# Pack an Evacuation Go-Bag

- ❑ Use go- bag(s) that can be easily lifted into a vehicle, and that can hold enough necessary items for 3 days up to 2 weeks.
- ❑ Place in an easily accessible area such as a closet
- ❑ Medications, clothes, non-perishable foods etc.

# Prepare for Wildfire Smoke

- ❑ **Stay safe indoors:**
  - Keep all windows closed and turn on the air conditioner.
  - Create a “clean room,” a room with few windows and doors and no fireplace that is a large enough room for your family and a portable air cleaner or air purifier.
  - Avoid creating additional smoke or particulate matter in the home.
- ❑ **Protect yourself from smoke if you must be outdoors:**
  - Use a NIOSH P100 or N95 respirator while outdoors.
  - Reduce strenuous activities and take breaks.
  - Stay hydrated. Adequate hydration keeps your airway lubricated, which keeps you safer from health impacts related to smoke.
- ❑ **Consult with your doctor for medical advice, especially if you have heart or lung disease, or asthma.**
- ❑ For more on how to prepare for wildfire smoke and protect your health, see the publication [Living With Smoke: How to Be Prepared for Smoke Exposure](#).
