineteen Sixty Two, stated we are not afraid to entrust the American people with unpleasant facts, foreign ideas, alien philosophies and competitive values. For a nation that is afraid to let its people judge the truth and falsehood in an open market, is a nation that is afraid of its people. You want to censor free speech regarding experimental COVID-19 gene therapy drug, its side effects and number of deaths. You think that you can censor truth and facts and control our minds. Well, I can tell you that you cannot control or manipulate me nor can you manipulate the written constitution of the United States of America nor the written constitution of the State of Nevada. Declaration of Independence reads we hold these truths to be self-evident that all men are created equal. That they are endowed by their creator certain in - inalienable rights that among these are life liberty and the pursuit of happiness. That to secure these rights, governments, that's you, are instituted among men deriving their just powers from the consent of the governed. That's us. According to the National Archives dot gov, John Adams, the second President of the United States, gave the following statement during his

NASTAV

argument for defense in December Seventeen Seventy; facts are stubborn things. In whatever may be our wishes, our inclinations, or the dictates of our passions, it cannot alter the state of facts in evidence. I will close my statement with the Constitution of the State of Nevada. The Nevada Constitution was framed by a convention of delegates chosen by the people and was approved by the vote of the people in territory of Nevada in Eighteen Sixty-Four. In the Declaration of Rights, Article One, Section One, of this constitution states all men are - are by nature, free and equal and have certain inalienable rights among which are those are enjoying and defending life and liberty, acquiring, possessing, and protecting property, pursuing and obtaining safety and happiness. In Article One, Section Nine, regarding liberty and speech of the press, it states every citizen may freely speak, write, and publish his sentiments on all subjects, being responsible for the abuse of that right. And no law shall be passed to restrain or abridge freedom of speech or of the press in all criminal prosecutions and civil actions for libels, the truth may be given in evidence to the jury and if it shall appear to the jury that the matter or charge is libelous, is true, and was published with good motives, and for justifiable ends, the parties shall be acquitted or exonerated. Please adhere to the constitutions of our country and of our state. Please vote no for censoring freedom of speech.

KIRKPATRICK

Thank you. Next speaker, please.

ANGEL RIVERA

My name is Angel Rivera A-N-G-E-L R-I-V-E-R-A. this is about resolution number ninety-six. Just want to talk about how the devil is in the details. Vagary is an open platform that leads to abuse of power. The way Ninety-Six is worded is very vague about misinformation and actions taken against mis - misinformation. So I ask you this; what are you considering as information? Is it anything that goes against your weaponized narrative? Is it new information that is vital for the public to know? Who decides what the information is? Is it you, a small panel of

RIVERA

power-hungry oligarchs? The corrupt media? Or the pharmaceuticals who profit from sickness and suffering. And what platforms will you be monitoring to - for this misinformation? Are you going to monitor our social media, our protests, independent news sites? And what actions do you plan to take against us? Are you going to shut us down, are you going to ban us, take us into court or even incarcerate us? And how far do you plan to take this? After the mandates, what's next, religion, education? All these are details that you're either ignorant of or you're hiding. Either way, this is proof you're afraid the people because you're trying to rush us through at the end of the assembly. Just as the corrupt elite managed to use political correctness to breach the first amendment, so this agenda will be used to systematically dismantle our first amendment rights. Rights that were given to us by gods. Rights that an entire kingdom was defeated for. So once again the devil is in the details. Vagary's an open platform that leads to the abuse of power. This resolution cannot be considered until every detail is made known to the people because this is a government of the people, by the people, and for the people. Don't forget that.

KIRKPATRICK

Thank you, sir. Next speaker, please.

MARIO IZZO

My name is Mario Izzo I-Z-Z-O is last name spelling. And I didn't really prepare much. I'm just gonna go off the cuff here. But I want to speak to all of you as people - man to man, man to woman and just say realize what church doin. Realize that you have a choice to make. You - you - you're gonna try to take away freedom of speech. And when we say freedom of speech, we're just talking about the truth, right? The truth arises. We want to share it and you tell us it's misinformation, it's a health crisis? Who - who, just like my buddy said, Angel, who's deeming that a health crisis - who's deeming that information false? Is it you guys? Is it the pharmaceuticals? Is it the big boys up top, right? Just remember one thing: we've all been

IZZO little kids at one point. We're all little boys and little girls one time. And remember being in school, remember doing something bad, your mommy or daddy would smack you on your hand as consequences for the things you did. Remember that?

UNIDENTIFIED You can't smack 'em on the hand -

IZZO Oh, I'll be - I've smacked my boy in the hand I'll tell you that right now. No one is gonna tell me I can't do that. But- here's the thing, don't forget there's consequences for all the things you guys do. All the choices that you make. God gave us the inalienable right, he said he'd never take away our free will, our freedom of choice. God wouldn't do that. So, if you think we're gonna let man do that, you're out of your mind. And just understand that the choices that you all make here on this panel today, there will be consequences, I promise you dat. There will be consequences for thes - the choices that you make. If you - if you take away or try to take away our freedom of speech, there will be consequences. It might not be your mommy or daddy smacking you on your hand, but I promise, it will be something. Don't ever forget that.

KIRKPATRICK Thank you. Next speaker please.

UNIDENTIFIED Amen

JOANNE ESSLINGER Joanne Esslinger E-S-S-L-I-N-G-E-R and I would like to ask each of you're a question. You say that you follow the science, correct? Everybody, one at a time. Do you follow the science, yes or no?

KIRKPATRICK Ma - ma'am, we - we can't respond so if you just wanna just go ahead and finish your comments.

ESSLINGER As a group, you all follow the science, correct? Correct? Okay. In a scientific experiment, if you leave even one bit of data out of the equation, it's considered corrupt. If you ban what you people consider misinformation, doesn't

ESSLINGER that make you all corrupt? You should think about that.

KIRKPATRICK Thank you. Next speaker please.

UNIDENTIFIED (UNINTELLIGIBLE)

TY OLSEN Ty Olsen. O-L-S-E-N How in the world can you ever justify that you have the right to censor our freedom of speech? There's not a court in the land that can supersede our God given right in the Constitution, let alone the Clark County Commissioner Board. I don't need to be a lawyer to know whether or not this could be legal under whatever laws you might twist to justify it. It's just simply wrong. Freedom of speech without malice, being true to yourself, just cannot be silenced and would be criminal to do so. This is America. To whomever brought this to the agenda and whoever votes yes to this, I don't know how you can call yourself an American or a patriot. A yes vote would prove to everyone you're a communist stance and would become an enemy of the public. Are you trying to provoke civil unrest? Because that's what you're gonna get. When the government - is going to address - when is the government going to address the CDC VAERS database reporting of one million five hundred nineteen thousand three hundred fifty-four adverse events and fourteen thousand nine hundred and twenty-five deaths to date? Or is this just disinformation or misinformation? I'll tell you what is disinformation. Was when the CCS Board asked Southern Nevada Health District doctor if the vaccine is gene therapy in the public meeting. He said it wasn't and the people got confused because the term MRNA and it doesn't affect your DNA. I wanna correct this misinformation. The so-called gene is - the so-called vaccine is gene therapy. There are plenty YouTube videos explaining how it was intended to work, so here's a quick explanation of MRNA, which is a sequence of genes. It's surrounded by multiple nano lipids, one of which is PEG, polyethylene glycol, a cancer-causing substance. This lipid envelopes carries and delivers the MRNA to and into the cell. This is where the

OLSEN

ribosome uses the mRNA or genes to make billions of virus-spiked proteins which are then expressed out of the cell. This is gene therapy. I don't know what else to explain it. This is - it is still debatable if the mRNA is entering the nucleus of the cell and using a process of reverse transcriptase to integrate with the DNA of your cells. According to a researcher Doctor Richard Fleming through an analyst of a study of an electron microscope has proven to him that this is happening. Originally, the spike proteins were supposed to stay in the arm and the spikes to be identified by the immune system creating antibodies. This did not happen, and these spikes are circulating throughout the body and are proven to be pathogenic causing all sorts of injury and death. The CDC already knew this was going to happen by publishing a list of forty injuries including death two months prior to the release of the jab in anticipation of collecting this data.

KIRKPATRICK

Thank - thank you sir. Next speaker please.

ADAM SCHAFFER

My name is Adam Schaffer S-C-H-A-F-F-E-R

KIRKPATRICK

I'm sorry sir, I didn't hear your first name.

SCHAFFER

Adam Schaffer

KIRKPATRICK

Okay

SCHAFFER

Yeah

KIRKPATRICK

Go ahead.

SCHAFFER

I'd like to just more or less connect with all of you on a human level. What exactly are you tryin' to do? We have a health crisis. You lawmakers say - honest solution. Everybody needs to get vaccinated. So, you're lookin' at some of the people, probably even in this room, thinkin' you know, they're conspiracy theorists, and they've gone down the wrong path with what they're thinking. We do that as humans. You take a group of - collection of data here, a

SCHAFFER

collection of data here, we as humans, we're curious. We wanna find cause effect. We link groups of data that may not have - any type of relationship. We're lookin' at other people who want to correct that. We wanna use our power to - accomplish something good, even if it's the wrong way. No, that's not the right way. I'll use you, Commissioner Jones, as an example because you were the one who brought forth this - ninety-six. What was your thinking?

KIRKPATRICK

Sir, if you could address the whole Board, that would be helpful.

SCHAFFER

Well, he was the one that brought ninety-six to so -

KIRKPATRICK

I know sir, but in public comment-

SCHAFFER

-but in that general sense to create that, it's - you know, not enough people getting vaccinated. Over here, God, these people are printing our misinformation. Ya link them, someone linked them together and said hey, they're not getting vaccinated because this imis - misinformation. No, eighty million people got - didn't get a vaccine because they have eight million different reasons. And what is inf - misinformation? Yellow or - red number forty by the FDA is a - is safe to use in America. EE - e - mc European Medicine Agency deems it poison. It's banned in Europe. They use the same data. Who's - who's misinformed? Who's putting out misinformation? The exact same data, you have two sets of academia qualified individuals that one - one is banned, it's poison, one is sayin' it's - it's safe. How can you, as a group, look at information and say this is misinformation? We need to ban that. How - how can you do that? Now it just doesn't make sense. It's not who we are as a nation. It's not who we are as humans. So, I appeal to you, looking into yourselves and sayin' is this the road we want to take? Even for its - for overall good for the common good. It's the wrong approach. Lead with fear, no, you lead with love. You take the stand and all your morals, all your upbringing -

KIRKPATRICK Thank you, sir. Next speaker please.

CHRISTINA KETTLER Christina Kettler K-E-T-T-L-E-R Reuters came out with a story that the heart inflammation risk is boosted by the vaccine. Heart inflammation is more common among men following the vaccination, myocarditis. Maurice Reggie Shepperson was a Las Vegas Southwest flight attendant. He died after receiving the vaccine and catching COVID. How dare you want to limit our speech to the truth and free thinking for what is right because we all know you're involved in some sick, dark stuff. So, there'll be a day when we outnumber you. But right now, you think you're doin' it to us. When tyranny becomes law, rebellion becomes duty. So, how dare you, how dare you, how dare you. You're poisoning our children, and this is disgusting. You're making them wear masks all day and it's not right. And you're not wearing masks to your own birthday party.

UNIDENTIFIED (UNINTELLIGIBLE)

KETTLER I'll see you next time.

KIRKPATRICK Next speaker, please no clapping, please come on next speaker.

P.J. BELANGER P J Belanger B-E-L-A-N-G-E-R. I'm gonna count to three and then I'm gonna read the - rule from the disabled. One, two, three. It says up in your Ethics Committee here that those of us with disabilities need to be taken consideration of and I think those officers that have - but I need to let you all know, since you obviously didn't know. Additional requirements, accommodations, and notice. Accommodations for public bodies shall make reasonable efforts to assist and accommodate persons with physical disabilities during the attendance. Mine is physically visible. And you violated me. So, just to make sure you knew, I - please don't violate us anymore. Notice to persons who request notice of meetings, additional requirements in consideration for physical or

BELANGER

mental health. So please make sure that the next person that asks and tells you and especially when it's visible to - they can't wear masks. You know, go ahead and follow your rule, that'd be great. So, I have a minute of a half. Fauci is part of Operation Paperclip from the Communist Germany regime. Those of you who have not done your research, shame on you. I thought we were the United States of America and you'll are making it anything but united. Your global efforts, your global endeavors, your new world order is more important than the people. If that's so, then you need to give up your seat. You're in the wrong job. You're not working for the people. You're working for the enemy. And, you become the enemy, unfortunately. That's sad, right? When you wanted to take a job working for the people. Why would you want to become the enemy of the people? And, before you continue to, try to think that this Communist regime that's tryin' to take over our country and poison all of our children and masks, before you make this vote, I highly recommend and I actually, by the authority of this building being the people's. The people need to see the medical documentation at MeehanMD dot com M-E-E-H-A-N MD dot com. I'll give you a second. Go ahead and look it up now. MeehanMD dot com. If you care. If you do care, you'll take a look. For yourself, for your own children, for your own family. MeehanMD dot com. Take the diapers off of our faces. Free our faces. The shot, which is designed to see how many people will comply before they bring on the actual mark of the beast shot.

KIRKPATRICK

Thank you. Next speaker please.

JASON NELLIS

Hello I'm Jason Nellis. First off well - what - how do you get to decide what misinformation is - when, ya know, there's all kinds of conflicting studies and everything and - so many scientists and doctors have come forward saying vaccines dangerous and everything, I can - get into details but I don't want to get into specifics. The point is, you are not supposed to be - censoring, meddling in our free speech and

NELLIS

- Justin Jones, the one who - who's pushing this - and articles in the news - ya know, at the last meeting I was at was sayin' that the sticks we - were working better than the carrots. We are not animals. And it is - in studies of history shows that one of the mid-term stages of leading to genocide are to equate the - the people, the enemy, whatever to animals and vermin and - disease-types. I don't - I refuse to believe that our civilization would succumb to this. I don't, I mean, I just don't think that's gonna happen because I believe in humanity. I don't believe - we could - su - succumb to this grim dystopian nightmare and repeat history in this dark new science and tech worshiping way. But that - we take all that information available to us from our lessons, take that wisdom - learn from shameful and painful mass experiences and stop ourselves from falling into this pit and stop false forces like those you may or may not be aware of - the intentions of and - and that we have to rise up while you guys and those above you keep striking while the iron is hot. I know what happened earlier we all were riled up. It's very understandable that we were - riled up. I mean - not gonna to get into what exactly happened there. I mean it was way out of line but it's understandable when you're tryin' to take away part core of our constitution so - why can't we get along, we can get along with each other and care for each other in any way that we see as helpful and a vital part of that is free sharing of ideas and remedies - verified treatments and speculations too. Even when people are wrong but when leaders - are leaders try to make laws to shut us up or mandates to infringe on our Bill of Rights, constitution, our human rights to speak what we think and believe than our country is - are - this country is not new to the concept of liberating ourselves. And no law - as - pointed out earlier no law or tank or - or cams or nukes or gavels can - can govern our will and our soul and you're seeing the soul - the soul and the will of the people and I hope you listen this time as - as many people pointed out, that images lookin' bad, people are

NELLIS

watching you closely a - I mean the world is watching - and yeah, other countries are smart enough to be backing off of this and I hope you do to so that we can - we can heal as a community. Thank you.

KIRKPATRICK

Thank you. Next speaker please

KERRI DOMINGUEZ

Hello, good afternoon. My name is K-E-R-R-I D-O-M-I-N-G-U-E-Z I am here as my last resource. Obviously if you guys pass this violatory - anti-constitutional mandate or whatever you want to call it to mask it as legal, it will be the end of humanity. And yes, this might sound dramatic but it's, I don't have the right words to express how bad this new world order will affect humanity in general regardless of your nationality, regardless of your race. This will end all human liberties because this gene therapy injection that should not be called vaccine, not only is killing a lot of people, okay, not only will kill a lot of people that get it but will turn every single person that gets vaccinated into transhumans. This is not a made-up conspiracy theory that I read online on some crazy blog, this is a research study proven this is a gene therapy injection, okay, and I know you guys know this. It will turn every single human in transhumans. Transhumans do not have human rights. We already see that you guys are stripping us from every single right that every single human bein' has. Freedom of choice, freedom of speech, freedom of breathing. What's next? You don't comply, you get shot? You don't comply, you go into a FEMA camp? Is that - is that the - is that the next protocol? I mean, it just terrorize me. I don't watch the news. You know why? Because if I watch the news for more than five minutes, I will probably end up believing in this plandemic. And it's sickening. That all the people that work for the government are not doing anything to stop this. Because it's as simple as you turning your back on this crazy insane plan. To control humans. We are humans. God gave us a spirit. This vaccine will strip every single human from their spirit connection to God, the creator, and you guys are

DOMINGUEZ complying to this nonsense. You guys are complying to this. I don't even have a word to say, to explain how abysmal, and how disgusting this is. It's your responsibility to research. I've done my research. Why isn't there a public medical debate all over the world and every single language, translated into every single language. Why are being forced to keep our mouths shut and not say what's really happening? Why do you wan - guys want so bad for us to stop sayin' the truth? Callin' us centered

KIRKPATRICK Thank you - next. Thank you. Next speaker please

DOMINGUEZ -you can't take my life but-

KIRKPATRICK Go ahead

DOMINGUEZ -you will never, ever take my soul.

UNIDENTIFIED Excuse me

KIRKPATRICK We're done, thank you.

UNIDENTIFIED (UNINTELLIGIBLE)

KIRKPATRICK Go ahead.

FRANCES DEANE Good afternoon ladies and gentlemen. My name is Frances Deane and I apologize for showing up here looking like this today. I wasn't gonna come but then I started hearing the same old, repetitive masks er, and freedom of speech and shots and whatever trans - forming humans are. I want to remind you, Marilyn, maybe you remember, Justin, you look a little young, Tick, you'll remember the babies that were born with little arms and little legs. Some of them died. There called the thamaldihide babies. For five years, from Nineteen Fifty-Seven to Nineteen Sixty-Two, the federal government and Europe, and the United States gave these pills for morning sickness to mothers that caused growth deformities to their babies. FDA sanctioned the whole bit. What these people are saying, and I know you don't want to hear about more masks, I get that. These people are scared. Our federal

DEANE

government has not been infallible. They've not always made the right decisions and they're asking you for the opportunity to come here, they live here, to tell you how they feel and how scared they are. And if you interpret any of this, other than fear- you need to take some classes in psychology and sociology these people are scared. They're coming here week after week begging you to listen to them, begging you to see them. Because our federal government made thalidomide babies. The Tuskegee syphilis experiments were real. They just wanna be able here - to come here and talk. And you want to restrict their ability to talk? Is that real? I don't believe any of you came to this job thinking that you were going to have to legislate on the first amendment. Just don't. Understand your role in their lives. They don't come knocking at your house, they come here. And they say listen to me, see me, hear me, and you want to restrict that at this point? You guys are better than that. I'm shook. I came here from my front yard this morning. I was pulling weeds, you can see, and I realize the only thing you guys seem to be missing is that every single one of these people want to be heard and they don't want to be forced. They - you are their only line of defense and - and I really hope you'll take that into consideration. It isn't about being Republican, Democrat, Libertarian; we've seen them all here. None of us are the same political party. All I can ask you to do is listen. That's the only reason they come here. They want you to hear them. And it isn't like they don't have anything to think about in terms of historical precedence. They do.

KIRKPATRICK

Thank you. Next speaker please

JUDY LESLIE

Judy Leslie L-E-S-L-I-E - First of all I want to - notice that - to help limit the spread of coronavirus please adhere to social distancing. I want to let you know that none of you up there did this and so if you're going to mandate one - one - mandate, then you should mandate them all. And you don't - you don't do that so why should we sit here and put our masks on when you don't

LESLIE do the same thing. That's - I'm just wha-
another thing; this a warning - this a warning
to all nurses, doctors, and anyone else who
pushes the vaccine without telling you what is
in the vaccine and how it can harm you. You will
go on trial and you will serve time. Thank you.

KIRKPATRICK Thank you. Anybody else who has not spoken
already. So, I - you've already spoken ma'am
and sir.

UNIDENTIFIED I want to talk to you about seventy-two-

KIRKPATRICK No-

UNIDENTIFIED You cannot speak-

UNIDENTIFIED -number seventy-two -

KIRKPATRICK You already had your chance, anybody has not
spoken, please-

UNIDENTIFIED It's on the agenda-

KIRKPATRICK Please, please ma'am. Mister Uehling go ahead.
Come one.

UNIDENTIFIED (UNINTELLIGIBLE)

KIRKPATRICK Mister Uehling, did you want to speak? Mister
Uehling, please. Let him in, please. Go ahead
sir.

ED UEHLING Yes, - my - my name is Ed Uehling. I just find
it incredible that - that -we're - we're
actually considering that the government should
be the one - arbit - arbit - arbiter of the
truth? It's just - it's just beyond belief that
we can even be thinking about that. Let's just
start with - with the basics. Everyone blames
the pandemic for what happened. Ju - listen to
the rhetoric. Everyone - the pandemic did this,
the pandemic caused that. No, the pandemic
caused the death of people that are old and who
have - imm - immune compro - immune compromise
systems. That's what the - that's what the
pandemic does. The shutdown is the disaster

UEHLING

that has occurred in - in Clark County, in Nevada, in the United States. The - an -and we don't say that. It's - it's the shutdown that - for example, four hundred school age children in the entire United States have died from COVID. Even - even with the fake statistics that are coming out. Fa - four hundred school age children. Out of what, a population of eighty million? And - last year, seventeen - four hundred children in the United States translates to four children in Nevada. Nevada has one percent of the population of the country. So, four children in Nevada perhaps - schoolchildren died. Seventeen children committed suicide last year. In two thousand nineteen, only one child committed suicide. That's due, not to the pandemic. The pandemic didn't kill them. The shutdown of our political leaders killed - killed - killed these people. They're the ones responsible; the Governor, the School Board, the school - the school union. These are the people that killed these children. And - you can look at any statistic you want. And that's what - the shutdown that is caused the problem. And the Government has a history of prescribing the wrong thing. You - you had up here earlier - about the - about the - the contagion of a - of a - of - psyo - psychopathic drugs. That was promoted by the - by the government, by our health - our health system and - and look - look what's happened. And this goes - this is - this is very sad to see this happening.

KIRKPATRICK

Thank you, Mister Uehling. Any - anyone else that hasn't spoke, please come forward now, okay.

DANIEL BRAISTED

Good afternoon. Daniel Braisted, resident of the City of Las Vegas - again on item ninety-six. The thing to understand about science is that it's complicated. Physics is not. Physics, we can get to Mars and back cause the laws are there. But science is so complicated because of your emotions. If I take a medical - tablet today but I have certain emotions, then it will react differently than somebody else. My heredity, my environments, what my mind is

BRAISTED

saying so - it - it's I'm asking you to reconsider this - item. I presented pictures about live and blood - analysis at a past meeting and never heard any comments from it. I mentioned that - the future of medicine is the medicine of - of frequencies. And I quoted Einstein. And this is the device that I'm using. This used to be a mainframe with the Russians, and they - they helped to keep their - astronauts up in the nineteen eighties. It's now shrunk down to this. What this can do is phenomenal. Yet, if you're interested, let me know. I invited about sixty individuals in government to the Alternative Medical Conference at the Westgate about a month ago. And as far as I know, nobody attended that I recognized. Now, this is a group of people that are seeing medicine differently. They're talking about frequencies. They're talking about - different ways of scanning the body. There was an individual there that reversed cerebral palsy of his nine-month-old baby. His son is now thirty-nine and he is - two black belts. But the outstanding - but I didn't see any of you there. And like I mentioned the same in the City Counsel, I told the same thing to other - other groups. It's - it's sad. So, just letcha know that there are really no absolutes in science because it is so complicated. It brings in to so many different dimensions. So, I'm asking you to step - forward slowly on this idea. Thank you.

KIRKPATRICK

Thank you. Next speaker please.

OAK HILTS

Name is Oak Hilts O-A-K H-I-L-T-S. We voted you in and as I watch, everybody is turning against you now. What - what happened? I watch, sitting here for few hours, you deciding to vote in many different issues. You must go home and study a lot. Getting information. Maybe some nights you don't even sleep because you have to do the right thing. I'm not going to assume that you already made up my mind when you came here today. The banner here says it's not too late until it is. Suppose I went to the - suppose the election day came. I had the ballot in my hand. I'm deciding how to vote issues. And there's

HILTS

only cons cons cons. And no pros for me to read. How do I decide? I need information. Am I in North Korea that I have to do what Kim Jong-tut tells me to do? Because I don't have information. This is USA. I came to this country because I can think, I can express my opinion. Informations all available. I can read and decide myself whether to get vaccinated or not. Whether to talk about this person died after vaccination or not. We have freedom in this country. I'm sure you thought a lot. I'm not an intelligent person like you. You voted in because of who you are. Please listen to people. Don't let them turn against you. Election is coming and we trusted you when we voted you in. Thank you. God bless you.

KIRKPATRICK

Thank you. Next speaker please. Anyone else who has not spoke?

RANDY RENE

My name is Randy Rene. I recovered from COVID February Twenty Twenty. I'm not going to get a vaccine because I have antibodies but I'm being discriminated against. How many on this Board, you can raise your hand, whatever, belong to the Las Vegas Global Alliance? Just one? Only one? Did you guys have a party in August? Did it get cancelled because of COVID or did you get to go to the party?

KIRKPATRICK

Ma'am if I could get you -

RENE

Were masks made to wear?

KIRKPATRICK

Ma'am-

RENE

Because we're gonna get the film to find out. So, reading through the Las Vegas Global Alliance twenty twenty five strategic plan called Vision Twenty Five, using inciting lots of material from the U.S. Census Bureau, Southern Nevada labor force remains concentrated in the lower education levels. Oh, these are alerts when you're reading through the documents. Twenty percent. Twenty-eight percent high school, twenty-five percent some college, eight percent graduate degree or higher. Our K

RENE

through Twelve performance is rated the lowest in the nation. Education achievement in Clark County remains below state and national averages. Even reading UNLV science program's in there, rated low. We're talking science? What's interesting is when looking at all these different Boards, I found this from going through the Governor's workforce Board. So many members and so many people belong to so many different ones and we're going to look at all of them. DETR, through the State of Nevada, has contracted with ID and Me. If you want your unemployment check, people like me that had a small business in Henderson, we want our PUA, we have to give our digital identity to a company to get our check. ID and Me's contracted through - through the State of Nevada - Nevada. We have to give our facial recognition, or we don't get our check. Three pages of agreements and I won't agree to them. Their the same company that will be bringing vaccine passport. Are you guys, is anybody here have any assets or any - anything I any of that? ID and Me has been in default with their business license in the State of Nevada since eight twenty-one of this year. I've been calling everyone and getting the nice loop calls that are state - that are statewide with all government departments when you try.

KIRKPATRICK

Thank you, ma'am. Thank you.

RENE

(UNINTELLIGIBLE)

KIRKPATRICK

Thank you. Any - anyone else wishing to speak.

RENE

(UNINTELLIGIBLE)

KIRKPATRICK

Ma'am. Anyone else - anyone else-

RENE

(UNINTELLIGIBLE)

KIRKPATRICK

Anyone else wishing to speak. Please no clapping. Okay, let's go next speaker, please. Come on.

JOHN CARLO

Can you give me some space, please?

KIRKPATRICK

Yep, come on. Come right to the center and you'll have plenty of space. Come on. Go ahead. Please state and spell your name for the record.

JOHN CARLO

John Carlo may be running for office when I know these machines are working right. I'm here in the name of the great Governor of the universe, the Lord Jesus Christ. I quote to you one of the ten commandments which was in some of y'all's schoolrooms when you were growing up. Exodus Chapter Twenty, Verse Sixteen. Thou shall not bear false witness against thy neighbor. Let me - interpret is for you. Bearing false witness doesn't mean that you lie. Bearing false witness means that you know the truth and you suppress the truth. So, God is on our side. Missus Kirkpatrick, I told - you told me outside that I could not drink in here. I could not drink my coffee and take off my mask. How come you have a coffee in front of you and you all have drinks in here when you told me I could not. The witness you heard - witnesses heard you say that your censorship of truth is becoming more evident hypocra- hypo - critical. How come you can drink in this room and you told me I could not. Your egos are grossly encroaching on constitutional rights. I'm asking the Chair to please follow the Nevada Revised Statute Two Forty-One of giving proper notice to the public of locations and times. The - this law says the meeting details should be posted in at least three prom - prominent places. It has been very difficult to even know the information that's going - when the meetings are. This isn't the first time Democrats and radical leftists have tried to silence freedom of speech. I fir - in my lifetime. First, I saw it when Canada and - hooked up with radical leftists tried to tell preachers that they could not preach against homosexuality. Second, I saw it when the Communist Party, undercover communists in the Democratic's Party tried to say that public bodies could not pray in Jesus name. That was - that went to the Supreme Court in Two Thousand Fifteen, Greenfield versus - Stanly County. And now, I see another attempt of Democrats coming against our first amendment rights. You will not

CARLO

come against our second amendment. I'm running out of time but each of you know that I'ma having a militia behind me and you will not stop that. We will - we - you - we feel under attack. You guys need to know we feel under attack and we will defend ourselves. And these police need to join us on our side. And we're - what you should be doing is bringing the Southern Nevada Health District in here and giving us truthful and complete reports on the deaths and adverse reactions because that is a substantial public interest.

KIRKPATRICK

Thank you. Next speaker please. Seeing, anyone else wishing to speak? Seeing none we're going to go ahead a close the public comment period and turn it over to you, Miss King.
