**Analysis****Current Planning**

A use permit is a discretionary land use application that is considered on a case by case basis in consideration of Title 30 and the Comprehensive Master Plan. One of several criteria the applicant must establish is that the use is appropriate at the proposed location and demonstrate the use shall not result in a substantial or undue adverse effect on adjacent properties.

The applicant has submitted documentation from the State of Nevada indicating completion of the application evaluation process for a retail marijuana store license. The separation survey shows that all the required separations from community facilities and schools are being met. The applicant has submitted the required security and transportation plans. The crime report indicates that within a 1 mile radius, 72 crime reports were filed by Metro in the 60 days prior to the application submittal. The submitted location analysis indicates the retail marijuana store is adequately separated from other retail marijuana stores to prevent a high concentration of stores within close proximity. Building elevations indicate that a professional appearance will be maintained.
