BACKGROUND:

Project Description

General Summary

- Site Address: 1795 Wittwer Avenue
- Site Acreage: 4.9
- Number of Lots: 4
- Density (du/ac): 0.8
- Minimum/Maximum Lot Size (square feet): 25,854/80,854
- Project Type: Single family residential development

Site Plan

The site is an approximate 4.9 acre parcel developed with a single family residence and associated accessory structures. The applicant is proposing to reclassify the site to an R-E zone and subdivided the parcel into 4 lots for a single family residential development with a density of 0.8 dwelling units per acre. The lots will be between 25,854 square feet to 80,854 square feet in area. Access to the proposed lots will be provided by a private street that intersects with Wittwer Avenue. The private street will be 40 feet in width and terminate in a cul-de-sac in the southern portion of the site. There are no plans for the future homes on the proposed lots since this will be a custom home subdivision.

Applicant's Justification

The applicant indicates that there is an existing residence on the parcel. The request is to subdivide the parcel into 4 lots. The existing residence will remain on 1 of the proposed lots and the other 3 proposed lots will be sold for the future development of custom homes. There is an existing single family residential development approximately 330 feet to the east of the site. This site and the surrounding parcels are designated as Ranch Estate Neighborhood (up to 2 du/ac) in the Master Plan; therefore, the request to reclassify the site to an R-E zone is in conformance with the Master Plan. Approval of this request will not have a negative effect on the neighborhood as the proposed zoning fits into the rural residential development of the area. The layout of the proposed subdivision and sizes of the lots are consistent and compatible with existing and planned developments in this area.
