BACKGROUND:

Clark County proposes to construct and operate a new supplemental airport, approximately 30 miles south of Las Vegas in the Ivanpah Valley, between the towns of Primm and Jean immediately east of Interstate-15.

On April 20, 2021, the DOA and Ricondo & Associates, Inc. provided an SNSA project briefing to the Board of County Commissioners, which included a historical overview, ongoing planning work, agency coordination and public outreach efforts, and current project schedule. During that briefing, the DOA presented plans to virtually conduct a series of ground transportation access stakeholder workshops and public meetings. The purpose of the workshops and public meetings was to provide information on the SNSA planning efforts and to gather input and feedback from the public, business community, and stakeholder agencies.

The DOA will present an update on the SNSA project that will include project highlights and accomplishments, key tasks currently underway, and the results of our ground transportation access outreach.

Additionally, Federal Aviation Administration Director of the Western-Pacific Region, Mark McClardy will provide supporting statements.
